The Regent's Rapture

Sugar chains (glycans) are often attached to proteins and lipids and have multiple roles in the organization and function of all organisms. "Essentials of Glycobiology" describes their biogenesis and function and offers a useful gateway to the understanding of glycans.

Racial Indigestion

Reviews the history of the Mexican American border region and examines the relationships that link one side with the other.

The Probate

From one of our most distinguished historians, a new examination of the vitally important years of Emancipation and Reconstruction during and immediately following the Civil War—a necessary reconsideration that emphasizes the era's political and cultural meaning for today's America. In *Forever Free*, Eric Foner overturns numerous assumptions growing out of the traditional understanding of the period, which is based almost exclusively on white sources and shaped by (often unconscious) racism. He presents the period as a time of determination, especially on the part of recently emancipated black Americans, to put into effect the principles of equal rights and citizenship for all. Drawing on a wide range of long-neglected documents, he places a new emphasis on the centrality of the black experience to an understanding of the era. We see African Americans as active agents in overthrowing slavery, in helping win the Civil War, and—even more actively—in shaping Reconstruction and creating a legacy long obscured and misunderstood. Foner makes clear how, by war's end, freed slaves in the South

built on networks of church and family in order to exercise their right of suffrage as well as gain access to education, land, and employment. He shows us that the birth of the Ku Klux Klan and renewed acts of racial violence were retaliation for the progress made by blacks soon after the war. He refutes lingering misconceptions about Reconstruction, including the attribution of its ills to corrupt African American politicians and “carpetbaggers,” and connects it to the movements for civil rights and racial justice. Joshua Brown’s illustrated commentary on the era’s graphic art and photographs complements the narrative. He offers a unique portrait of how Americans envisioned their world and time. *Forever Free* is an essential contribution to our understanding of the events that fundamentally reshaped American life after the Civil War—a persuasive reading of history that transforms our sense of the era from a time of failure and despair to a threshold of hope and achievement.

An Indigenous Peoples' History of the United States

2015 Recipient of the American Book Award The first history of the United States told from the perspective of indigenous peoples Today in the United States, there are more than five hundred federally recognized Indigenous nations comprising nearly three million people, descendants of the fifteen million Native people who once inhabited this land. The centuries-long genocidal program of the US settler-colonial regimen has largely been omitted from history. Now, for the first time, acclaimed historian and activist Roxanne Dunbar-Ortiz offers a history of the United States told from the perspective of Indigenous peoples and reveals how Native Americans, for centuries, actively resisted expansion of the US empire. In *An Indigenous Peoples' History of the United States*, Dunbar-Ortiz adroitly challenges the founding myth of the United States and shows how policy against the Indigenous peoples was colonialist and designed to seize the territories of the original inhabitants, displacing or eliminating them. And as Dunbar-Ortiz reveals, this policy was praised in popular culture, through writers like James Fenimore Cooper and Walt Whitman, and in the highest offices of government and the military. Shockingly, as the genocidal policy reached its zenith under President Andrew Jackson, its ruthlessness was best articulated by US Army general Thomas S. Jesup, who, in 1836, wrote of the Seminoles: “The country can be rid of them only by exterminating them.” Spanning more than four hundred years, this classic bottom-up peoples’ history radically reframes US history and explodes the silences that have haunted our national narrative.

The Communist Manifesto and Das Kapital

The unabridged versions of these definitive works are now available together as a highly designed paperback with flaps with a new introduction by Robert Weick. Part of the Knickerbocker Classics series, a modern design makes this timeless book a perfect travel companion. Considered to be one of the most influential political writings, *The Communist Manifesto* is as relevant today as when it was originally published. This pamphlet by the German philosophers Karl Marx and Friedrich

Engels, published in 1884 as revolutions were erupting across Europe, discusses class struggles and the problems of a capitalist society. After being exiled to London, Marx published the first part of *Das Kapital*, a theoretical text that argues that capitalism will create greater and greater division in wealth and welfare and ultimately be replaced by a system of common ownership of the means of production. After Marx's death, Engels completed and published the second and third parts from his colleague's notes. The Knickerbocker Classics bring together the essential works of classic authors from around the world in stunning editions to be collected and enjoyed.

Washington's Farewell Address to the People of the United States, 1796

The *Jungle* portrays the harsh conditions and exploited lives of immigrants in the United States in Chicago and similar industrialized cities. The book depicts working-class poverty, the lack of social supports, harsh and unpleasant living and working conditions, and a hopelessness among many workers. The primary purpose of the novel in describing the meat industry and its working conditions was to advance socialism in the United States. The main character in the book, Jurgis Rudkus, a Lithuanian immigrant, tries to make ends meet in Chicago. The book begins with his wife Ona and his wedding feast. He and his family live near the stockyards and meatpacking district where many immigrants, who do not know much English, work. He takes a job at Brown's slaughterhouse. Jurgis had thought the US would offer more freedom, but he finds working-conditions harsh. He and his young wife struggle to survive as they fall deeply into debt and become prey to con men. Hoping to buy a house, they exhaust their savings on the down payment for a substandard slum house, which they cannot afford. The family is eventually evicted after their money is taken.

Suffrage, Politics & Other Conquests Rural counties such as Schoharie were not hotbeds for women's rights but although quieter, they still made their mark in the overall quest for suffrage. This book portrays women, with roots in Schoharie County, who fought for their right to vote or were first to enter previously male dominated fields. On November 6, 1917 the men of New York State voted to give women full suffrage. Schoharie County voted the amendment down in but the majority of the State voted the measure into law. On August 18, 1920 the 19th Amendment became part of the Constitution giving women the right to vote in every state of the union. This book includes 154 biographies and pictures of Schoharie County women who engaged in areas commonly coordinated by men from the mid 1800's through the 1980's. Of the 154 women; 129 were married, 25 were spinsters, 60 had children, 30 acquired a higher education, 42 had occupations outside of the home, 41 were married to professionals (doctors, lawyers, merchants etc.), 65 listed affiliations with the democrat party, 21 as republicans, 4 were divorced and 3 left their husbands. Some of the key players in the Schoharie County suffrage movement, in alphabetical order, were: Carrie

(Winters) Albro of Middleburgh, Huldah (Akeley) Bice from Fulton/Cobleskill, Miss Dora Cohn of Cobleskill, Eleanor (Manning) Frisbie and Miss Cornelia M. Frisbie (mother daughter) of Middleburgh, Grace (Nichols) Gockley of Jefferson, Minnie (Dutcher) Humphrey of Cobleskill, Miss Mary Elizabeth Hutt of Cobleskill, Lavilla (VanDeusen) Jones of Jefferson/Cobleskill, Mary (Wright) Jump of Summit, Jessie (VanSchaick) Norton of Cobleskill, Aneta (Marsh) Proper of Schoharie, Flora (Chapman) Schaeffer of Blenheim, Eleanor (Sperry) Taylor of Schoharie, Marion (Craig) Trainor/Lienau of Sharon, Annice (Maynard) Veley of Jefferson/Blenheim and Ernestine (Billings) Williams of Gilboa.

Musical talent in Western culture is regarded as an extraordinary combination of technical proficiency and interpretative sensitivity. In *Music, Disability, and Society*, Alex Lubet challenges the rigid view of technical skill and writes about music in relation to disability studies. He addresses the ways in which people with disabilities are denied the opportunity to participate in music. Elaborating on the theory of "social confluence," Lubet provides a variety of encounters between disability and music to observe radical transformations of identity. Considering hand-injured and one-handed pianists; the impairments of jazz luminaries Django Reinhardt, Horace Parlan, and "Little" Jimmy Scott; and the "Blind Orchestra" of Cairo, he shows how the cultural world of classical music contrasts sharply with that of jazz and how musicality itself is regarded a disability in some religious contexts. *Music, Disability, and Society* also explains how language difference can become a disability for Asian students in American schools of music, limiting their education and careers. Lubet offers pungent criticism of the biases in music education and the music profession, going so far as to say that culture disables some performers by adhering to rigid notions of what a musician must look like, how music must be played, who may play it, and what (if any) is the legitimate place of music in society. In *Music, Disability, and Society*, he convincingly argues that where music is concerned, disability is a matter of culture, not physical impairment.

On May 4, 1919, thousands of students protested the Versailles treaty in Beijing. Seventy years later, another generation demonstrated in Tiananmen Square. Climbing the Monument of the People's Heroes, these protestors stood against a relief of their predecessors, merging with their own mythology while consciously deploying their activism. Through an investigation of twentieth-century Chinese student protest, Fabio Lanza considers the marriage of the cultural and the political, the intellectual and the quotidian, that occurred during the May Fourth movement, along with its rearticulation in subsequent protest. He ultimately explores the political category of the "student" and its making in the twentieth

century. Lanza returns to the May Fourth period (1917-1923) and the rise of student activism in and around Beijing University. He revisits reform in pedagogical and learning routines, changes in daily campus life, the fluid relationship between the city and its residents, and the actions of allegedly cultural student organizations. Through a careful analysis of everyday life and urban space, Lanza radically reconceptualizes the emergence of political subjectivities (categories such as "worker," "activist," and "student") and how they anchor and inform political action. He accounts for the elements that drew students to Tiananmen and the formation of the student as an enduring political category. His research underscores how, during a time of crisis, the lived realities of university and student became unsettled in Beijing, and how political militancy in China arose only when the boundaries of identification were challenged.

An insightful exploration of the iconic Galápagos tortoises, and how their fate is inextricably linked to our own in a rapidly changing world The Galápagos archipelago is often viewed as a last foothold of pristine nature. For sixty years, conservationists have worked to restore this evolutionary Eden after centuries of exploitation at the hands of pirates, whalers, and island settlers. This book tells the story of the islands' namesakes—the giant tortoises—as coveted food sources, objects of natural history, and famous icons of conservation and tourism. By doing so, it brings into stark relief the paradoxical, and impossible, goal of conserving species by trying to restore a past state of prehistoric evolution. The tortoises, Elizabeth Hennessy demonstrates, are not prehistoric, but rather microcosms whose stories show how deeply human and nonhuman life are entangled. In a world where evolution is thoroughly shaped by global history, Hennessy puts forward a vision for conservation based on reckoning with the past, rather than trying to erase it.

In *All the Laws but One*, William H. Rehnquist, Chief Justice of the United States, provides an insightful and fascinating account of the history of civil liberties during wartime and illuminates the cases where presidents have suspended the law in the name of national security. Abraham Lincoln, champion of freedom and the rights of man, suspended the writ of habeas corpus early in the Civil War--later in the war he also imposed limits upon freedom of speech and the press and demanded that political criminals be tried in military courts. During World War II, the government forced 100,000 U.S. residents of Japanese descent, including many citizens, into detainment camps. Through these and other incidents Chief Justice Rehnquist brilliantly probes the issues at stake in the balance between the national interest and personal freedoms. With *All the Laws but One* he significantly enlarges our understanding of how the Supreme Court has interpreted the Constitution during

past periods of national crisis--and draws guidelines for how it should do so in the future.

This is the first and only study of the PIAB. As foreign policy veterans, the authors trace the board's history from Eisenhower through Obama and evaluate its effectiveness under each president. Created to be an independent panel of nonpartisan experts, the PIAB has become increasingly susceptible to politics in recent years and has lost some of its influence. The authors clearly demonstrate the board's potential to offer a unique and valuable perspective on intelligence issues and not only illuminates a little-known element of U.S. intelligence operations but also offers suggestions for enhancing a critical executive function.

The War On Our Freedoms

A searing novel of social realism, Upton Sinclair's *The Jungle* follows the fortunes of Jurgis Rudkus, an immigrant who finds in the stockyards of turn-of-the-century Chicago a ruthless system that degrades and impoverishes him, and an industry whose filthy practices contaminate the meat it processes. From the stench of the killing-beds to the horrors of the fertilizer-works, the appalling conditions in which Jurgis works are described in intense detail by an author bent on social reform. So powerful was the book's message that it caught the eye of President Theodore Roosevelt and led to changes to the food hygiene laws. In his Introduction to this new edition, Russ Castronovo highlights the aesthetic concerns that were central to Sinclair's aspirations, examining the relationship between history and historical fiction, and between the documentary impulse and literary narrative. As he examines the book's disputed status as novel (it is propaganda or literature?), he reveals why Sinclair's message-driven fiction has relevance to literary and historical matters today, now more than a hundred years after the novel first appeared in print.

The Afrocentric Praxis of Teaching for Freedom explains and illustrates how an African worldview, as a platform for culture-based teaching and learning, helps

educators to retrieve African heritage and cultural knowledge which have been historically discounted and decoupled from teaching and learning. The book has three objectives: To exemplify how each of the emancipatory pedagogies it delineates and demonstrates is supported by African worldview concepts and parallel knowledge, general understandings, values, and claims that are produced by that worldview To make African Diasporan cultural connections visible in the curriculum through numerous examples of cultural continuities--seen in the actions of Diasporan groups and individuals--that consistently exhibit an African worldview or cultural framework To provide teachers with content drawn from Africa's legacy to humanity as a model for locating all students--and the cultures and groups they represent--as subjects in the curriculum and pedagogy of schooling This book expands the Afrocentric praxis presented in the authors' "Remembering" History in Teacher and Student Learning by combining "re-membered" (democratized) historical content with emancipatory pedagogies that are connected to an African cultural platform.

The Shame of the Cities

Organized in the immediate aftermath of World War II to try the former Nazi leaders for war crimes, the Nuremberg trials, known as the International Military Tribunal (IMT), paved the way for global conversations about genocide, justice, and human rights that continue to this day. As Francine Hirsch reveals in this immersive new history of the trials, a central piece of the story has been routinely omitted from standard accounts: the critical role that the Soviet Union played in making Nuremberg happen in the first place. Hirsch's book reveals how the Soviets shaped the trials--only to be written out of their story as Western allies became bitter Cold War rivals. *Soviet Judgment at Nuremberg* offers the first full picture of the war trials, illuminating the many ironies brought to bear as the Soviets did their part to bring the Nazis to justice. Everyone knew that Stalin had originally allied with Hitler before the Nazi invasion of the Soviet Union. The Molotov-Ribbentrop Pact of 1939 hung heavy over the courtroom, as did the suspicion among the Western prosecutors and judges that the Soviets had falsified evidence in an attempt to pin one of their own war crimes, the Katyn massacre of Polish officers, on the Nazis. It did not help that key members of the Soviet delegation, including the Soviet judge and chief prosecutor, had played critical roles in Stalin's infamous show trials of the 1930s. For the lead American prosecutor Robert H. Jackson and his colleagues, Soviet participation in the Nuremberg Trials undermined their overall credibility and possibly even the moral righteousness of the Allied victory. Yet Soviet jurists had been the first to conceive of a legal framework that treated war as an international crime. Without it, the IMT would have had no basis for judgment. The Soviets had borne the brunt of the fighting against Germany--enduring the horrors of the Nazi occupation and experiencing almost unimaginable human losses and devastation. There would be no denying their place on the tribunal, nor their determination to make the most of it. Once the trials were set in motion, however, little went as the Soviets had planned. *Soviet Judgment at Nuremberg* shows how Stalin's efforts to direct the Soviet delegation and to steer the trials from afar backfired, and how Soviet war crimes became exposed in open court. Hirsch's book offers readers both a front-row seat in the courtroom and a behind-the-scenes look at the meetings in which the prosecutors shared secrets and forged alliances. It reveals the shifting relationships among the

four countries of the prosecution (the U.S., Great Britain, France, and the USSR), uncovering how and why the Palace of Justice in Nuremberg became a Cold War battleground. In the process Soviet Judgment at Nuremberg offers a new understanding of the trials and a fresh perspective on the post-war movement for human rights.

Drawing on Tradition

This is a study of the central role of history in late-nineteenth century American legal thought. In the decades following the Civil War, the founding generation of professional legal scholars in the United States drew from the evolutionary social thought that pervaded Western intellectual life on both sides of the Atlantic. Their historical analysis of law as an inductive science rejected deductive theories and supported moderate legal reform, conclusions that challenge conventional accounts of legal formalism Unprecedented in its coverage and its innovative conclusions about major American legal thinkers from the Civil War to the present, the book combines transatlantic intellectual history, legal history, the history of

legal thought, historiography, jurisprudence, constitutional theory, and the history of higher education.

The act of eating is both erotic and violent, as one wholly consumes the object being eaten. At the same time, eating performs a kind of vulnerability to the world, revealing a fundamental interdependence between the eater and that which exists outside her body. Racial Indigestion explores the links between food, visual and literary culture in the nineteenth-century United States to reveal how eating produces political subjects by justifying the social discourses that create bodily meaning. Combing through a visually stunning and rare archive of children's literature, architectural history, domestic manuals, dietetic tracts, novels and advertising, Racial Indigestion tells the story of the consolidation of nationalist

mythologies of whiteness via the erotic politics of consumption. Less a history of commodities than a history of eating itself, the book seeks to understand how eating became a political act, linked to appetite, vice, virtue, race and class inequality and, finally, the queer pleasures and pitfalls of a burgeoning commodity culture. In so doing, *Racial Indigestion* sheds light on contemporary "foodie" culture's vexed relationship to nativism, nationalism and race privilege.

Taking a hard look at the unprincipled lives of political bosses, police corruption, graft payments, and other political abuses of the time, the book set the style for future investigative reporting.

Can love find you, even when you're in disguise? Jamie Cohen was used to quitting things, but she refused to give up the search for her sister, Sylvie, who had crash landed on an alien world six month ago and hadn't been heard from since. Unfortunately, having a fiance in NASA wasn't much help either. Things changed when a handsome Good Samaritan saved her from a stranger's unwanted advances. Although she thought he'd just been in the right place at the right time, when she sees him again she realizes the truth: He'd been following her. Drak'Karren Rasveen, Minister of Defense to the planet Zanthar and brother of its king, took his mission to Earth disguised as a human very seriously. Here he hoped to uncover an enemy conspiracy that was threatening the lives of his people. Instead he found Jamie, a frivolous but beautiful human with a taste for expensive clothes and successful men. Still, she is his best chance to infiltrate NASA and find the data he needs. Now, if he could only keep his hands off her. Together, the pair will battle shapeshifting enemies and risk imprisonment on an alien world. But the real test of their mettle comes when Drake is forced to reveal his true form, a 7-foot tall, muscular alien creature with color-changing skin and an endowment that would put human men to shame. Can Jamie trust the fate of her sister to someone who has lied to her repeatedly? Is Drake willing to break the taboo of mating outside his race and risk the censure of his people? And will they be able to escape the alien prison with their relationship intact? Or even with their lives? Don't miss the final chapter in the Zanthar saga!

Soviet Judgment at Nuremberg

“What an exciting, inspiring, and wonderfully-written book this is. Each page has lessons for today, and it is also a thrilling narrative to read.”—Walter Isaacson, #1 New York Times Bestselling Author of *Steve Jobs* The masterfully told story of the unlikely men who came together to make the Berlin Airlift one of the great military and humanitarian successes of American history. On the sixtieth anniversary of the Berlin Airlift, Andrei Cherny tells a remarkable story with profound implications for the world today. In the tradition of the best narrative storytellers, he brings together newly unclassified documents, unpublished letters and diaries, and fresh primary interviews to tell the story of the ill-assorted group of castoffs and second-stringers who not only saved millions of desperate people from a dire threat but changed how the world viewed the United States, and set in motion the chain of events that would ultimately lead to the dismantling of the Berlin Wall and to America's victory in the Cold War. On June 24, 1948, intent on furthering its domination of Europe, the Soviet Union cut off all access to West Berlin, prepared to starve the city into submission unless the Americans abandoned it. Soviet forces hugely outnumbered the Allies', and most of America's top officials considered the situation hopeless. But not all of them. Harry Truman, an accidental president, derided by his own party; Lucius Clay, a frustrated general, denied a combat command and relegated to the home front; Bill Tunner, a logistics expert downsized to a desk job in a corner of the Pentagon; James Forrestal, a secretary of defense beginning to mentally unravel; Hal Halvorsen, a lovesick pilot who had served far from the conflict, flying transport missions in the backwater of a global war—together these unlikely men improvised and stumbled their way into a uniquely American combination of military and moral force unprecedented in its time. This is the forgotten foundation tale of America in the modern world, the

story of when Americans learned, for the first time, how to act at the summit of world power—a masterful and exciting work of historical narrative, and one with strong resonance for our time.

1780-1980 the Bicentennial Book of the Schoharie and Mohawk Valley Raids

Manga and anime (illustrated serial novels and animated films) are highly influential Japanese entertainment media that boast tremendous domestic consumption as well as worldwide distribution and an international audience. *Drawing on Tradition* examines religious aspects of the culture of manga and anime production and consumption through a methodological synthesis of narrative and visual analysis, history, and ethnography. Rather than merely describing the incidence of religions such as Buddhism or Shinto in these media, Jolyon Baraka Thomas shows that authors and audiences create and re-create “religious frames of mind” through their imaginative and ritualized interactions with illustrated worlds. Manga and anime therefore not only contribute to familiarity with traditional religious doctrines and imagery, but also allow authors, directors, and audiences to modify and elaborate upon such traditional tropes, sometimes creating hitherto unforeseen religious ideas and practices. The book takes play seriously by highlighting these recursive relationships between recreation and religion, emphasizing throughout the double sense of play as entertainment and play as adulteration (i.e., the whimsical or parodic representation of religious figures, doctrines, and imagery). Building on recent developments in academic studies of manga and anime—as well as on recent advances in the study of religion as related to art and film—Thomas demonstrates that the specific aesthetic qualities and industrial dispositions of manga and anime invite practices of rendition and reception that can and do influence the ways that religious institutions and lay authors have attempted to captivate new audiences. *Drawing on Tradition* will appeal to both the dilettante and the specialist: Fans and self-professed otaku will find an engaging academic perspective on often overlooked facets of the media and culture of manga and anime, while scholars and students of religion will discover a fresh approach to the complicated relationships between religion and visual media, religion and quotidian practice, and the putative differences between “traditional” and “new” religions.

Extraordinary Measures

Approaching disability as a cultural construction rather than a medical pathology, this book studies the impact of disability and concepts of disability on composers, performers, and listeners with disabilities, as well as on discourse about music and works of music themselves. For composers with disabilities--like Beethoven, Delius, and Schumann--awareness of the disability sharply inflects critical reception. For performers with disabilities--such as Itzhak Perlman and Evelyn Glennie--the performance of disability and the performance of music are deeply intertwined. For listeners with disabilities, extraordinary bodies and minds may give rise to new ways of making sense of music. In the stories that people tell about music, and in the stories that music itself tells, disability has long played a central but unrecognized role. Some of these stories are narratives of overcoming--the triumph

of the human spirit over adversity-but others are more nuanced tales of accommodation and acceptance of life with a non-normative body or mind. In all of these ways, music both reflects and constructs disability.
