Number of Pages: 108 pages / 54 sheets
Paper Weight: 60 lb, most common quality office copy paper
Made-In: USA

Undated to Do List Notebook

Fifty years ago, in 1984, George Orwell imagined a future in which privacy was demolished by a totalitarian state that used spies, video surveillance, historical revisionism, and control over the media to maintain its power. Those who worry about personal privacy and identity--especially in this day of technologies that encroach upon these rights--still use Orwell's "Big Brother" language to discuss privacy issues. But the reality is that the age of a monolithic Big Brother is over. And yet the threats are perhaps even more likely to destroy the rights we've assumed were ours. Database Nation: The Death of Privacy in the 21st Century shows how, in these early years of the 21st century, advances in technology endanger our privacy in ways never before imagined. Direct marketers and retailers track our every purchase; surveillance cameras observe our movements; mobile phones will soon report our location to those who want to track us; government eavesdroppers listen in on private communications; misused medical records turn our bodies and our histories against us; and linked databases assemble detailed consumer profiles used to predict and influence our behavior.

Privacy--the most basic of our civil rights--is in grave peril. Simson Garfinkel--journalist, entrepreneur, and international authority on computer security--has devoted his career to testing new technologies and warning about their implications. This newly revised update of the popular hardcover edition of Database Nation is his compelling account of how invasive technologies will affect our lives in the coming years. It's a timely, far-reaching, entertaining, and thought-provoking look at the serious threats to privacy facing us today. The book poses a disturbing question: how

can we protect our basic rights to privacy, identity, and autonomy when technology is making invasion and control easier than ever before?Garfinkel's captivating blend of journalism, storytelling, and futurism is a call to arms. It will frighten, entertain, and ultimately convince us that we must take action now to protect our privacy and identity before it's too late.

Native Gold

Mathilda Hardwicke, a rebellious artist rejected by her family and New York society, heads west to Gold Rush California as a mail-order bride. But when fate leaves her at the altar, she's drawn to Sakote--a fierce Konkow warrior whose tribe is threatened by the encroaching white men--in whose arms she discovers a savage new Paradise and a forbidden love more precious than gold.

Database Nation

The crime of the twenty-first century doesn't discriminate: ID theft has hit ordinary citizens and celebrities alike, from Oprah Winfrey to Steven Spielberg, and costs the economy \$50 billion a year. Your Evil Twin covers this exploding crime from every possible angle. It includes exclusive whodunit details from mastermind identity thieves who have pilfered money from half the members of the Forbes 400, as well as exclusive interviews with a myriad of criminals in the Internet's underground, such as Russian hackers who have extorted money from U.S. banks.

The book also issues a scathing indictment of the credit granting industry, from credit card issuers to the secretive credit reporting agencies, who have misunderstood the crime from the start, have been slow to respond, and bear much of the responsibility for the epidemic. Finally, Bob Sullivan, author and identity theft expert, probes the tepid solutions now being cobbled together by the industry and government. Bob Sullivan (Snohomish, WA), senior technology writer for MSNBC.com, is the nation's leading journalist covering identity fraud. He has written more than 100 articles on the subject since 1996, and is a regular contributor to MSNBC, CNBC, NBC Nightly News, the Today show, and various local NBC affiliates. With colleague Mike Bruner, Sullivan received the prestigious 2002 Society of Professional Journalists Public Service Award for ongoing coverage of Internet fraud.
