Marriage Bargain with His Innocent

Since the end of the Cold War so-called experts have been predicting the eclipse of America's "special relationship" with Britain. But as events have shown, especially in the wake of 9/11, the political and cultural ties between America and Britain have grown stronger. Blood, Class and Empire examines the dynamics of this relationship, its many cultural manifestations—the James Bond series, PBS "brit Kitsch," Rudyard Kipling—and explains why it still persists. Contrarian, essayist and polemicist Christopher Hitchens notes that while the relationship is usually presented as a matter of tradition, manners, and common culture, sanctified by wartime alliance, the special ingredient is empire; transmitted from an ancien regime that has tried to preserve and renew itself thereby. England has attempted to play Greece to the American Rome, but ironically having encouraged the United States to become an equal partner in the business of empire, Britain found itself supplanted.

Formative Assessment & Standards-Based Grading

In the biblical narratives, women are usually minor characters in the stories of men. Fragments of women's stories must be gleaned from the more cohesive stories of their fathers, husbands and sons. Fragmented Women begins with the premise that, to recover shards of women's stories from androcentric texts like the Bible, it is necessary to step outside the ideology of the text, subverting the patriarchal perspective that has focused attention on the male characters. In this important new work, the author draws on contemporary feminist literary theory to critique the dominant male voice of the biblical narrative and to construct (sub)versions of women's stories from the submerged strains of their voices in men's stories.

Have a Word on Me

From one-celled paramecium to giant blue whales, we all have internal clocks that regulate the rhythms we live by. In *The Living Clock*, John Palmer, one of the world's leading authorities on these rhythms, takes us on a tour of this broad and multifaceted subject, examining everything from glowing fruit flies to the best cures for jet lag. Palmer has a wonderful sense of humor and an eye for the startling fact. We learn that fiddler crabs--in a lab where there are no time nor tide cues--remain active when low tide would occur and motionless during high tide, the same pattern they follow in their natural habitat. (In fact, you can remove a crab's leg and the leg will keep a tidal rhythm as long as it's kept alive.) Moreover, humans are subject to more than one hundred biological rhythms. Mental acuity peaks in the afternoon, for instance, and our blood pressure peaks at seven in the morning (when most heart attacks occur). The time of day you take medication can affect how well it works. And Palmer shows that when our clocks are thrown off kilter, trouble follows, especially for rotating shift workers--the Bhopal spill, the

Chernobyl reactor explosion, and the Three Mile Island accident all happened when new crews began early-hour shifts. No one has discovered exactly how our internal clocks work--Palmer says a Nobel Prize awaits that lucky scientist--but they are no less fascinating for their inexplicable nature. Frequently amusing and always eye-opening, *The Living Clock* is a treat for everyone curious about the nature of life as well as anyone planning a long jet flight.
