Franco Albini's works of architecture and design, produced between 1930 and 1977, have enjoyed a recent revival but to date have received only sporadic scholarly attention from historians and critics of the Modern Movement. A chorus of Italian voices has sung his praises, none more eloquently than his protégé, Renzo Piano. Kay Bea Jones' illuminating study of selected works by Studio Albini will reintroduce his contributions to one of the most productive periods in Italian design. Albini emerged from the ideology of Rationalism to produce some of Italy's most coherent and poetic examples of modern design. He collaborated for over 25 years with Franca Helg and at a time when professional male-female partnerships were virtually unknown. His museums and installation motifs changed the way Italians displayed historic artifacts. He composed novel suspension structures for

dwellings, shops, galleries and his signature INA pavilions where levity and gravity became symbolic devices for connoting his subjects. Albini clarified the vital role of tradition in modern architecture as he experimented with domestic space. His cohort defied CIAM ideologies to re-socialize postwar housing and speculate on ways of reviving Italian cities. He explored new fabrication technologies, from the scale of furniture to wide-span steel structures, yet he never abandoned the rigors of craft and detail in favor of mass-production. *Suspending Modernity* follows the evolution of Albini's most important buildings and projects, even as they reveal his apprehensive attitudes about the modern condition. Jones argues here that Albini's masterful use of materials and architectural expression mark an epic paradigm shift in the modern period.

There are over 2000 registered historic buildings in Shanghai, with hundreds more waiting to be added. Most are pre-War structures and are either Western buildings, or Chinese-style buildings with a distinct Western influence. These include villas, offices, apartment buildings and shikumen (a house of both wood and brick). Structures were selected for this book because of the interesting stories behind them or because they were related to a topical news event.

The United States at War

Once a pristine, natural paradise, CHIMA has become a battle ground for eight animal tribes. Best friends are now enemies. The animals fight for control of a natural resource called CHI, a powerful element that is both a source of life and potential destruction. Only a few brave heroes in CHIMA understand the true nature of CHI, and the possible downfall of CHIMA that will result from its misuse. Their stories, and the stories of those who seek to destroy them, are known as THE LEGENDS OF CHIMA. The third volume in the hit series continues the adventures of

Laval and his fellow members of the Lion tribe as they fight against Prince Cragger & the Crocodile tribe to preserve the balance of the mysterious force known as Chi.

Supernatural premiered on September 14, 2005, on what was then called the WB Network. Creator Eric Kripke was inspired by Jack Kerouac's *On The Road*, putting his heroes, brothers Sam and Dean Winchester, in a big black '67 Impala and sending them in search of the urban legends that fascinated him. The series attracted a passionate fan base from the start and was described as a "cultural attractor" that tapped into the zeitgeist of the moment, reflecting global fears of terrorism with its themes of fighting unseen evil. The chemistry between the lead actors, Jared Padalecki and Jensen Ackles, contributed to the show's initial success, and Supernatural found its niche when it combined demon-hunting adventures with a powerful relationship drama that explored the intense, complicated bond

between the brothers. Supernatural is as much a story of familial ties, love, and loyalty as it is of "saving people, hunting things." Fan Phenomena: Supernatural explores the ongoing fascination and passion for a show that developed a relationship with fans through eight seasons and continues to have an impact on fan culture to the present day. Essays here explore the rich dynamic that has developed between fans and producers, actors, writers, directors, the show creator, and showrunners through online interactions on Twitter and Facebook, face-to-face exchanges at conventions, and representations of fandom within the show's meta-episodes. Contributors also explore gender and sexuality in the show and in fan art; the visual dynamics, cinematography, and symbolism in the episodes as well as the fan videos they inspire; and the culture of influence, learning, and teaching in the series.

Das Rheingold, Die Walküre, and Siegfried. Parsifal. Tristan und Isolde. Both revered and reviled, Richard Wagner conceived some of the nineteenth century's most influential operas—and created some of the most indelible characters ever to grace the stage. But over the course of his polarizing career, Wagner also composed volumes of essays and pamphlets, some on topics seemingly quite distant from the opera house. His influential concept of Gesamtkunstwerk—the “total work of art”—famously and controversially offered a way to unify the different media of an opera into a coherent whole. Less well known, however, are Wagner's strange theories on sexuality—like his ideas about erotic acoustics and the metaphysics of sexual difference. Drawing on the discourses of psychoanalysis, evolutionary biology, and other emerging fields of study that informed Wagner's thinking, Adrian Daub traces the dual influence of Gesamtkunstwerk and eroticism from their classic expressions in Tristan und Isolde into the work of the generation of composers that followed, including Zemlinsky, d'Albert, Schreker, and Strauss. For decades after Wagner's death, Daub writes, these composers continued to

grapple with his ideas and with his overwhelming legacy, trying in vain to write their way out from Tristan's shadow.

Volume Two of 'Imagine, A World Without DIS-EASE' is an autobiographical narrative of the Genesis II Church of Health and Healing told by the Co-founder, Mark S. Grenon. This Amazing Journey started back in 2006 where Mark , then a missionary pilot in the Dominican Republic was working with medical teams in the D.R. and in Haiti when he contracted MRSA, a staph infection along with his three sons while working as interpreters. The MRSA spread to all of his 8 children! Nothing worked to kill this infection. After months of using the 'latest and greatest' antibiotics known at that time, it was getting worse! In desperation to save his son, Jonathan's leg, he found a free eBook on the internet written by a miner named Jim Humble. That book, 'Breakthrough, The Miracle Mineral Supplement of the 21st

Century' not only 'restored health' for him and his family from the MRSA but put him on a path that changed his life! Mark and his sons, Jonathan and Joseph went on to help hundreds in the D.R. and Haiti 'restore health' from many different illnesses such as: Diabetes, AIDS, Dengue, Gastritis, Cancer, to name just a few. In 2010, Jim Humble came to live with the Grenon Family at their mission compound in Barahona, D.R. where they founded the G2Church. The G2Church has grown today as of January 2020, to over 3,700 members in 145+ countries with 1997 Health Ministers, 115 Bishops and 252 Church Chapters. For the past 3 years, 10+ testimonies of 'restored health' from 95% of the illnesses in this world are coming in and being read in the free weekly G2Church Newsletter www.g2churchnews.org and on the weekly G2Voice Broadcast at: www.g2voice.is. This book will cover this incredible story starting in 2006 to 2014. May the Lord use this book to help many 'restore health!' Mark S. Grenon

Personality

What makes us human? In recent decades, researchers have focused on innate tendencies and inherited traits as explanations for human behavior, especially in light of groundbreaking human genome research. The author thinks this trend is misleading. As he shows in great detail in this engaging, thought-provoking, and highly informative book, what makes our species unique is our marvelous ability to learn, which is an ability that no other primate possesses. In his exploration of

human progress, the author reveals that the immensity of human learning has not been fully understood or examined. Evolution has endowed us with extremely versatile bodies and a brain comprised of one hundred billion neurons, which makes us especially suited for a wide range of sophisticated learning. Already in childhood, human beings begin learning complex repertoires—language, sports, value systems, music, science, rules of behavior, and many other aspects of culture. These repertoires build on one another in special ways, and our brains develop in response to the learning experiences we receive from those around us and from what we read and hear and see. When humans gather in society, the cumulative effect of building learning upon learning is enormous. The author presents a new way of understanding humanness—in the behavioral nature of the human body, in the unique human way of learning, in child development, in personality, and in abnormal behavior. With all this, and his years of basic and applied research, he develops a new theory of human evolution and a new vision of the human being. This book offers up a unified concept that not only provides new ways of understanding human behavior and solving human problems but also lays the foundations for opening new areas of science.
