Professor Litman's work stands out as well-researched, doctrinally solid, and always piercingly well-written.-JANE GINSBURG, Morton L. Janklow Professor of Literary and Artistic Property, Columbia UniversityLitman's work is distinctive in several respects: in her informed historical perspective on copyright law and its legislative policy; her remarkable ability to translate complicated copyright concepts and their implications into plain English; her willingness to study, understand, and take seriously what ordinary people think copyright law means; and her creativity in formulating alternatives to the copyright quagmire. -PAMELA SAMUELSON, Professor of Law and Information Management; Director of the Berkeley Center for Law & Technology, University of California, BerkeleyIn 1998, copyright lobbyists succeeded in persuading Congress to enact laws greatly expanding copyright owners' control over individuals' private uses of their works. The efforts to enforce these new rights have resulted in highly publicized legal battles between established media

and new upstarts. In this enlightening and well-argued book, law professor Jessica Litman questions whether copyright laws crafted by lawyers and their lobbyists really make sense for the vast majority of us. Should every interaction between ordinary consumers and copyright-protected works be restricted by law? Is it practical to enforce such laws, or expect consumers to obey them? What are the effects of such laws on the exchange of information in a free society? Litman's critique exposes the 1998 copyright law as an incoherent patchwork. She argues for reforms that reflect common sense and the way people actually behave in their daily digital interactions. This paperback edition includes an afterword that comments on recent developments, such as the end of the Napster story, the rise of peer-to-peer file sharing, the escalation of a full-fledged copyright war, the filing of lawsuits against thousands of individuals, and the June 2005 Supreme Court decision in the Grokster case. Jessica Litman (Ann Arbor, MI) is professor of law at Wayne State University and a widely recognized expert on copyright law.

Designed for classroom use, *International Civil Dispute Resolution* sets forth in a clear, well-organized manner, the key legal and practical issues for successful handling of international dispute resolution. The book captures the four authors' many years of practice and diverse experience in international litigation and arbitration matters. The interesting "real world" problems posed will engage students and provide lasting knowledge through a "see it, do it, know it" approach. The chapters separately address critical topics, including the role of the international lawyer, tips for international research and international resources, jurisdiction, service of process, obtaining the evidence, act of state, foreign sovereign immunity, and enforcement of judgments. Reflecting the growing use of alternative dispute resolution, an entire chapter is devoted to mediation and arbitration issues including a stand-alone problem on mediation and arbitration planning and clause drafting. An accompanying document supplement contains materials essential to a full understanding of practice issues posed by international dispute resolution. A Teacher's Manual also accompanies the materials and contains clear and concise answers to the questions posed in the student book and discussion of the issues raised. Guidance is also provided as to the amount of class time to allocate to the problems and other course management options and tips.

This report summarizes results of legal actions that claimants pursued to recover their losses in major aviation accidents. In particular, it attempts to determine why some cases settle early and others do not. The authors describe the elements that distinguish air-crash litigation. They discuss the simple correlation between economic loss suffered and litigation process pursued, the theory behind the empirical models, and the operational definition of the empirical variables. The analysis indicates that, where large losses to survivors were involved, claimants were more likely to sue, to go to trial, and to have longer time to closure, indicating that the stakes are important in determining which cases make greater demands on the tort system.
