### **Parenting Matters**

Atlas of Mycobacterium Tuberculosis reveals in-depth information about mycobacterium tuberculosis which has never before been reported. Using atomic force microscopy (AFM), the in-depth phenotypic interaction that occurs in different stages of the tuberculosis lifecycle is illustrated, including resting, exponential, and dormant states. Coverage also includes the macroscopic and microscopic anatomy of mycobacterium, including pigmentation, morphology of colonies, size and shape, and the phenotypic changes from susceptible to resistant, all shown with images from electronic and atomic force microscopes. This book will open a new window into the results of molecular changes at the cellular level, guiding researchers and scientists to think in new ways about the area of cell wall and the reproductive and drug resistance phenomena surrounding tuberculosis. Identifies the different stages and morphological aspects of mycobacterium tuberculosis with the use of new microscopy techniques Includes never-before-seen photographs from the personal collection and scientific achievement of the authors Outlines the nature of the lifecycle of mycobacterium tuberculosis in relation to adaptation in humans

### **Obat-obat penting**

Indonesia berada di peringkat ketiga dengan jumlah penderita TB terbanyak di dunia. Tahun 2019 tercatat sekitar 845.000 penduduk di Indonesia menderita penyakit tuberkulosis. Banyak sekali faktor mengapa angka kasus TB di negara kita sangat banyak. Mulai dari kepadatan penduduk, sosio-ekonomi masyarakat yang buruk, wawasan masyarakat tentang tuberkulosis yang kurang dan lain-lain. Untuk mengatasi masalah-masalah ini tentunya membutuhkan waktu yang lama serta strategi yang tepat pula. Judul buku "Indonesia Bebas Tuberkulosis" merupakan impian penulis sejak dulu. Penulis tertarik untuk mencari tahu mengapa kuman tuberkulosis ini sulit sekali untuk dieliminasi padahal tuberkulosis dapat sembuh dengan pengobatan yang tepat. Sehingga penulis tergelitik untuk menulis buku ini. Buku ini terdiri dari kumpulan-kumpulan artikel oleh penulis tentang tuberkulosis. Penulis berupaya membuat tulisan dengan topik yang unik dan menarik dengan gaya bahasa yang enak dibaca. Harapannya melalui tulisan-tulisan ini, wawasan dan juga pengetahuan pembaca mengenai tuberkulosis dapat bertambah sehingga dapat pula berkontribusi mengeliminasi tuberkulosis di Indonesia.

#### **The Global Rise of Authoritarianism in the 21st Century**

Since its publication in 1987, *Methods for the economic evaluation of health care programmes* has become the standard textbook in this field world-wide. Over the past ten years, the field of economic evaluation in health care has expanded considerably, with a rapid rise in the number of published studies, and wider recognition of their use in health care decision-making. Developments in economic evaluation have also led to the publication of several guidelines for study methodology, most recently those proposed by the United States Public Health Services Panel. The new edition of *Methods for the economic evaluation of health care programmes* follows the same basic structure as the first edition. The key methodological principles are outlined using a critical appraisal checklist that can be applied to any published study. The methodological features of the basic forms of analysis (cost analysis, cost-effectiveness analysis, cost-utility analysis, and cost-benefit analysis) are then explained in more detail. The book has been greatly revised and enlarged, especially with respect to cost-utility and cost-benefit analysis, where major methodological developments have taken place. New to this edition are chapters on collecting and analysing data, and presenting and using economic evaluation results. The new edition will be required reading for anyone commissioning, undertaking, or using economic evaluations in health care, and will be popular with health service professionals, health economists, and health-care decision makers. Reviews of the first edition: 'An important contribution to studies on the economic evaluation of medical care' (British Medical Journal) 'This is essential reading. Only if all managers are aware of the powers of economic techniques will they be used sensibly' (The Health Service Journal (UK)) 'The methodological chapters on cost analysis and cost utility analysis are gems should become the standard text on the subject at the intermediate level at which it is aimed.' (Medical Decision Making) 'It leaves nothing important in economic evaluation analysis untouched.' (Health Policy and Planning)

### **Family Nursing**

Neoliberal globalization is in deep crisis. This crisis is manifested on a global scale and embodies a number of fundamental contradictions, a central one of which is the global rise of authoritarianism and fascism. This emergent form of authoritarianism is a right-wing reaction to the problems generated by globalization supported and funded by some of the largest and most powerful corporations in their assault against social movements on the left to prevent the emergence of socialism against global capitalism. As the crisis of neoliberal global capitalism unfolds, and as we move to the brink of another economic crisis and the threat of war, global capitalism is once again resorting to authoritarianism and fascism to

maintain its power. This book addresses this vital question in comparative-historical perspective and provides a series of case studies around the world that serve as a warning against the impending rise of fascism in the 21st century.

Decades of research have demonstrated that the parent-child dyad and the environment of the family "which includes all primary caregivers" are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing

demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

### **Diabetes Demystified**

Adult Nursing Practice: Using evidence in care enables today's students and newly qualified nurses develop the knowledge and skills they need to deliver, and lead care tomorrow. Reflecting the principles of evidence-based care in line with the current NMC competencies, this textbook helps students learn to manage patients with common conditions and fundamental health needs so they can provide the best possible evidence-based care. Written, and edited by leading nurses from practice, education and research, it focuses on common diseases, fundamental health needs, and symptoms that nurses' encounter in daily practice. Conditions are clearly explained so that the causes of ill health are easily understood. ### **An Introduction to Health Psychology**

Although efforts have been made and continue to be made to reduce the rate of HIV transmission in the U.S. and globally, the rates continue to increase in the majority of countries. In the U.S., members of minority communities remain especially at risk of HIV transmission. An individual's discovery that he or she has contracted HIV, or that a loved one has contracted the illness, often raises significant issues that necessitate interaction with mental health professionals. *Mental Health Practitioner's Guide to HIV/AIDS* serves as a quick desk reference for professionals who may be less familiar with the terminology used in HIV/AIDS care and services.

### **Tuberculosis**

Winner of a 2009 Shingo Research and Professional Publication Prize. Drawing on his years of working with hospitals, Mark Graban explains why and how Lean can be used to improve safety, quality, and efficiency in a healthcare setting. After highlighting the benefits of Lean methods for patients, employees, physicians, and the hospital itself, he explains how Lean manufacturing staples such as Value Stream Mapping and process observation can help hospital personnel identify and eliminate waste in their own processes — effectively preventing delays for patients, reducing wasted motion for caregivers, and improving the quality of care. Additionally, Graban describes how Standardized Work and error-proofing can prevent common hospital errors and details root cause problem-solving and daily improvement processes that can engage all personnel in systemic improvement. A unique guide for healthcare professionals, *Lean Hospitals* clearly elaborates the steps they can take to begin the proactive process of Lean implementation. The book has an accompanying website with more information. Mark Graban was quoted in a July 2010 *New York Times* article about lean hospitals. \*Given the increase in candidates from the health services sector, the Lean Certification and Oversight Appeals committee has approved *Lean Hospitals* by Mark Graban as recommended reading in pursuit of the Lean Bronze Certification exam. Mark Graban speaks about his book on the CRC Press YouTube channel.

## **Mingguan hidup**

Enam tahun sudah berlalu sejak edisi ke-6 buku ini. Telah banyak perkembangan baru di bidang farmakoterapi, khususnya farmakogenetika, targeted therapy dan stemcell untuk terapi regeneratif. Dalam Edisi ke-7 ini, akan diuraikan obat-obat mutakhir yang dibuat melalui bioteknik rekombinan seperti biologicals, termasuk sitokin-sitokin, zat-zat pemblokir Tumor Necrosis Factor, interferon, penghambat interleukin, perintang tirosin kinase dan monoklonal antibodies (MOABs). Biological Response Modifier atau imunomodulator semakin banyak disintesa (Humira, Remicade) yang memegang peranan penting pada penanganan penyakit berdasarkan reaksi (auto-) imun. Misalnya penyakit rema, diabetes tipe- 1, MS (multiple sclerosis), jenis-jenis neoplasma (kanker) dan SLE (Systemic Lupus Erythematoses). Selanjutnya akan dipaparkan obat-obat kanker baru yang berkembang dalam delapan tahun terakhir, antara lain temsirolimus dan sunitinib untuk kanker ginjal terminal, dan lapatinib untuk kanker payudara lanjut. Sitostatika baru dengan mekanisme kerja yang berlainan adalah tirosin kinase inhibitor, topoisomerase inhibitor (irinotecan, etoposida) dan zat-zat antimetabolit (gemcitabin). Untuk topik geriatri akan diuraikan bahaya efek samping obat-obat tertentu bagi para lansia sehubungan dengan perubahan metabolisme, homeostasis, degenerasi organ-organ dan comorbiditas.

## **Tempo**

This classic text by the creators of the PRECEDE/PROCEED model provides a comprehensive overview of the principles and processes of health promotion planning. It is an invaluable up-to-date resource for students and practitioners in health education and health promotion. Each chapter includes references and extensive endnotes from the most current literature and is backed by the authors' reputations as leading researchers and practitioners in the field.

## **Principles of Composite Material Mechanics**

Predicting Health Behaviour provides the theoretical background and examples of how to apply the most common social cognition models to the explanation of health behaviours. Each chapter has been written by key researchers in the area, and they follow a common structure which enables this book to be read as a 'user-manual'. Each chapter provides a general review of relevant research, applying the model to a variety of health behaviours (such as dietary choice, screening behaviour and sex) and discussing the strengths and weaknesses of models including the health belief model, protection motivation theory, the theory of planned behaviour, health locus of control and self-efficacy. The final chapter includes a critique of the general approach, and signposts future directions for research.
