The Lola T70 was developed in 1965 for sports car racing – Lola built the chassis, which were typically powered by large American V8 engines, predominantly Chevrolets and Fords. The T70 was prolific throughout the mid- to late-1960s, and over 100 examples were built in three versions – both open-topped and coupé models. The first successes for the T70 were in the US, and in 1966, the T70 dominated the Can-Am championship, winning five of the six races in the series – with John Surtees becoming champion in a Chevrolet-powered example. In 1968, T70s finished 1 - 2 in the Daytona 24 Hours, and the T70 was highly successful in the domestic UK and European championships, winning regularly. Today, Lola T70s are regular competitors on the historic racing scene, and examples are highly sought after by collectors. This Lola T70 Owner's Workshop Manual looks at the design, evolution, anatomy and operation of the T70.

Just a Spoon Full of Laughter is a great read for anyone that's been to a doctor's office and made it out alive. Written by an actual physician, it will keep you in stitches (no pun intended) from one story to the next. See for yourself what could be so funny about the physician office visit. Whether it's recalling his first sigmoidoscopy or performing an autopsy, you'll keep this riveting series of short humorous stories right there in the bathroom for pleasurable reading. You may even find yourself somewhere between the pages. From an author who will never be a New York Times Best Seller, it's a great book for young or old, male or female, professional or not. It's especially ideal for that person in your life who has everything except a sense of humor. It's ideal as a stocking stuffer, white elephant gift or for future yard sales. billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

A blended learning approach to automotive engineering at levels one to three. Produced alongside the ATT online learning resources, this textbook covers all the theory and technology sections that students need to learn in order to pass levels 1, 2 and 3 automotive courses. It is recommended by the Institute of the Motor Industry and is also ideal for exams run by other awarding bodies. Unlike the current textbooks on the market though, this title takes a blended learning approach, using interactive features that make learning more enjoyable as well as more effective. When linked with the ATT online resources it provides a comprehensive package that includes activities, video footage, assessments and further reading. Information and

Great collector cars are still out there--just waiting to be found! Sadly, there is very little reality in reality TV. That wouldn't be so bad except for the fact that these shows are the only TV shows for the barn-find collector car aficionado. Barn Find Road Trip is the antidote to all the manufactured collector "reality" shows. It's a real-world, barn-find banzai run in which auto archaeologist Tom Cotter, his car collector pal Brian Barr, and photographer Michael Alan Ross embarked on a 14-day collector-car-seeking adventure with no predetermined destinations. It's barn-find freestyle! Roaming the Southeast, they documented their day-to-day car search in photos and through stories and interviews. This trip is absolutely real and the same kind of junket any gearhead with the skills, knowledge, and time can undertake. Cotter and company hit the road in Cotter's 1939 Ford Woody, the kind of car that opened doors and started the conversations that revealed where interesting cars were squirreled away. The result? The discovery of over 1,000 collector cars and some of the most amazing barn-find stories Cotter has yet unearthed, all accompanied by Ross' evocative photography. If you love stories of automotive adventure, this is the book for you!

American Cars, 1946-1959

Lemon-Aid New Cars 2001

From the resumption of automobile production at the close of World War II through the 1950s, the American auto industry would see the births and deaths of several manufacturers, great technological advances, and an era of dramatic styling as a prospering nation asserted its growing mobility. Cars of this period are among the most iconic vehicles ever built in the United States: the 1949 Ford, the remarkable Studebaker designs of 1950 and 1953, the 1955-1957 Chevrolets, the "Forward Look" Chrysler products, the ill-fated Edsel and many others. This comprehensive reference book details every model from each of the major manufacturers (including independents such as Kaiser-Frazer and Crosley but excluding very low-volume marques such as Tucker) from model years 1946 through 1959. Year by year, it provides an overview of the industry and market, followed by an individual report on each company: its main news for the year (introductions or cancellations of models, new engines and transmissions, advertising themes, sales trends etc.); its production figures and market status; and its powertrain offerings, paint colors and major options. The company's models are then detailed individually with such information as body styles, prices, dimensions and weights, standard equipment and production figures. Nearly 1,000 photographs are included.

Automotive Technician Training: Theory

The 1973 oil crisis forced the American automotive industry into a period of dramatic change, marked by stiff foreign competition, tougher product regulations and suddenly altered consumer demand. With gas prices soaring and the economy in a veritable tailspin, muscle cars and the massive "need-for-speed" engines of the late '60s were out, and fuel efficient compacts were in. By 1980, American manufacturers were churning out some of the most feature laden,

yet smallest and most fuel efficient cars they had ever built. This exhaustive reference work details every model from each of the major American manufacturers from model years 1973 through 1980, including various “captive imports” (e.g. Dodge’s Colt, built by Mitsubishi.) Within each model year, it reports on each manufacturer’s significant news and details every model offered: its specifications, powertrain offerings, prices, standard features, major options, and production figures, among other facts. The work is heavily illustrated with approximately 1,300 photographs.
