Istoria Basarabiei de la începuturi până în 2003

Latin America Monitor

This book explores the insights that Cultural Astronomy provides into the classical Roman world by unveiling the ways in which the Romans made use of their knowledge concerning the heavens, and by shedding new light on the interactions between astronomy and heritage in ancient Roman culture. Leading experts in the field present fascinating information on how and why the Romans referred to the sky when deciding upon the orientation of particular monuments, temples, tombs and even urban layouts. Attention is also devoted to questions of broader interest, such as the contribution that religious interpretation of the sky made in the assimilation of conquered peoples. When one considers astronomy in the Roman world

it is customary to think of the work and models of Ptolemy, and perhaps the Julian calendar or even the sighting of the Star of Bethlehem. However, like many other peoples in antiquity, the Romans interacted with the heavens in deeper ways that exerted a profound influence on their culture. This book highlights the need to take this complexity into account in various areas of research and will appeal to all those who wish to learn more about the application of astronomy in the lives and architecture of the Romans.

Quality of Governance

Boletín impositivo

Concern about global warming has led to renewed interest in the more sustainable use of natural fibres in composite materials. This important book reviews the wealth of recent research into improving the mechanical properties of natural-fibre thermoplastic composites so that they can be more widely used. The first part of the book provides an overview of the main types of natural fibres used in composites, how they are processed and, in particular, the way the fibre-matrix interface can be engineered to improve performance. Part two discusses the increasing use of natural-fibre composites in such areas as automotive and structural engineering, packaging and the energy sector. The final part of the book discusses ways of assessing the mechanical performance of natural-fibre composites. With its distinguished editor and team of contributors, Properties and performance of natural-fibre composites is a valuable reference for all those using these important materials in such areas as automotive and structural engineering. Provides an overview of the types of natural fibres used in composites Discusses fibre-matrix interface and how it can be engineered to improve performance Examines the increasing use of natural-fibre composites in automotive and structural engineering and the packaging and energy sector

Saab 9000 (4-cylinder)

This book provides a comparative, neo-institutionalist approach to the different factors impacting state adoption of—or refusal to adopt—same-sex marriage laws. The now twenty-one countries where lesbians and gay men can legally marry include recent or longstanding democracies, republics and parliamentary monarchies, and unitary and federal states. They all reflect different positions with respect to religion and the cultural foundations of the nation. Countries opposed to such

legalization, and those having taken measures in recent years to legally reinforce the heterosexual fundamentals of marriage, present a similar diversity. This diversity, in a globalized context where the idea of same-sex marriage has become integral to claims for LGBTI equality and indeed LGBTI human rights, gives rise to the following question: which factors contribute to institutionalizing same-sex marriage? The analytical framework used for exploring these factors in this book is neo-institutionalism. Through three neo-institutionalist lenses—historical, sociological and discursive—contributors investigate two aspects of the processes of adoption or opposition of equal recognition of same-sex partnerships. Firstly, they reveal how claims by LGBTIQ movements are being framed politically and brought to parliamentary politics. Secondly, they explore the ways in which same-sex marriage becomes institutionalized (or resisted) through legal and societal norms and practices. Although it adopts neo-institutionalism as its main theoretical framework, the book incorporates a broad range of perspectives, including scholarship on social movements, LGBTI rights, heterosexuality and social norms, and gender and politics.

Mongolian law of taxation and other tax related legal documents.

Natural Fibre Reinforced Polymer Composites

How can management be developed to create the greatest wealth for society as a whole? This is the question Peter Drucker sets out to answer in *Innovation and Entrepreneurship*. A brilliant, mould-breaking attack on management orthodoxy it is one of Drucker's most important books, offering an excellent overview of some of his main ideas. He argues that what defines an entrepreneur is their attitude to change: 'the entrepreneur always searches for change, responds to it and exploits it as an opportunity'. To exploit change, according to Drucker, is to innovate. Stressing the importance of low-tech entrepreneurship, the challenge of balancing technological possibilities with limited resources, and the organisation as a learning organism, he concludes with a vision of an entrepreneurial society where individuals increasingly take responsibility for their own learning and careers. With a new foreword by Joseph Maciariello

Cultural Theory and Popular Culture

"Quality of governance: Values and violations arrives at a time when governance faces new and often dire challenges and as traditional democratic values strain against the rise of authoritarian forms of populism and anti-government sentiment. This comprehensive volume considers these challenges from a variety of angles- transparency, bureaucratic pathologies, public values, sector relations- but at the same time manages a higher degree of integration than one usually finds in most edited volumes. The individual selections focus on topics of widespread interest but with new theories, analytical frameworks and insights. This book should be read by anyone interested the values bases of governance and in exploring good ideas about how to improve policy and management. The book serves a professional academic audience but could also prove quite useful as a text or supplementary book for graduate and undergraduate courses in public affairs." Barry Bozeman, Regents' Professor, Arizona State University, School of Public Affairs, USA. "Public governance matters. It touches almost every aspect of our lives, from the most mundane to the most important, the most commonplace to the most intimate. This book critically examines some of thorniest values and issues for governance in the 21st century -- democracy, legitimacy, accountability, transparency, integrity, professionalism, and more -- all of which are of crucial importance for practice and research on the quality of governance." Tina Nabatchi, Syracuse University, USA, Co-Chair of the Study Group 'Quality of Governance' of the International Institute of Administrative Sciences. "This volume provides an up-to-date overview of key themes and theories about the quality of governance. Many of the field's most thoughtful scholars have contributed chapters on both the positive and problematic dimensions of good governance, providing fascinating insights in this important topic. Therefore, this book is a must read for all scholars, students, and practitioners interested in improving the quality of governance in their countries and institutions." Zeger van der Wal, National University of Singapore and Leiden University The Netherlands. This volume unravels the meaning of public values for the quality of governance, for good and bad governance, and examines their significance in governance practices. It addresses public values in context, in different countries, policy sectors and levels of governance. In a series of in-depth studies, a critical eye is cast over eight central values: democratic legitimacy, accountability, transparency, integrity, lawfulness, effectiveness (in terms of service quality), professionalism and craftsmanship, and robustness. How does for instance integrity or lawfulness contribute to the accomplishment and preservation of quality, and what happens if we fail to address it adequately? This unique exercise yields important lessons on the differences in normative interpretation and application of often abstract values in the demanding administrative settings of today. Practitioners, scholars and students of public administration, public management and political science will find the volume a vital resource for theory and practice.

Tribuna economică

Global Perspectives on Same-Sex Marriage

A lively collection of essays from scholars from across Europe, North America and Australia. The book ranges from Shakespeare's use of manuals on war written for the sixteenth-century English public by an English mercenary, to reflections on the ways in which Shakespeare has been represented in Nazi Germany, wartime Denmark, or cold war Romania.

Manufacturing of Natural Fibre Reinforced Polymer Composites

This book analyses the waves of protests, from spontaneous uprisings to well-organized forms of collective action, which have shaken European cities over the last decade. It shows how analysing these protests in connection with the structural context of neoliberal urbanism and its crises is more productive than standard explanations. Processes of neoliberalisation have caused deeply segregated urban landscapes defined by deepening social inequality, rising unemployment, racism, securitization of urban spaces and welfare state withdrawal, particularly from poor peripheral areas, where tensions between marginalized youth and police often manifest in public spaces. Challenging a conventional distinction made in research on protest, the book integrates a structural analysis of processes of large scale urban transformation with analyses of the relationship between 'riots' and social movement action in nine countries: France, Greece, England, Germany, Spain, Poland, Denmark, Sweden and Turkey.

Notable Corporate Chronologies

Natural fibers and their composites have a long and important place in the history of human creativity and industry. Increasing consumer interest in "green" products made with sustainable materials, along with the rising cost of petroleum - the basic ingredient of synthetic fibers - have once again brought natural fibers and their composites to the fore. The

renewed interest in natural fibers is only a few decades old. Thus, the pioneering work of current researchers in this new era of natural fiber composites will help to illuminate the path for future researchers as they explore new potentialities for natural fibers. Sabu Thomas and Laly Pothen, themselves leaders in the field, bring together cutting edge research by eminent scientists in Natural Fiber Reinforced Composites. Covering the latest research trends such as nano technology, the book will be a valuable resource for the natural fiber composite researcher.

Models of Capitalism in the European Union

La grande enciclopedia di Torino

According to the report, the conference focused on the main challenges for the sustainable development of small-scale fisheries, including promoting political commitment and tailored strategies, raising awareness, and sharing knowledge.

Fiat Uno Service and Repair Manual

G. Volpato, A. Camuffo, A. Comacchio 1.1 The background During recent years the dynamics of automotive industry and its supply chain has catalysed the attention and the research effort of a wide international group of scholars as: the International Motor Vehicle Program (JMVP) of Massachusetts Institute of Technology, the Permanent Study Group for the Automobile Industry and Its Employees (GERPISA) of Paris, and the International Car Distribution I Programme (ICDP) of Solihull. This favoured the publication of relevant studies and the growth of networks of academicians and practitioners interested in studying the patterns of industry evolution and in organising meetings to present and discuss issues of common interest. In 1992 some members of these research projects decided to organize a first conference in Berlin dedicated to the main theme of automation and organization in the automobile industry. In 1993 a second conference took place in Tokyo, followed by a technical visit to a few automobile manufacturers and components suppliers plants (Toyota, Nissan, Mitsubishi, etc.).

Shakespeare and War

This book introduces the concept, design and application of green biocomposites, with a specific focus on the current demand for green biocomposites for automotive and aerospace components. It discusses the mathematical background, innovative approaches to physical modelling, analysis and design techniques. Including numerous illustrations, tables, case studies and exercises, the text summarises current research in the field. It is a valuable reference resource for researchers, students and scientists working in the field of materials science.

The British National Bibliography

In this new edition of his widely adopted Cultural Theory and Popular Culture: An Introduction, John Storey has extensively revised the text throughout. Like previous editions, the book presents a clear and critical survey of competing theories of, and various approaches to, popular culture. New to this edition: Extensively revised, rewritten, and updated Improved and expanded content throughout including a new chapter on psychoanalysis and a new section on post-Marxism and the global postmodern Closer explicit links to the new edition companion reader Cultural Theory and Popular Culture: A Reader More illustrative diagrams and images Fully revised, improved, and updated companion web site Ideal for courses in: cultural studies media studies communication studies sociology of culture popular culture visual studies cultural criticism

La industria automotriz en el MERCOSUR

Archaeoastronomy in the Roman World

Jakou výbavu měla speciální série vozů Aston Martin, nazvaná Alfred Dunhill? Jak souvisí logo Maserati s fontánou z 16. století? Je slovo Aero spojeno jen s českou automobilkou, nebo najdeme vozy tohoto jména i v jiných částech světa? Co přesně jsou „daňové koně“? Vymysleli název Citroën Elysée Čiňané? Jak ovlivnil vývoj automobilového průmyslu fakt, že zakladatelé značek Ferrari a Lamborghini spolu nevycházel? Ing. Jiří Fiala (publicista, automobilový historik a sběratel automobilové literatury) a doc. Petr Strossa (vědec, expert přes jazyky a dorozumívání s počítači) předkládají všem automobilovým fanatikům unikátní výkladový slovník jmen značek a jejich typů, který obsahuje hesla o přibližně 1600 značkách a více než 5000 typech a modelech. Čtenáři v knize najdou mimo jiné základní informace o výrobcích automobilů, jejich filozofii označování typů, používání interních kódů či recyklování názvů vozů. Dozvědí se, proč se jeden automobil prodával pod různými názvy, proč se některá jména nesměla používat nebo jakých dosáhly jednotlivé vozy sportovních úspěchů. Vůbec poprvé je u nás pak publikován systém kódů sovětských vozidel a přehled čínských značek a výrobců.

Zvláštní pozornost je věnována znakům (logům) všech důležitých značek, jejich vzniku a proměnám v čase. Celá tato speciální problematika je navíc zasazena do kontextu společenských a geopolitických událostí a okořeněná množstvím pozoruhodných historek a kuriozit souvisejících s auty, jejich jmény a výrobci.

Hatchback & Saloon, inc. Turbo & special/limited editions. Petrol: 2.0 litre (1985cc) & 2.3 litre (2290cc) 4-cyl. Does NOT cover V6.

Innovation and Entrepreneurship

This book uses comparative economic analysis to provide a common conceptual framework for all current European Union member states. Based on empirical investigation, the author identifies the Nordic, North-western, Mediterranean, and Central and Eastern models of capitalism on the threshold of the 2008 global financial and economic crisis. The chapters also examine the resulting institutional responses to the crisis and the methods of crisis management adopted by each member state. The analysis reveals that the crisis has not triggered radical institutional change but, instead, highlighted deep institutional differences not between the old and new member states, but between the Nordic, North-western, Mediterranean, and Central and Eastern European countries. These institutional differences are so significant that they require the rethinking of European integration theory. Models of Capitalism in the European Union serves as a useful handbook for academics, advanced students, policy-makers and advisors who are interested in European economic issues.

Globalizzazione e relazioni industriali

Green Biocomposites

L'automobile italiana

Following the success of the first (1995) edition, this fully updated report will provide a global overview of the use of automotive plastics and composites in passenger vehicles, with an analysis of markets and trends to the year 2007. Special attention is given to vehicle weight reduction. For a PDF version of the report please call Tina Enright on +44 (0) 1865 843008 for price details.

Automotive Plastics and Composites: Worldwide Markets and Trends to 2007

Hatchback with 4-cyl engines, inc. special/limited editions. Does NOT cover features specific to 1.6 & 1.8 litre Marea & Weekend models Petrol: 1.2 litre (1242cc), 1.4 litre (1370cc), 1.6 litre (1581cc) & 1.8 litre (1747cc). Does NOT cover 2.0 litre HGT.

Urban Uprisings

Natural fibre composite is an emerging material that has great potential to be used in engineering application. Oil palm, sugar palm, bagasse, coir, banana stem, hemp, jute, sisal, kenaf, roselle, rice husk, betul nut husk and cocoa pod are among the natural fibres reported to be used as reinforcing materials in polymer composites. Natural fibre composites were used in many industries such as automotive, building, furniture, marine and aerospace industries. The advantages of natural fibre composites include low cost, renewable, abundance, light weight, less abrasive and they are suitable to be used in semi or non-structural engineering components. Research on various aspects of natural fibre composites such as characterization, determination of properties and design have been extensively carried out. However, publications that reported on research of manufacture of natural fibre composites are very limited. Specifically, although manufacturing methods of components from natural fibre composites are similar to those of components from conventional fibre composites such as glass, carbon and Kevlar fibres, modification of equipment used for conventional fibre composites may be required. This book fills the gap of knowledge in the field of natural fibre composites for the research community. Among the methods reported that are being used to produce components from natural fibre composites include hand lay-up, compression moulding, filament winding, injection moulding, resin transfer moulding, pultrusion and vacuum bag moulding. This book is also intended to address some research on secondary processing such as machining and laser welding of natural fibre composites. It is hoped that publication of this book will provide the readers new knowledge and understanding

on the manufacture of natural fibre composites.

Properties and Performance of Natural-Fibre Composites

VelocePress, in close cooperation with Brooklands Books Ltd., has brought this and other repair manuals previously published as part of the Autobooks Owners Workshop Manual Series back into print. The series is an invaluable resource for the classic car enthusiast and a must have for owners interested in performing their own maintenance.
