Issues in Healthcare Management, Economics, and Education: 2011 Edition

What do we mean by 'gender' and how does this relate to health? How is 'biology' best understood? What does a focus on the division of labour bring to our understanding of health work? Is (gender) 'equity' in health possible? How have developments such as the resurgence of emotions and the new genetics affected these and other social relations at the turn of the century? These are just some of the questions addressed in *Gender, Health and Healing* in which a whole range of issues are brought together and connected to emerging concerns in contemporary life such as the new genetics and transformations in biomedical knowledge and practices. It offers a challenging assessment of gender relations and embodied practices across the public/private divide, using health and healing as paradigmatic

examples. This thought-provoking volume lies at the intersection of gender studies, the sociology of health and healing, health policy, the critical analysis of scientific knowledge and the current debates around the body, health and emotions. Bringing together new and leading scholars in the field, it provides a unique critical overview of contemporary debates in health care for an interdisciplinary readership.

Community-Based Participatory Health Research, Second Edition

v. 1. Research findings -- v. 2. Concepts and methodology -- v. 3. Implementation issues -- v. 4. Programs, tools and products.

The Private Regulation of American Health Care

Nearly 1.9 million U.S. troops have been deployed to Afghanistan and Iraq since October 2001. Many service members and veterans face serious challenges in readjusting to normal life after returning home. This initial book presents findings on the most critical challenges, and lays out the blueprint for the second phase of the study to determine how best to meet the needs of returning troops and their families.

Managing Diversity in Today's Workplace: Strategies for Employees and Employers [4 volumes]

Discover how to better help those in your community in need of services
Community Action Research comprehensively explores models for community action research, incorporating quantitative and qualitative research to highlight the advantages to community members as well as the volunteers/paraprofessionals who implement the services. Respected experts present the latest research on the fulfillment of the needs of community members as well as the benefits to the volunteers and paraprofessionals, including psychological empowerment, psychological sense of community, and other facets of personal development. Community Action Research is helpfully organized into two sections. The first section presents a sample of empirical studies that examines whether community action research demonstrated benefits for community members. The second section provides empirical studies that show the positive impact of community action research on the personal development of volunteers and paraprofessionals who provided the research-related services. This detailed text is carefully referenced and uses several tables to enhance understanding of research data. Community Action Research discusses: the Adolescent Diversion Project as an alternative to juvenile court home-based behavior modification programs for autistic children the People Awakening Project and the role paraprofessionals played in Alaska Native sobriety a crime prevention project launched by a residential neighborhood association the Actual Community Empowerment Reading Program which utilized community members as literacy tutors the Community Service Self-Efficacy Scale's reliability and validity the Hawaiian Studies Program's weekly participation in community service-learning exercises and more! Community Action Research is insightful reading for psychologists,

sociologists, social workers, criminal justice researchers and professionals, community counselors, practitioners and researchers in community prevention and intervention, clinical supervisors, service learning specialists, educators, students, and mental health and human services program administrators, planners, or evaluators.

Relapsing-Remitting Multiple Sclerosis: New Insights for the Healthcare Professional: 2011 Edition

I will begin this book by analyzing the historical and political context for the emergence of managed competition (chapter 1). The chapters that follow will list the corporate initiatives that were launched during the 1970s (chapter 2); describe the evolutionary changes and expansions they went through during the 1980s and early 1990s in the process of becoming "managed competition" (chapter 3); describe the ways in which managed care systems attempt to regulate the cost of health care services and discuss why they fail to do so (chapter 4); describe managed care attempts to control the quality of services and discuss why they fail to do so (chapter 5); and conclude with a summary of the book's major points as well as descriptions of some alternative approaches to getting our nation's health care needs met (chapter 6).

Returning Home from Iraq and Afghanistan

The Dept. of Vet. Affairs (VA) provided health care to over 281,000 women vets in 2008 – an increase of about 12% since 2006 – and the number of women vets is projected to increase by 17% between 2008 and 2033. Women vets seeking care at VA medical facilities need access to a full range of health care services, including basic and specialized gender-specific services. This testimony discusses: (1) the on-site availability of health care services for women vets at VA facilities; (2) the extent to which VA facilities are following VA policies that apply to the delivery of health care services for women vets; and (3) key challenges that VA facilities are experiencing in providing health care services for women vets. Illustrations.

Public Health Nursing - E-Book

Nervous System Diseases: New Insights for the Healthcare Professional: 2013 Edition

This work contains the state-of-the-art in Virtual Reality as applied to Medicine. Interactive technology, used in many research and development programs, can be applied to health care by involving: robotics, computer vision, simulation, artificial intelligence, image manipulation and storage, data gloves, man-machine interfaces, etc. The Health Telematics Application Program, for example, is advancing virtual reality and enabling technologies (simulation, visualization and robotics) in health care services for patients, the elderly and persons with disabilities. This book addresses the following items from the end-user's perspective: technology transfer, telerobotics, telemedicine, education and training, and virtual reality. 'the book would () be useful for those researching

interactive technologies in health care, especially virtual reality (). It would be also of interest to people who want to keep abreast of the latest developments in techno-medical research.' - Rod Elford, Telemedicine Centre, Memorial University St John's, Newfoundland, Canada Journal of Telemedicine and Telecare, volume 2, no. 3, 1996, p. 178 Covered by Current Contents, Life Sciences (ISI), volume 38, no. 34, August 1995, p. 11-13

Leadership and Nursing Care Management - E-Book

Ethnic minorities represent a growing percentage of the elderly population in the United States. Yet, the impact of aging on minority groups and subgroups has only been partially studied. Minorities, Aging and Health fills the gap and opens the debate on how to provide for the specific needs of an increasingly elderly population. Specific issues covered in this volume include: mortality and life expectancy; the incidence of chronic disease and disabilities; diet and nutrition; mental health; access to health services and long-term care; and public health-care policy.

VA Health Care: Preliminary Findings on VA's Provision of Health Care Services to Women Veterans

Contributes to the debates about the rapid modernisation of healthcare systems and the dynamics of changing modes of governance and citizenship. This work provides different approaches and empirical data for academics and students of health policy, medical sociology and sociology of professions, and for health policy makers and managers.

Handbook of Research on Urban Informatics: The Practice and Promise of the Real-Time City

This four-volume set provides updated empirical research and best practices for understanding and managing workplace diversity in the 21st century, including issues of gender, race, generation, disability, sexual orientation, national origin, and age.

Geriatric Mental Health Care

Historically, the vast majority of Vet. Admin. (VA) patients have been men, but that is changing. VA provided health care to over 281,000 women veterans (WV) in 2008 -- an increase of about 12% since 2006. WV seeking care at VA medical facilities need access to a full range of health care services, incl. basic and specialized gender-specific services -- such as cervical cancer screening and treatment of reproductive cancers. This testimony discusses: (1) the on-site availability of health care services for WV at VA facilities; (2) the extent to which VA facilities are following VA policies that apply to the delivery of health care services for WV; and (3) some key challenges that VA facilities are experiencing in providing health care services for WV. Illus.

Universal Design as a Rehabilitation Strategy

Preliminary Findings of the First Health and Nutrition Examination Survey, 1971-72

Volume 4 considers the importance of health behavior research in practical settings. Particularly notable are treatments of the "narrative approach", the taxonomy of health behavior, and the organization of health behavior knowledge. Each volume features extensive supplementary and integrative material prepared by the editor, the detailed index to the entire four-volume set, and a glossary of health behavior terminology.

Neighborhood Networks for Humane Mental Health Care

"Women represent an increasing share of those caught up in the fastest growing form of incarceration in the United States: immigration detention. Human Rights Watch research in detention facilities in Florida, Arizona, and Texas found that these women, held for periods ranging from a few days to several months or even years, often have limited access to adequate basic health care"--P. 4 of cover.

VA health care

A unique resource for rehabilitation engineers, design and building professionals, rehabilitation counselors, gerontologists, psychologists, and other health and mental health professionals, this volume covers the significance and impact of universal design as a change agent for social and health movements. With a focus that is both practical and visionary, it emphasizes how the use of universal design can promote increased performance and participation for the aging population and people with disabilities, while mitigating the stigma and segregation that often characterize traditional rehabilitation design strategies. Written by one of the few architecturally trained researchers engaged in environmental issues related to accessibility and design for aging, the book stresses that universal design is not solely for people with disabilities, but is about usability and inclusion for people of all levels of ability. It examines key social ecological models in rehabilitation for aging and disability, and sheds new light on health and disability at both the individual and population level. Particular attention is paid to the medical, functional, and environmental implications of disability, health care and disability systems, and the psychosocial and cultural issues pertinent to rehabilitation counseling. Key Features: Examines the medical, functional, and environmental implications of disability Addresses health care and disability systems Discusses psychosocial and cultural issues pertinent to rehabilitation counseling Rooted in the concepts of social equity and inclusivity through participation of older adults and disabled individuals in community and societal roles Provides a visionary yet practical paradigm that transcends traditional design problem-solving

Gender, Health and Healing

VA health care preliminary findings on the Department of

Veterans Affairs health care budget formulation for fiscal years 2005 and 2006.

What effect does religion have on physical and mental health? In answering this question, this book reviews and discusses research on the relationship between religion and a variety of mental and physical health outcomes, including depression and anxiety; heart disease, stroke, and cancer; and health related behaviors such as smoking and substance abuse. The authors examine the positive and negative effects of religion on health throughout the life span, from childhood to old age. Based on their findings, they build theoretical models illustrating the behavioral, psychological, social, and physiological pathways through which religion may influence health. The authors also review research on the impact of religious affiliation, belief, and practice on the use of health services and compliance with medical treatment. In conclusion, they discuss the clinical relevance of their findings and make recommendations for future research priorities. Offering the first comprehensive examination of its topic, this volume is an indispensable resource for research scientists, health professionals, public policy makers, and anyone interested in the relationship between religion and health.

Heart Catheterization: New Insights for the Healthcare Professional: 2011 Edition

Human Herpes Virus: New Insights for the Healthcare Professional: 2012 Edition

Nervous System Diseases: New Insights for the Healthcare Professional: 2013 Edition is a ScholarlyEditions™ book that delivers timely, authoritative, and comprehensive information about Diagnosis and Screening. The editors have built Nervous System Diseases: New Insights for the Healthcare Professional: 2013 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Diagnosis and Screening in this book to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. Detained and Dismissed

Transforming Housing for People with Psychiatric Disabilities

Advances in Patient Safety

Through a novel integration of child welfare data, policy analysis, and evidence-informed youth permanency practice, the essays in this volume show how to achieve and sustain family permanence for older children and youth in foster care. Researchers examine what is known about permanency outcomes for youth in foster care, how the existing knowledge base can be applied to improve these outcomes, and the directions that future research should take to strengthen youth permanence practice and policy. Part 1 examines child welfare data concerning reunification, adoption, and relative custody and guardianship and the implications for practice and policy. Part 2 addresses law, regulation, court reform, and resource allocation as vital components in achieving and sustaining family permanence. Contributors examine the impact of policy change created by court reform and propose new federal and state policy directions. Part 3 outlines a range of practices designed to achieve family permanence for youth in foster care: preserving families through community-based services, reunification, adoption, and custody and guardianship arrangements with relatives. As growing numbers of youth continue to "age out" of foster care without permanent families, researchers, practitioners, and policymakers have increasingly focused on developing evidence-informed policies, practices, services and supports to improve outcomes for youth. Edited by leading professionals in the field, this text recommends the most relevant and effective methods for improving family permanency outcomes for older youth in foster care.

Community Action Research

It is hard to think of a more timely and topical major contribution than Drs. Naparstek, Biegel, Spiro, and collaborators have provided in this volume. Their penetrating, comprehensive study and field tests give us mapping toward the goal of reifying the concept of "community" as applied to human services. The book will prove invaluable to those at the policy level-legislators, planners, and administrators. It will serve as an essential reference for community workers-professional providers, natural helpers, and citizens as a whole. A salient ideal of New Federalism-placing governance as close to the people as practicable-seems a prophetic match with the model of Neighborhood Empowerment. As the authors point out, conventional wisdom has seemed to offer government regulation, control, and program evaluation as a panacea package for improving human services. This work suggests a radically different approach; specifically, a shift to greater instrumental involvement of the richly variegated mosaic of American neighborhoods, combined with a system of excellent, high technology service agencies. Certainly, genuine efforts have been made before toward a true linkage of the community with human services. The Great Society programs, with their emphasis on citizen involvement and "maximum feasible participation" established the foundation for legitimate citizen/ consumer linkage with the program process. Yet, in so many instances, the results fell far short of expectations.

Achieving Permanence for Older Children and Youth in Foster Care

"This book exposes research accounts which seek to convey an appreciation for local differences, for the empowerment of people and for the human-centred design of urban technology"--Provided by publisher.

Minorities, Aging and Health

A more trusted environment for the management and use of health information would undoubtedly help to consolidate and accelerate the use of health informatics solutions as change mechanisms to drive the establishment and adoption of new models of care, as well as new technology-oriented healthcare processes. This book presents 35 papers from the Australian National Health Informatics Conference (HIC 2012), held in Sydney, Australia, in July and August 2012. The theme of the conference is 'Health Informatics - Building a Healthcare Future Through Trusted Information', and emphasises the importance of assuring the integrity and security of health data and communications. The papers range from deeply theoretical to intensely practical, and address many elements of contemporary health informatics research endeavours, as well as peripheral, but related topics. Australian research, developments and implementations are at the forefront of e-health, and are the focus of much international attention. The Federal Government has invested in the building of a National Broadband Network, lead implementation sites, telehealth delivery and personally controlled electronic health records (PCEHR), launched 30 days before the conference. This book will be of interest to clinicians, researchers, industry innovators and all those who share the desire to deliver better healthcare to all.

Interactive Technology and the New Paradigm for Healthcare

Comprehensive and easy to read, this authoritative resource features the most up-to-date, research-based blend of practice and theory related to the issues that impact nursing management and leadership today. Key topics include the nursing professional's role in law and ethics, staffing and scheduling, delegation, cultural considerations, care management, human resources, outcomes management, safe work environments, preventing employee injury, and time and stress management. Research Notes in each chapter summarize relevant nursing leadership and management studies and show how research findings can be applied in practice. Leadership and Management Behavior boxes in each chapter highlight the performance and conduct expected of nurse leaders, managers, and executives. Leading and Managing Defined boxes in each chapter list key terminology related to leadership and management, and their definitions. Case Studies at the end of each chapter present real-world leadership and management situations and illustrate how key chapter concepts can be applied to actual practice. Critical Thinking Questions at the end of each chapter present clinical situations followed by critical thinking questions that allow you to reflect on chapter content, critically analyze the information, and apply it to the situation. A new Patient Acuity chapter uses evidence-based tools to discuss how patient acuity measurement can be done in ways that are specific to nursing. A reader-friendly format breaks key content into easy-to-scan bulleted lists. Chapters are divided according to the AONE competencies for nurse leaders, managers, and executives. Practical Tips boxes highlight useful strategies for applying leadership and management skills to practice.

VA Health Care: Preliminary Findings on VA's Provision of Health Care Services to Women Veterans

In 2008, the VA provided health care to over 281,000 women veterans, a fast growing subgroup of veterans. Women veterans seeking VA health care need access to an array of services, and Congress has raised concerns about how well VA is prepared to meet the physical and mental health care needs of women. This report examined: (1) the on-site availability of health care services at VA facilities for women vets; (2) the extent to which VA facilities are following VA policies that apply to the delivery of health care to women vets; and (3) key challenges that VA facilities face in providing health care to women vets and how VA is addressing these challenges. The auditor visited a sample of 9 VA medical centers and 10 community-based outpatient clinics.

Health Informatics: Building a Healthcare Future Through Trusted Information

Now in its 8th edition, the "gold standard" in community health nursing provides comprehensive and up-to-date content to keep you at the forefront of the ever-changing community health climate and prepare you for an effective nursing career. In addition to a solid foundation in concepts and interventions for individuals, families, and communities, you will find real-life applications of the public nurse's role, Healthy People 2020 initiatives, new chapters on forensics and genomics, plus timely coverage of disaster management and important client populations such as pregnant teens, the homeless, immigrants, and more. Evidence-Based Practice boxes illustrate how the latest research findings apply to public/community health nursing. Separate chapters on disease outbreak investigation and disaster management describe the nurse's role in surveilling public health and managing these types of threats to public health. Separate unit on the public/community health nurse's role describes the different roles and functions of the public/community health nurse within the community. Levels of Prevention boxes show how community/public health nurses deliver health care interventions at the primary, secondary, and tertiary levels of prevention. What Do You Think?, Did You Know?, and How To? boxes use practical examples and critical thinking exercises to illustrate chapter content. The Cutting Edge highlights significant issues and new approaches to community-oriented nursing practice. Practice Application provides case studies with critical thinking questions. Separate chapters on community health initiatives thoroughly describe different approaches to promoting health among populations. Appendixes offer additional resources and key information, such as screening and assessment tools and clinical practice guidelines. Linking Content to Practice boxes provide real-life applications for chapter content. NEW! Healthy People 2020 feature boxes highlight the goals and objectives for promoting health and wellness over the next decade. NEW! The Nurse in Forensics chapter focuses on the unique role of forensic nurses in public health and safety, interpersonal violence, mass violence, and disasters. NEW! Genomics in Public Health Nursing chapter includes a history of genetics and genomics and their impact on public/community health nursing care.

Handbook of Health Behavior Research IV

Community-Based Participatory Research (CBPR) has become the preferred model for conducting research in communities. Most scientists who conduct such research now recognize that working in partnership with the community is preferable, and more ethical, than conducting research on a community. As Surgeon General of the United States, I direct a number of programs aimed at encouraging Americans to avoid tobacco, engage in physical activity, consume more nutritious diets, and protect their health in other ways. We need more effective methods to persuade, motivate, and enable individuals and communities to adopt these healthier lifestyles, and it is through CBPR that we will be able to discover these methods.

From the Foreword by Regina M. Benjamin, MD, MBA, U.S. Surgeon General

The editors of this book bring together in one place both a description of epidemiological methods and a discussion of community-level issues. It is a volume that will prove useful to those who wish to conduct contemporary community-based research.

Praise for the First Edition from the Foreword David Satcher, Former Surgeon General of the United States

This second edition of a highly regarded textbook on the foundations of and strategies for achieving fertile community-based health care research has been completely revised and updated. It now includes new chapters on translating research into practice, evaluating research, and applying community-based participatory research (CBPR) principles to service, education, and evaluation. The book also updates a crucial chapter on the voices of community stakeholders and an important study of the ethical issues surrounding the Tuskegee Syphilis Study. Edited by renowned professors of community-based research, the text is distinguished by its how-to approach and focus on practical research methods. The text discusses the unique challenges of conducting CBPR and addresses ways to build and sustain community partnerships. It explores ethical issues regarding health care research, includes input from community stakeholders, and describes national and international support for CBPR. Research methods covered include qualitative studies, surveys, and intervention trials. Applications of CBPR illustrate how to translate research into practice and community-based participatory approaches to service, education, and evaluation. The second edition includes new chapters on: Building and sustaining researcher/community partnerships National and international investments in and support for CBPR Surveys and methods for conducting CBPR Translating research into practice Community-based participatory approaches to service, education, and evaluation

Dementia: New Insights for the Healthcare Professional: 2011 Edition

Deriving conclusions from the National Survey of Black Americans and several additional wide-ranging surveys, *Religion in the Lives of African Americans* examines broad issues: patterns of religious involvement; the functions of religion in coping, social support, etc.; and the relationships between religion and physical and mental health and well-being. Since the early 1900s, there has been ongoing academic interest in the nature, patterns, and functions of religion in the lives of African Americans because of the pervasiveness and persistence of the religious context in the lives of individuals, families and communities for this population group. This book enhances and furthers such academic interest by presenting a comprehensive, integrated analysis based upon rigorous, systematic survey

research. The authors provide readers with an authoritative profile of the importance of religious involvement in relation to diverse forms of behaviours, attitudes and perceptions.

VA Health Care

Congratulations to Aida Hurtado and Karina Cervantez- winners of the 2009 Women of Color Psychologies Award! This award, given by the Association of Women in Psychology Association, is voted on by AWP members for contributions of new knowledge and importance to the advancement of the psychology of women of color. Offering broad coverage of all U.S. Latino groups, this volume synthesizes cutting-edge research and methodological advances and provides culturally sophisticated information that can be used by researchers, policy makers, and practitioners. The editors and contributing authors summarize

File Type PDF Health Care Preliminary Findings On Patient Characteristics And State Medicaid Expenditures For Nursing Home

theories and conceptual models that can further our understanding of the development and adaptation of U.S. Latino populations. In addition, they focus on the importance of cultural sensitivity and competence in research and intervention approaches and how to achieve it. Key Features • Highlights the normative development and strengths of U.S. Latino populations • Elaborates on the heterogeneity of Latinos in that it does not assume that all Latino populations, and the contexts of their development, are identical. • Emphasizes on cultural sensitivity and competence at all levels • Focuses on the importance of cultural identity amongst Latinos and its contribution to healthy developmental outcomes.

Preliminary Findings of the First Health and Nutrition Examination Survey, United States, 1971-1972

This essential guide is designed for mental health practitioners and primary care providers without advanced training in geriatric psychiatry. Gary J. Kennedy sets forth a clear framework for understanding the interplay of medical, psychological, and social factors in frequently encountered problems among older adults. Clear guidelines are delineated for assessing and treating such conditions as depression and anxiety, dementia, psychosis and mania, sleep disturbances, personality and somatoform disorders, substance abuse, and suicidality. Throughout, the book focuses on ways to sustain seniors' independence and overall quality of life while enhancing their adaptive capacities.
