[ ] it didn't matter, because one word, "sure" in the context of motorcycle ownership, gave Pete permission to buy one. All he had to do now was earn the money. [ ] When Ms. Strickland answered the door she looked at the stoop and noticed that it had been shoveled. Since they were both holding shovels, the first thing she said in a rhetorical tone was "Did you guys do that? Thank you!" Before they could get a word out, she continued with "I guess you are here to shovel my drive! Or did you do that too and now you want your money?" Without missing a beat, Mel replied, "Yup! Twenty bucks!" In a scolding almost frantic tone she replied with, "Well I'm not paying. I

have the lawn service under contract. Not very smart business boys. You can't just ask people to pay for a service they didn't request!" Pete just stood there in shock when Mel said, "OK, we'll put it back." She paused for a moment with a look of horror on her face until she realized Mel was joking and started laughing. She said "I'm sorry boys, but I'm already committed." Mel replied, "That's OK, we understand." As they were walking toward the next house, they heard Ms. Strickland's door open and she started yelling, "Boys!? Boys!? Wait!" Mel and Pete exchanged glances wondering what now? "Come back! I changed my mind! You can shovel my drive!" Pete jokingly said to Mel, "It looks like we're both gonna make \$20 on this drive since our price just doubled!"

For decades the crown jewels of Japan's postwar manufacturing industry, motorcycles remain one of Japan's top exports. Japan's Motorcycle Wars assesses the historical development and societal impact of the motorcycle industry, from the influence of motor sports on vehicle sales in the early 1900s to the postwar developments that led to the massive wave of motorization sweeping the Asia-Pacific region today. Jeffrey Alexander brings a wealth of information to light, providing English translations of transcripts, industry publications, and company histories that have until now been available only in Japanese. By exploring the industry as a whole, he reveals that Japan's motorcycle industry was characterized not by communitarian success but by misplaced loyalties, technical disasters, and brutal competition.

The Motorcycle Encyclopaedia is a complete and comprehensive reference work. The book is designed in two major sections. The first is a photo-gallery of over 400 classic motorbikes, alphabetically arranged by manufacturers, with all their significant models covered in detail. The second section lists every maker from the inception of motorcycling to the present day, and includes rare photographs and design blueprints. Each manufacturer is profiled, from ABC to Sundapp through giants of the industry like Honda and extinct but fondly remembered producers like Vincent and Velocette.

When it comes to collector motorcycles, none hold the allure of the classic Harley-Davidson Big Twins built from 1936 to 1964. But owning and maintaining these temperamental machines provides endless challenges. Even the most pristine, restored example needs a tremendous amount of care, maintenance, and repair. The rebuilding and restoring of these machines is not so much a defined task as a never-ending process. This book serves to guide owners through that process. Beginning with a practical section on understanding, choosing, and purchasing a classic Harley, this book focuses on the nuts and bolts of classic Harley ownership. Through step-by-step photography and thoughtful, informative instruction, the reader will learn how to disassemble a chassis, rebuild a fork, lace a wheel, and paint the major parts for any restoration. It also provides thorough instruction on repairing, overhauling, and restoring all major components, such as the engine, transmission, and electrical system.
