How did the Romantic era hear the music of Mozart, Beethoven, Schubert, or Berlioz? What did it make of the Eroica, the Fantastic Symphony, or the eerie song *Der Doppelgänger*? From many different vantage points this volume addresses this fascinating question. A group of writers, all historians of music theory, conducts a dazzling exploration of the way in which the Romantic era thought about music. They bring to bear on their topic issues from politics, gender, metaphor, intersubjectivity, cognition, and many other realms.

Learning Music Theory with Logic, Max, and Finale

Music Theory and Composition: A Practical Approach presents a pragmatic, accessible approach to music theory through an emphasis on melody and counterpoint. This focus explains the “why” of musical construction more clearly than the traditional approach of beginning with chords. By starting with a single melodic line and gradually adding voices in counterpoint, the book drills part-writing while simultaneously explaining functionality, first with scale degrees and then with harmony. The text has students learn musical techniques and progressively build on their functions and importance to create their own compositions. With short, digestible chapters, Music Theory and Composition clearly presents otherwise complicated ideas not as strict rules, but as artistic ideals, encouraging the interactive creation of new compositions as a tool for learning. The textbook is versatile and easily customizable, suiting Different skill levels with species counterpoint providing a framework for the beginner while providing an interesting challenge for more experienced students Different curricular schedules with complete exercises in two, three, and four voices, allowing for an optional skip from two voices to four Different pedagogical approaches with species exercises encouraging students to consider harmonic choices and figured bass ensuring functional progressions Instructor Resources: Instructor’s Manual: The Instructor’s

music-printing program Finale—this book shows how they can be used together to learn music theory. It provides an introduction to core music theory concepts and shows how to develop programming skills alongside music theory skills. Software tools form an essential part of the modern musical environment; laptop musicians today can harness incredibly powerful tools to create, record, and manipulate sounds. Yet these programs on their own don't provide musicians with an understanding of music notation and structures, while traditional music theory teaching doesn't fully engage with technological capabilities. With clear and practical applications, this book demonstrates how to use DAWs, APLs, and music-printing programs to create interactive resources for learning the mechanics behind how music works. Offering an innovative approach to the learning and teaching of music theory in the context of diverse musical genres, this volume provides game-changing ideas for educators, practicing musicians, and students of music. disciplines. Encounters with structuralist and post-structuralist critical theory, and with linguistics and cognitive sciences, have brought the theory and analysis of music into the orbit of important developments in intellectual history. This book presents the work of a group of scholars who, without seeking to impose an explicit redefinition of either theory or analysis, explore the limits of both in this context. Essays on the languages of analysis and theory, and on practical issues such as decidability, ambiguity and metaphor, combine with studies of works by Debussy, Schoenberg, Birtwistle and Boulez, together making a major contribution to an important debate in the growth of musicology.

of music theory active today. Published over the span of the past 25 years, the selected articles provide a historical conspectus about a range of vital topics in the history of music theory, focusing in particular upon writings from the seventeenth and eighteenth centuries. Christensen examines a variety of theorists and their arguments within the intellectual and musical contexts of their time, in the process highlighting the diverse and idiosyncratic nature of the discipline of music theory itself. In the first section of the book Christensen offers general reflections on the meaning and interpretation of historical music theories, with especial attention paid to their value for music theorists today. The second section of the book contains a number of articles that consider the catalytic role of the thorough bass in the development of harmonic theory during the seventeenth and eighteenth centuries. In the final two sections of the anthology, focus turns to the writings of several individual music theorists, including Marin Mersenne, Seth Calvisius, Johann Mattheson, Johann Nicolaus Bach, Denis Diderot and Johann Nichelmann. The volume includes essays from hard-to-find publications as well as newly-translated material and the articles are prefaced by a new, wide-ranging autobiographical essay by the author that offers a broad re-assessment of his historical project. This book is essential reading for music theorists and seventeenth- and eighteenth-century musicologists.

The Musician's Guide to Theory and Analysis

Students of music are faced with the challenge of developing their aural skills to the point at which they can see music on the page with thoughtful, trained eyes and hear it with their mind's ear. Sight Singing Complete, leads students to this point by beginning with the familiar and moving gently toward the unfamiliar until they are transforming symbol into sound and improvising in all idioms. The 8th edition of Sight Singing Complete preserves the multi-faceted pedagogical approach and the commitment to historical repertoire from the seventh edition. New to this edition is an integrated approach to rhythm and performance — This edition is unusual in that we not only expect student to master each skill by itself, we also expect them to integrate all three skills in carefully designed sequence of “Play + Sing” exercises adapted from 18th - 21st century instrumental and vocal repertoire.
