Significantly reduced list price U.S. Army Counterinsurgency and Contingency

Operations Doctrine, 1860-1941, is the first of a two-volume study on the U.S. Army's experience in "small war" situations and the development of low-intensity conflict doctrine. Focusing on the suppression of insurgent or other irregular forces during overseas constabulary and contingency operations from the Civil War years up to America's entry into World War II, Andrew J. Birtle has filled an important omission in military historiography by writing about the underlying theories, concepts, and methods employed in the conduct of myriad unconventional missions with soldiers serving as governors, constables, judges, diplomats, explorers, colonizers, educators, administrators, and engineers. Even though official, codified, written doctrine for counterinsurgency, pacification, and nation-building activities prior to World War II has long been viewed as nonexistent, Birtle uncovers through his meticulous research an evidentiary thread of continuity in the Army's performance and thus maintains that some of the central principles governing such operations were indeed incorporated into official Army doctrinal literature. The events discussed unquestionably occurred long ago, but many of the issues raised by Birtle have enduring relevance for today's Army. People, places, and events may change, yet the fundamental questions involved in suppressing insurrections, fighting irregulars, administering civilian populations, and conducting foreign intervention remain surprisingly constant in this unpredictable world of ethnic tensions and turmoil. By studying how soldiers dealt with these complex issues in the past, Birtle's well-written account offers valuable insights to guide current and future soldiers when called upon to conduct similar

operations. Military strategists, historians, and civilians interested in America's early history may find this resource appealing and offer a better understanding of Army doctrine from a historical perspective. Popular Mechanics

Psyop

For millennia, people of all cultures have decorated the surfaces of their domestic, religious, and public buildings. Earthen architecture in particular has been, and continues to be, a common ground for surface decoration such as paintings, sculpted bas-relief, and ornamental plasterwork. This volume explores the complex issues associated with preserving these surfaces. Case studies from Asia, Europe, Africa, the Middle East, and the Americas are presented. The publication is the result of a colloquium held in 2004 at Mesa Verde National Park, Colorado, co-

organized by the Getty Conservation Institute (GCI) and the National Park Service (NPS). The meeting brought together fifty-five conservators, cultural resource managers, materials scientists, engineers, architects, archaeologists, anthropologists, and artists from eleven countries. Divided into four themes--Archaeological Sites, Museum Practice, Historic Buildings, and Living Traditions--the papers examine the conservation of decorated surfaces on earthen architecture within these different contexts.

Timber Harvesting

Books on guerrilla war are seldom written from the tactical perspective and even less seldom from the guerrilla's perspective. *Fangs of the Lone Wolf: Chechen Tactics in the Russian-Chechen Wars 1994-2009* is an exception. These are the stories of low-level guerrilla combat as told by the survivors. They cover fighting from the cities of Grozny and Argun to the villages of Bamut and Serzhen-yurt, and finally the hills, river valleys and mountains that make up so much of Chechnya. The author embedded with Chechen guerrilla forces and knows the conflict, country and culture. Yet, as a Western outsider, he is able to maintain perspective and objectivity. He traveled extensively to interview Chechen former combatants now displaced, some now in hiding or on the run from Russian retribution and justice. The military professional will appreciate the book's crisp narration, organization by type of combat, accurate color maps and insightful analysis and

commentary. The civilian reader will discover the complexity of “simple guerrilla tactics” and the demands on individual perseverance and endurance that guerrilla warfare exacts. The book is organized into vignettes that provide insight on the nature of both Chechen and Russian tactics utilized during the two wars. They show the chronic problem of guerrilla logistics, the necessity of digging in fighting positions, the value of the correct use of terrain and the price paid in individual discipline and unit cohesion when guerrillas are not bound by a military code and law. Guerrilla warfare is probably as old as man, but has been overshadowed by maneuver war by modern armies and recent developments in the technology of war. As Iraq, Afghanistan, the Philippines and Chechnya demonstrate, guerrilla war is not only still viable, but is increasingly common. Fangs of the Lone Wolf provides a unique insight into what is becoming modern and future war.

The Best of Make:

In this brilliant work, the most influential philosopher since Sartre suggests that such vaunted reforms as the abolition of torture and the emergence of the modern penitentiary have merely shifted the focus of punishment from the prisoner's body to his soul.

Being Digital

PC Magazine

After two years, MAKE has become one of most celebrated new magazines to hit the newsstands, and certainly one of the hottest reads. If you're just catching on to the MAKE phenomenon and wonder what you've missed, this book contains the

best DIY projects from the magazine's first ten volumes -- a surefire collection of fun and challenging activities going back to MAKE's launch in early 2005. Find out why MAKE has attracted a passionate following of tech and DIY enthusiasts worldwide with one million web site visitors and a quarter of a million magazine readers. And why our podcasts consistently rank in the top-25 for computers and technology. With the Best of MAKE, you'll share the curiosity, zeal, and energy of Makers -- the citizen scientists, circuit benders, homemakers, students, automotive enthusiasts, roboticists, software developers, musicians, hackers, hobbyists, and crafters -- through this unique and inspiring assortment of DIY projects chosen by the magazine's editors. Learn to: Hack your gadgets and toys Program microcontrollers to sense and react to things Take flight with rockets, planes, and other projectiles Make music from the most surprising of things Find new ways to take photos and make video Outfit yourself with the coolest tools Put together by popular demand, the Best of MAKE is the perfect gift for any maker, including current subscribers who missed early volumes of the magazine. Do you or someone you know have a passion for the magic of tinkering, hacking, and creation? Do you enjoy finding imaginative and unexpected uses for the technology and materials in your life? Then get on board with the Best of MAKE!

The Bulb Horn

Tree Care Industry

With an enduring grasp of human nature, Dale Carnegie's *How to Win Friends and Influence People* teaches his readers how to handle people without letting them feel manipulated, how to make people feel important without inspiring resentment, how win people over to your point of view without causing offence, and how to make a friend out of just about anyone. Published in 1937, Carnegie's *How to Win Friends and Influence People*, was originally written as a companion book to his lectures on how to be a good salesperson. However, what began as a basic sales primer, quickly exploded into an overnight success, eventually selling more than 15 million copies worldwide, and pioneering an entire genre of self-help and personal success books. HarperTorch brings great works of non-fiction and the dramatic arts to life in digital format, upholding the highest standards in ebook production and celebrating reading in all its forms. Look for more titles in the HarperTorch collection to build your digital library.

Small Wars Manual

Sierra Hotel : flying Air Force fighters in the decade after Vietnam

Recounts the author's experiences with the reclusive Tarahumara Indians, whose techniques allow them to run long distances with ease, and describes his training for a fifty-mile race with the tribe and a number of ultramarathoners.

Born to Run

This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.
