Principled International Criminal Justice

German criminal law doctrine, as one of the more influential ones over time and on a global scale, takes rather different approaches to many of the problems of substantive law from those of the common law family of countries like the UK, the US, Canada, New Zealand, Australia etc. It also differs markedly from the system which is most often used in Anglophone writing as a civil law comparison, the French law. German criminal law is a code-based model and has been for centuries. The influence of academic writing on its development has been far greater than in the judge-oriented common law models. The book will serve as a useful aid to debates about codification efforts in countries that are mostly based on a case law system, but who wish to re-structure their law in one or several criminal codes. The comparison will show that similar problems occur in all legal systems regardless of their provenance, and the attempts of individual systems at solving them, their successes and their failures, can provide a rich experience on which other countries can draw and on which they can build. The book provides an

outline of the principles of German criminal law, mainly the so-called 'General Part' (eg actus reus, mens rea, defences, participation) and the core offence categories (homicide, offences against property, sexual offences). It sets out the principles, their development under the influence of academic writing and judicial decisions. The book is not meant as a textbook of German criminal law, but is a selection of interrelated in-depth essays on the central problems. Wherever it is apposite and feasible, comparison is offered to the approaches of English criminal law and the legal systems of other common and civil law countries in order to allow common lawyers to draw the pertinent parallels to their own jurisdictions.

International and Comparative Criminal Justice

Criminal justice has traditionally been associated with the nation state, its legitimacy and its authority. The growing internationalisation of crime control raises crucial and complex questions about the future shape of justice and urban governance as these are experienced at local, national and international realms. The emergence of new international justice institutions such as the International Criminal Court, the greater movement of people and goods across national borders and the transfer of criminal justice policies between different jurisdictions all present novel challenges to criminal justice systems as well as our understandings of criminal justice. Professor Peter Nwankwo argues based on this textbook volume I, that the world has been turned into a global village, and that we have no reason(s) to ignore the awareness of what is going on in other countries of the world. This textbook "Criminology and criminal Justice System of the world: A comparative perspective" is a unique text, not because of its title, but because it contains what will ever be needed for the undergraduate and graduate students in the field of Criminology and Criminal Justice, especially those taking a course in Comparative Criminal Justice. by researching the police, the court systems, corrections or prisons, including Juvenile Justice Systems and Crime Statistics in the following countries: United States of America, china, Saudi Arabia, Japan, The Netherlands, Bulgaria, Haiti, Botswana, Philippines, Uganda, and Israel. It is worthy to note that the United States of America had too much information, so it was necessary to split it into two chapters i.e. chapter one, and chapter two. Additionally, The Netherlands was also split into two chapters thus: Chapters 6 & 7: The overall Chapters in this Volume I are thirteen. VOLUME II Volume two of this text contains twenty four chapters and over 24 countries were researched and included as follows, and will be published in a few in a few months .The countries are: Nigeria, Norway, Northern Ireland, England and Wales, Estonia, Ethiopia, Egypt, South America, Mauritania, Jamaica, Iraq, Dominican Republic, Turkey, South Africa, Russia, Kenya, Romania, Congo, Germany, France, Cameroon, Ghana and Denmark. No matter the adversities of the readers and purchasers, I do strongly advice that you order these two volumes together, when the later would be available on the internet or through the publishers.

Global Perspectives on Crime Prevention and Community Resilience

This book aims to meet the need for an accessible introductory text on comparative criminal justice, examining the ways different countries and jurisdictions deal with the main stages and elements in the criminal justice process, from policing through to sentencing. Examples are taken from all over the world, with a particular focus on Europe, the UK, the United States and Australasia. The main aims of the book are to provide the reader with: a comparative perspective on criminal justice and its main components an understanding of the increasing globalization of justice and standards of the administration of justice a knowledge of methodology for comparative research and analysis an understanding of the most important concepts in criminal justice (such as inquisitorial and adversarial trial systems, policing styles, crime control versus due process, retribution versus rehabilitation etc) discussion of global trends such as

This fully updated and expanded new edition of Comparative Criminal Justice takes into account the considerable advances in comparative criminal justice research since the first edition in 2004. Each chapter has been thoroughly updated and in addition, there is a new chapter on establishing the rate of crime in a comparative context. The rate of development in international policing and international development has been such that there is now an individual chapter devoted to each; and throughout the book, the role of globalization, changing both the local and the global in criminal justice arrangements, orientations and discourses, has now been given the prominence it deserves.

the roles of criminal justice actors and ways of handling crime problems. The book includes in-depth discussions of such key issues as how we can learn from other jurisdictions, compare 'like with like', and balance explanation with understanding – for example, in making sense of national differences in prison rates. Careful attention is given to the question of how far globalisation challenges traditional ways of comparing units. The book also offers a number of helpful tips on methodology, showing why method and substance cannot and should not be separated when it comes to understanding other people's systems of justice. Students and academics in criminology and criminal justice will find this book an invaluable resource. Comparative Policing

There is extensive and detailed academic literature on the legal development of international crimes such as war crimes and crime against humanity. However, not much attention has been paid to other serious crimes, including narcotics-related offences, human trafficking and money laundering, which do not necessarily amount to international crimes in the traditional sense. The purpose of this monograph is to fill this gap and offer a critical analysis of developments in the field of transnational organised crime under international law. The book is divided into two parts. Part I is entitled "Norms, Principles, and Concepts." It traces the history of organised crime and explores key concepts and norms relating to the practice from a multi-disciplinary perspective. It then looks at legal obligations imposed upon States as well as non-State actors in relation to transnational organised crime. Part II illustrates how these norms, principles and obligations are translated and enforced in practice. This will be done through case studies at the level of national law (Thailand, Serbia and the UK), regional law (European Union) and international law (United Nations). "A book of many parts, its thematic coherence comes from its devotion to identifying the social threat posed by organised crime and the legal steps taken at the international and national levels against that threat. Rich with example and illustration and written in a light, direct,

style, it will provide a lucid guide for practitioners, policy-makers and students to the largely untraversed territory of the international legal system set up to suppress transnational organised crime." Professor Neil Bolster, University of Canterbury, New Zealand. "the international law governing organized crime is a close relative of the body of law applicable to the International Criminal Court and similar institutions. It provides a forum to address issues of more general concern, such as the scope of universal jurisdiction, immunities, statutory limitation and extradition. Tom Obokata's study, with its original and in some ways unique perspective, enriches our knowledge of the field". Professor William Schabas, Irish Centre for Human Rights. "The book is well written, its documentation is quite exhaustive, and its thesis is timely and compelling." Professor M. Cherif Bassiouni, DePaul University College of Law.

of reform, the core outcomes of such processes and the overall implications for theory building. It addresses a wide range of questions including: How has the temporal and spatial patterning of youth justice and penalty evolved since the early 1980s to the present time? What impacts have legislative and policy reforms imposed upon processes of criminalisation, sentencing practices and the use of penal detention for children and young people? How do we comprehend both the diverse ways in which public representations of 'young offenders' are shaped, structured and disseminated and the varied, conflicting and contradictory effects of such representations? To what extent do international human rights standards influence law, policy and practice in the realms of youth justice and penalty? To what extent are youth justice systems implicated in the production and reproduction of social injustices? How, and to what degree, are youth justice systems and penal cultures internationalised, nationalised, regionalised or localised? The book is essential reading for researchers, students and tutors in criminology, criminal justice, law, social policy, sociology and youth studies.

Criminology and Criminal Justice Systems of the World

Commencing its search for a principled international criminal justice, this book argues that the Preamble to the Rome Statute requires a very different notion of justice than that which would be expected in domestic jurisdictions. This thinking necessitates theorising what international criminal justice requires in terms of its legitimacy much more than normative invocations, which in their unreality can endanger the satisfaction of two central concerns – the punitive and the harm-minimisation dimensions. The authors suggest that because of the unique nature and form of the four global crimes, pre-existing proof technologies are failing

prosecutors and judges, forcing the development of an often unsustainable line of judicial reasoning. The empirical focus of the book is to look at JCE (joint criminal enterprise) and aiding and abetting as case-studies in the distortion of proof tests. The substantial harm focus of ICJ (international criminal justice) invites applying compatible proof technologies from tort (causation, aggregation, and participation). The book concludes by examining recent developments in corporate criminal liability and criminalising associations, radically asserting that even in harmonising/hybridising international criminal law there resides a new and rational vision for the juridical project of international criminal justice.

Why are there pronounced gender differences in rates of criminal victimization? Does gender influence the response of the criminal justice system and other parts of the community to offenders and to crime victims? What part does gender play in the etiology of illegal activities committed by both males and females? Understanding Gender, Crime, and Justice takes a contemporary look at such questions and considers areas that are often neglected in other books on gender, crime, and justice. In the last three decades, there has been an explosion of theory and related research relevant to gender, crime, and justice. Author Merry Morash, a well-known feminist scholar in the field of criminal justice, acquaints readers with key breakthroughs in criminological conceptualization and theories to explain the interplay between gender and both crime and justice. Handbook of Criminal Justice Administration

The book consists of the keynote papers delivered at the 2012 WG Hart Workshop on Globalisation, Criminal Law and Criminal Justice organised by the Queen Mary Criminal Justice Centre. The volume addresses, from a cross-disciplinary perspective, the multifarious relationship between globalisation on the one hand, and criminal law and justice on the other hand. At a time when economic, political and cultural systems across different jurisdictions are increasingly becoming or are perceived to be parts of a coherent global whole, it appears that the study of crime and criminal justice policies and practices can no longer be restricted within the boundaries of individual nation-states or even particular transnational regions. But in which specific fields, to what extent, and in what ways does globalisation influence crime and criminal justice in disparate jurisdictions? Which are the factors that facilitate or prevent such influence at a domestic and/or regional level? And how does or should scholarly inquiry explore these themes? These are all key questions which are addressed by the contributors to the volume. In addition to contributions focusing on theoretical and comparative dimensions of globalisation in criminal law and justice, the volume includes sections focusing on the role of

This collection brings together a group of international legal historians to further scholarship in different areas of comparative and regional legal history. Authors are drawn from Europe, Asia, and the Americas to produce new insights into the relationship between law and society across time and space. The book is divided into three parts: legal history and legal culture across borders, constitutional experiences in global perspective, and the history of judicial experiences. The three themes, and the chapters corresponding to each, provide a balance between public law and private law topics, and reflect a variety of methodologies, both empirical and theoretical. The volume highlights the gains that may be made by comparing the development of law in different countries and different time periods. The book will be of interest to an international readership in Legal History, Comparative Law, Law and Society, and History.

Criminal Justice presents and critically assesses a wide range of topics relevant to criminology, criminal justice and global justice. The text is divided into three parts: comparative criminal justice, international criminology, and transnational and global criminology. Within each field are located specific topics which the authors regard as contemporary and highly relevant and that will assist students in gaining a fuller appreciation of global justice issues. Authors Cyndi Banks and James Baker address these complex global issues using a scholarly but accessible approach, often using detailed case studies. The discussion of each topic is a comprehensive contextualized account that explains the social context in which law and crime exist and engages with questions of explanation or interpretation. The authors challenge students to gain knowledge of international and comparative criminal justice issues and think about them in a critical manner. It has become difficult to ignore the global and international dimensions of criminal justice and criminology and this text aims to enhance criminal justice education by focusing on some of the issues engaging criminology worldwide, and to prepare students for a future where fields of study like transnational crime are unexceptional.

Comparative Criminal Justice Systems

Criminal justice procedure is the bedrock of human rights. Surprisingly, however, in an era of unprecedented change in criminal justice around the world, it is often dismissed as technical and unimportant. This failure to take procedure seriously has a terrible cost, allowing reform to be driven by purely pragmatic considerations, cost-cutting or foreign influence. Current US political domination, for example, has produced a historic and global shift towards more adversarial procedure, which is widely misunderstood and inconsistently implemented. This book addresses such issues by bringing together a huge range of historical and contemporary research on criminal justice in Europe, Asia, Africa, Australasia and the Americas. It proposes a theory of procedure derived from the three great international trial modes of 'inquisitorial justice', 'adversarial justice' and 'popular justice'. This approach opens up the possibility of assessing criminal justice from a more objective standpoint, as well as providing a sourcebook for comparative study and practical reform around the world.
