"In recent years the debate on multiculturalism in the UK and other Western societies has focused principally on Islam, and the specific 'problems' said to be posed by Muslims have been invoked to justify the claim that multiculturalism has failed. That claim is opened to scrutiny and challenged in this unique collection through a series of explorations of specific issues and controversies - including the question of the veil, crime, political Islam, the role of Muslim women, sexuality and the Danish cartoons affair - and through more general reflections on the nature of multiculturalism. By exploring the nature of cultural differences and sensitivities and examining the way conflicts have played out, this challenging book makes a wide-ranging contribution to debate and a more constructive inter-cultural engagement. The contributors draw upon the disciplines of social science, ethics, theology, philosophy and education to examine the nature of the issues and flashpoints and to draw out implications for theory, policy and practice." --from back cover.

The Complete Book of the SR-71 Blackbird

The ultimate SR-71 book which profiles the history, development, manufacture, modification, and active service of all 50 models in the SR-71 program. At the height of the Cold War in 1964, President Johnson announced a new aircraft dedicated to strategic reconnaissance. The Lockheed SR-71 Blackbird spy plane flew more than three-and-a-half times the speed of sound--so fast that no other aircraft could catch it. Above 80,000 feet, its pilots had to wear full-pressure flight suits similar to what was used aboard the space shuttle. Developed by the renowned Lockheed Skunk Works, the SR-71 was an awesome aircraft in every respect. It was withdrawn from use in 1998, when it was superseded by satellite technology. Twelve of the thirty-two aircraft were destroyed in accidents, but none were ever lost to enemy action. Throughout its thirty-four-year career, the SR-71 was the world's fastest and highest-flying operational manned aircraft. It set world records for altitude and speed: an absolute altitude record of 85,069 feet and an absolute speed record of 2,193.2 miles per hour. The Complete Book of the SR-71 Blackbird covers every aspect of the SR-71's development, manufacture, modification, and active service from the insider's perspective of one of its pilots and is lavishly illustrated with more than 400 photos. Former pilot and author Richard Graham also examines each of the fifty planes that came out the SR-71

program (fifteen A-12s; three YF-12s; and thirty-two SR-71s) and tells each plane's history, its unique specifications, and where each currently resides.
