Unleash powerful teaching and the science of learning in your classroom **Powerful Teaching: Unleash the Science of Learning** empowers educators to harness rigorous research on how students learn and unleash it in their classrooms. In this book, cognitive scientist Pooja K. Agarwal, Ph.D., and veteran K-12 teacher Patrice M. Bain, Ed.S., decipher cognitive science research and illustrate ways to successfully apply the science of learning in classrooms settings. This practical resource is filled with evidence-based strategies that are easily implemented in less than a minute—without additional prepping, grading, or funding! Research demonstrates that these powerful strategies raise student achievement by a letter grade or more; boost learning for diverse students, grade levels, and subject areas; and enhance students' higher order learning and transfer of knowledge beyond the classroom. Drawing on a fifteen-year scientist-teacher collaboration, more than 100 years of research on learning, and rich experiences from educators in K-12 and higher education, the authors present highly accessible step-by-step guidance on how to transform teaching with four essential strategies: Retrieval practice, spacing, interleaving, and feedback-driven metacognition. With **Powerful Teaching**, you will: Develop a deep understanding of powerful teaching strategies based on the science of learning Gain insight from real-world examples of how evidence-based strategies are being implemented in a variety of academic settings Think critically about your current teaching practices from a research-based perspective

## **Psychology: IB Study Guide**

Written by two experienced psychology teachers, this is the second edition of Psychology Sorted Book 1, in the recent series for students and teachers. It is structured to help them understand and select from the wealth of psychological research that is relevant to the IB Diploma Psychology syllabus. The book has been developed independently of the International Baccalaureate Organization (IB), which in no way endorses it. However, the topics and content are especially chosen to be relevant to the 2019 IB Diploma psychology curriculum, while also providing useful support to teachers and students of other curricula, including those taught as part of university courses. This second edition has been updated to include new material suggested by the IB in December 2019. The book provides organised overview grids suggesting classic and recent key studies for the core biological, cognitive and sociocultural approaches. Links are made between content and studies from other areas, including the options. There are hyperlinks and details for further relevant resources, journal articles and media talks and summaries of every study, written in clear language and including evaluation points. The authors have also included critical thinking suggestions for each topic and a full bibliography and author index. Further support is available from the authors' Psychology Sorted blog and their Psychology Sorted Facebook page
