In My Mind's Eye

The National Institute of Mental Health states that half of bipolar diagnoses occur before the age of twenty-five, so the teenage years are a prime time for first showing symptoms. There are nearly six million people with bipolar disorder in the United States alone. This book clearly explains the four main types of the disorder, symptoms, getting a diagnosis and dealing with it, medications that are prescribed, support systems, lifestyle changes and strategies to keep calm, self-monitoring plans, and ways to manage school, family, and social life.

Through the Eyes of a Champion

Living with wolves has provided Tracy with countless experiences that have changed her life in unimaginable ways. As a cofounder of Mission: Wolf, a wolf sanctuary in Colorado, Tracy has spent half her life studying wolf behavior and body language. Tracy has learned to leash train and walk wolves, often with painful consequences. Join Tracy as she develops a special bond with an intense British Columbian gray wolf named Shaman. Shaman becomes a great wolf teacher, and eventually the shy wolf grows to trust her. Tracy relies on her instinct and intuition as she moves to calm sensitive wolves like Shaman. She does well but believes in her heart that she can do better. A horse named Ikus comes into Tracy's life and dramatically changes her understanding of horse-to-person communication. Driven to find her own way to connect with horses, Ikus becomes a professor in nature's university as Tracy embarks on a journey of learning to speak horse language. Something profound happens when Ikus, a horse with an attitude and a dislike of being haltered, gives Tracy an unexpected lesson in resolving feral behavior. Not only does Ikus teach Tracy how to stop his run-away glitch but Tracy discovers a missing link in her previous wolf-handling life that will forever change her approach to resolving feral behavioral problems in both species. This experience ultimately provides Tracy with a foundation for clear communication, and it awakens in her an effective and natural way to connect with animals. Tracy's world of wolves and horses is forever inspired as she moves to a new level of connection beyond anything she believed possible, and she strives to share what she has learned. Sally, a young woman from the UK, comes to volunteer at the sanctuary and learns to calm a very frightened eighteen-year-old horse who is going blind and in danger of injuring himself. Mind's Eye

A philosophical inquiry into the strengths and weaknesses of theism and naturalism in accounting for the emergence of consciousness, the visual imagination and aesthetic values. The authors begin by offering an account of modern scientific practice which gives a central place to the visual imagination and aesthetic values. They then move to test the explanatory power of naturalism and theism in accounting for consciousness and the very visual imagination and aesthetic values that lie behind and define modern science. Taliaferro and Evans argue that evolutionary biology alone is insufficient to account for consciousness, the visual imagination and aesthetic values. Insofar as naturalism is compelled to go beyond evolutionary biology, it does not fare as well as theism in terms of

explanatory power.

Pennsylvania School Journal

Young people with bipolar disorder and adults who grew up with the condition speak out to share how they experienced the symptoms of this illness during their youth, and how it affected their functioning in school, at home and with friends. Their insightful comments, woven together by the author, form a stunning picture of the young person's internal experience. The reader will come away with a new understanding of these young people and a renewed commitment to make a difference by reaching out to help. "Tracy Anglada has broken new ground with Intense Minds. While most books speak about the children and their feelings, hers is the first to capture the children articulating what they truly feel themselves: their impossible levels of frustration and irritability, their episodes of emptiness or manic energy, their severe difficulties in the academic environment, and their dread of night time due to their propensity to suffer horrific images and scenarios while sleeping. "One comes away with such admiration for these children and adolescents for soldiering on despite these terrible burdens, and for the author who took the time to listen and put their words to paper. Parents, clinicians and educators must read this first-of-its-kind book." Demitri F. Papolos, M.D. and Janice Papolos Authors of The Bipolar Child

Mind

Set during the short, dark days of a Michigan winter, *The Mind's Eye* takes the reader into the psychoanalytic consulting room and into the mind of Ivan Weiss, a gifted but troubled, psychoanalyst. Weiss' life is disintegrating. His daughter was recently raped, the clinic he directs is facing a sexual harassment charge, and paranoid worries about his wife's fidelity, which had plagued him in the past, are resurfacing. When his wife disappears, leaving an enigmatic note, and his daughter goes missing, his world totally flies apart. The story ranges from the quiet of the analytic consulting room in Ann Arbor to the south of France to a police chase in the devastated areas of downtown Detroit. It is about the present and secrets from the past.

You promised the girls that tonight you would go with them to see that new movie. You are dressed and about to leave the house when your significant others comes through the door. He takes one glaring look and begins to assault you. With your mouth busted and bleeding he growls, now you can go out! Let's face it most of us have encountered a domestic violent/abusive situation at least once or twice in our lives. The problem with Domestic violence or abuse of any kind is that the underlying force is spiritual in nature, and it must be fought with spiritual weapons. But that seems incredible. How can you fight an attitude that's so pervasive? What seems incredible or impossible for you, is very credible and possible for God to do in you, and through you. Did you ever think that your life of abuse, the things that you encountered would some day help others to overcome their abuse? Did you think that God would use your life no matter how tattered, ripped, and torn to help mend others? He can if you would allow Him. The story of your life: the abuse, mistreatment, injury, and insults you have encountered are likewise the story of God's love for you. God the Son withstood the most gruesome abuse, and ultimate death by man, His own creation, to redeem you back to the Father; that's real love. Therefore, this recovery plan is to help you to be renewed in your mind, body and spirit so you can help yourself and others to be delivered from domestic violence. Renewing Your Mind through Biblical Principles is God's recovery plan for you. And it will work, if you work the plan He has given_ His Word.

A Treatise concerning the Principles of Human Knowledge With prolegomena, and with annotations, select, translated and original, by Charles P. Krauth

Shut Up About Your Perfect Kid

This book is a discussion of some of the major philosophical problems centering around the topic of sense perception and the foundations of human knowledge. It begins with a characterization of our common sense understanding of the role of the senses in the acquisition of belief, and it argues that scientific accounts of the processes of perception undermine salient parts of this understanding. The naive point of view of direct realism cannot be sustained in the light of a scientifically instructed understanding of perception. This critique of direct realism points to the correctness of the representative theory of perception characteristic of such early modern philosophers as Descartes and Locke, and it also endorses the subjectivism that they defended. It argues that these positions do not require introducing sense data into the picture, and thus it avoids the intractable problems that the sense datum philosophy introduces. In addition, several versions of cognitive accounts of sense perception are criticized with the result that it is unnecessary to characterize sensory processes in intentional terms. The book then turns to a leading question introduced into modern philosophy by Descartes and Locke, the question of the accuracy of the information delivered by the senses to our faculty of belief. In particular, how accurate are our representations of the secondary qualities? The case of color is considered in detail.
