Refrigeration and Air Conditioning Technology

Eighteenth-century Europe witnessed a commercialisation of culture as the marketing of culture became separated from its production and new cultural entrepreneurs entered the stage. Cultural consumption also played a substantial role in creating social identity. In this book, Michael North systematically explores this field for the first time in regard to the European Continent, and especially to eighteenth-century Germany. Chapters focus on the new forms of entertainment - concerts, theatre, opera, reading societies and traveling - on the one hand and on the new material culture - fashion, gardens, country houses and furniture - on the other.

Wolf's Coming!

A stirring tale of love and feud Captured by the swashbuckling pirate, Edward Christian, Eleanor feared degradation and, possibly, death. Instead she found herself swept into a turbulent future, her life spent against the background of the seventeenth-century Isle of Man and the long-lasting feud between the powerful Christian clan, fighting for their lands and their rights, and the even more powerful Stanleys, the Lords of Man who claimed the whole island as their own. Through a forced marriage, through great joy and great sorrow, through the terrible Civil War which had such an impact on the little island, and through the long imprisonment of her love; only through her great love does Eleanor survive to experience, at last, her own happiness and the defeat of a tyranny throughout the island home she has grown to love. Author Anne Hampson is on top form in this stirring novel, set in one

of the most vivid periods in the history of the Isle of Man which she herself knows and loves so well.

The Glory Boys

Many books have been written about Singapore's much vaunted position as a crucial maritime center along the East-West trading route. But one aspect of its history the military perspective has, for the most part, escaped serious scholarly attention. *Between Two Oceans* aims to fill this historical gap. Drawing on an impressive range of archaeological and historical sources gleaned from research and documents in Britain, India, Singapore, the United States and Australia, the book traces the geo-strategic development of Singapore from its first settlement in the thirteenth century, through the turbulent phases of the Early Modern period, to the dramatic military episodes that have been such a distinctive feature of the twentieth century. In presenting a balanced view of this momentous story, the authors have sought to dispel many of the myths about Singapore's military history that have grown up in the past and are now assumed to be factually correct. *Between Two Oceans* breaks new ground.

Law Reform Proposals and Their Implementation

The drawings which compose Sketchbook Works Vol. 1 & 2 were developed through pain staking processes of organized mark making within the rigid confines of the grid. The production of these works employ traditional methods of drawing, as well as unconventional modes such as tediously mixing a vast array of custom

marker colors for perfect gradients, laser engraving miniature patterns onto pages, and using destructive processes like dissolving imagery with chemical solvents. These drawing processes craft a diverse array of visual experiences derived not only from organized drawing systems, but also from mistakes and destructive actions, whose results were sources of evolution seen in this body of work.
