The decentralisation of competition law enforcement and the stimulation of private damages actions in the European Union go hand in hand with the increasingly international character of antitrust proceedings. As a consequence, there is an ever-growing need for clear and workable rules to co-ordinate cross-border actions, whether they are of a judicial or administrative nature: rules on jurisdiction, applicable law and recognition as well as rules on sharing of evidence, the protection of business secrets and the interplay between administrative and judicial procedures. This book offers an in-depth analysis of these long neglected yet practically most important topics. It is the fruit of a research project funded by the European Commission, which brought together experts from academia, private practice and policy-making from across Europe and the United States. The 16 chapters cover the relevant provisions of the Brussels I and Rome I and II Regulations, the co-operation mechanisms provided for by Regulation 1/2003 and selected issues of US procedural law (such as discovery) that are highly relevant for transatlantic damages actions. Each contribution critically analyses the existing legislative framework and formulates specific proposals to consolidate and enhance cross-border antitrust litigation in Europe and beyond.

### **Annual Proceedings of the Fordham Corporate Law Institute**

More than any other area of regulation, antitrust economics shapes law and policy in the United States, the Americas, Europe, and Asia. In a number of different areas of antitrust, advances in theory and empirical work have caused a fundamental reevaluation and shift of some of the assumptions behind antitrust policy. This reevaluation has profound implications for the future of the field. The Oxford Handbook of International Antitrust Economics has collected chapters from many of the leading figures in antitrust. In doing so, this two volume Handbook provides an important reference guide for scholars, teachers, and practitioners. However, it is more than a merely reference guide. Rather, it has a number of different goals. First, it takes stock of the current state of scholarship across a number of different antitrust topics. In doing so, it relies primarily upon the economics scholarship. In some situations, though, there is also coverage of legal scholarship, case law developments, and legal policies. The second goal of the Handbook is to provide some ideas about future directions of antitrust scholarship and policy. Antitrust economics has evolved over the last 60 years. It has both shaped policy and been shaped by policy. The Oxford Handbook of International Antitrust Economics will serve as a policy and research guide of next steps to consider when shaping the future of the field of antitrust.

## **International Antitrust Law & Policy: Fordham Corporate Law 1995**

This volume contains articles and panel discussions delivered during the Forty-first Annual Fordham Competition Law Institute Conference on International Antitrust Law & Policy. About the Proceedings: Every October the Fordham Competition Law Institute brings together leading figures from governmental organizations, leading international law firms and corporations and academia to examine and analyze the most important issues in international antitrust and trade policy of the United States, the EU and the world. This work is the most definitive and comprehensive annual analysis of international antitrust law and policy available anywhere. The chapters are revised and updated before publication, where necessary. As a result, the reader receives up-to-date practical tips and important analyses of difficult policy issues. The annual volumes are an indispensable guide through the sea of international antitrust law. The Fordham Competition Law Proceedings are acknowledged as simply the most definitive US/EC annual analyses of antitrust/competition law published. Each annual edition sets out to explore and analyze the areas of antitrust/competition law that have had the most impact in that year. Recent "hot topics" include antitrust enforcement in Asia, Latin America: competition enforcement in the areas of telecommunications, media and information technology. All of the chapters raise questions of policy or discuss new developments and assess their significance and impact on antitrust and trade policy.

Liner conferences are among the oldest surviving cartels in the world. Created in the 1870s they have existed since on all the world's shipping routes. With the approval or tacit acquiescence of governments everywhere, they fix freight rates, control capacity and share markets. The United Nations Code of Conduct for Liner Conferences (1974) granted them global recognition and prompted the European Community to recommend Member States to join the Convention on the Liner Code (1979) and to grant them the most generous and extraordinary block exemption from EC antitrust rules ever (1986). The European Commission's administration of the block exemption has clarified some of its aspects and, to a certain extent, limited its scope; but until very recently, it has not questioned the appropriateness of the exceptionally lenient treatment of liner shipping cartels in the European Union. After a report by the OECD Secretariat (2002) recommending abolition of

antitrust immunity for shipping cartels in member countries, the European Commission launched a review of the block exemption (2003) which has led to its repeal (2006). This book studies first the origins, the early history and the regulation of liner conferences in the world and in the European Community, focusing in particular on the Regulation which granted a block exemption to liner conferences. Then, it examines one by one the four conditions for a block exemption to be granted under EC law, and concludes that none of them is fulfilled by shipping cartels. Finally, it proposes some alternative scenarios and solutions for the adequate enforcement of antitrust law in the maritime sector once the block exemption has been repealed.

### **Annual Proceedings of the Fordham Corporate Law Institute**

This volume features the complete text of the material presented at the Twenty-Third Annual Conference of the Cognitive Science Society. As in previous years, the symposium included an interesting mixture of papers on many topics from researchers with diverse backgrounds and different goals, presenting a multifaceted view of cognitive science. This volume includes all papers, posters, and summaries of symposia presented at the leading conference that brings cognitive scientists together. The 2001 Cognitive Science meeting dealt with issues of representing and modeling cognitive processes, as they appeal to scholars in all subdisciplines that comprise cognitive science: psychology, computer science, neuroscience, linguistics, and philosophy.

### **Annual Proceedings of the Fordham Corporate Law Institute**

This volume contains articles and panel discussions delivered during the Thirty-eight Annual Fordham Competition Law Institute Conference on International Antitrust Law & Policy.

## **International Antitrust Law & Policy**

The year 2000's most significant international event was, almost certainly, neither political nor military, but scientific - the announcement, in June, that the human genome had been almost totally decoded. Future generations may well see this as a major turning point, opening the way to radical changes in diagnosis, prognosis, and medical treatment. Often compared with the space programme, this vast enterprise still generates misgivings: this new power, which human beings now have, to modify the genetic heritage of living creatures raises fundamentally new ethical questions - and society as a whole will have to find the answers. In fact, the accelerating pace of scientific and technical progress seems to be reviving atavistic anxieties, some rational, others less so. Recent public-health crises, including the mad cow disease' scare, which lasted into 2000, have fuelled these fears. The public's rejection of GMOs (Genetically Modified Organisms) - verging on a crusade in some countries - tells its own story. As regards conflict, 2000 saw the

Middle East peace process grind to a halt, and the Intifada resume. In Europe, the situation in Kosovo and Chechnya, both the scenes of fighting in 1999, stayed precarious. Peace and democracy did score some successes, however, particularly in Europe: the centre-left's victory in Croatia, sweeping former President Tudjman's party off the scene, the democratic party's triumph in Bosnia, and the fall of the Milosevic regime in Serbia.

### **International Antitrust Law & Policy: Fordham Competition Law 2007**

1 Hardcover Volume. This volume includes selected chapters from the annual proceedings of the Fordham Corporate Law Institute. The general subject is the reform of EC competition law enforcement. This has been the subject of many Fordham conferences over the years. Indeed, EC Commission officials have stated that the modern reform proposals presently being considered had their roots at Fordham. The present volume includes seminal articles and critiques of the EC competition law regime as well as very recent discussions of the Commission's proposal for reform. Because much of the literature on EC competition law reform is scattered, the present volume should be useful in including in one place a broad selection of articles and roundtable discussions. The chapters cover not only institutional and jurisdictional issues like decentralization and sharing of powers between the Commission and the EC member states, but also substantive issues like the scope of Article 81 and the rule(s) of reason. These and other issues are examined from both an analytical and historical perspective which greatly facilitates understanding of the future implications of the reform measures presently being debated. In sum, the chapters are not merely of historical interest: problems and questions of ongoing importance are discussed.

### **International Antitrust Law & Policy: Fordham Competition Law 2009**

This volume contains articles and panel discussions delivered during the Thirty-Ninth Annual Fordham Competition Law Institute Conference on International

Antitrust Law & Policy. About the Proceedings: Every October the Fordham Competition Law Institute brings together leading figures from governmental organizations, leading international law firms and corporations and academia to examine and analyze the most important issues in international antitrust and trade policy of the United States, the EU and the world. ### **International Antitrust Litigation**

### **Annual Proceedings of the Fordham Corporate Law Institute**

This book is a second, revised edition of the original 1986 publication. Since then, the issue of contract change has increasingly challenged the business community and legal practitioners. The world-wide recession may well have accelerated the need to secure contractual relationships by reasonable flexibility. Successful foreign investment, a relentless challenge, is subject to many unpredictable errors. Of all these variables, however, successful investment is most dependent on the investor-host country relationship, which is the object of the present study. In particular, the pressure by host countries for contract change and its counterpart: the investor's defence of contract stability. The book is essentially a reference handbook for legal practitioners. It analyzes a variety of increasingly important questions concerning international investment agreements that come under pressure for change by one of the contracting parties: either a transnational corporation or a host country government. The seven case studies and the analytical chapters which follow are based on the author's research and the assistance of corporate and government officials, experts from the United Nations

and other organizations, and members of academic research institutes.

## **International Antitrust Law & Policy: Fordham Corporate Law 2004**

This volume contains articles and panel discussions delivered during the Thirty-Ninth Annual Fordham Competition Law Institute Conference on International Antitrust Law & Policy. About the Proceedings: Every October the Fordham Competition Law Institute brings together leading figures from governmental organizations, leading international law firms and corporations and academia to examine and analyze the most important issues in international antitrust and trade policy of the United States, the EU and the world. This work is the most definitive and comprehensive annual analysis of international antitrust law and policy available anywhere. ## **The Optimal Enforcement of EC Antitrust Law:A Study in Law and Economics**

## **Necrological Reports and Annual Proceedings of the Alumni Association of Princeton Theological Seminary**

Every October the Fordham Corporate Law Institute brings together leading figures from governmental organizations, leading international law firms and corporations and academia to examine and analyze the most important issues in international antitrust and trade policy of the United States, the EU and the world. This work is the most definitive and comprehensive annual analysis of international antitrust law and policy available anywhere. Each annual edition sets out to explore and analyze the areas of antitrust/competition law that have had the most impact in that year. Recent "hot topics" include antitrust enforcement in Asia, Latin America: competition enforcement in the areas of telecommunications, media and information technology. None of the chapters are merely descriptive, all raise questions of policy or discuss new developments and assess their significance and impact on antitrust and trade policy. All chapters, if necessary, are revised and updated before publication. As a result, the reader receives up-to-date practical tips and important analyses of difficult policy issues. The Annuals are an indispensable guide through the sea of international antitrust law. The Fordham Corporate Law Proceedings are acknowledged as simply the most definitive US/EC

annual analyses of antitrust/competition law.

## **Annual Proceedings of the Fordham Corporate Law Institute**

This book examines the treatment of joint ventures (JVs) in EU Competition Law, and at the same time provides a comparison with US law. It starts with an analysis of the rather elusive concept of JV, encompassing both concentrative JVs (subject to merger control) and non-concentrative JVs. Although focused on possible definitions of joint ventures in terms of competition law, it also includes a broader perspective (going beyond competition law) on the different legal models of structuring cooperation links between undertakings. At the core of the book is an attempt to build an analytical model for the assessment of JVs in terms of antitrust law, especially as regards Article 101 of the TFEU. The analytical model used proposes a set of sequential analytical levels, taking into account structural factors and specific factors related to the main constituent elements of the functional programmes of JVs. The model is applied to a substantive assessment of four main types of JVs identified on the basis of their prevailing economic function: research and development JVs; production JVs; commercialization JVs; and purchasing JVs. Also covered are particular situations of joint ownership of undertakings falling short of joint control. In the concluding part of the book recent developments in JV antitrust law are put into context within the wider reform of EU Competition Law. The book is also comprehensively updated with the latest developments concerning the reform of the EU framework of horizontal cooperation between undertakings that took place at the end of 2010.

## **Shipping Conferences under EC Antitrust Law**

This text provides clear answers to the major questions concerning the modernization of EC antitrust enforcement such as: should a notification system be maintained, or should the antitrust rules be enforced exclusively through deterrence?; and at what levels should fines be set?

## **Annual Proceedings of the Fordham Competition Law Institute**

Every October the Fordham Competition Law Institute brings together leading figures from governmental organizations, leading international law firms and corporations and academia to examine and analyze the most important issues in international antitrust and trade policy of the United States, the EU and the world. ### **The Outer Limits of European Union Law**

A commonly expressed view is that the citizens and the Member States are destined to be overcome by the European Union. There is a sense that the Union of today is not what was intended to be created or acceded to by the Member States or its citizens. The Outer Limits of European Union Law brings together a diverse group of legal scholars to consider aspects of EU substantive, constitutional and procedural law in a manner highlighting the many senses in which the European Union is or can be limited and so demonstrating that the fear of being overcome is largely a false fear. By exploring the mechanisms and devices used to limit the European Union, the contributors also reveal not only the strengths of the various limits, but also and more crucially the weakness of the limits, thereby demonstrating that the prospect of being overcome may be a genuine risk to be guarded against. By considering general themes (eg legitimacy) and core subject areas (eg policing, free movement of goods, remedies) the book reveals the various techniques used by the Court of Justice, Community institutions and Member States to define and modify the outer limits of the European Union and European Union Law.
