The Oxford Handbook of Critical Management Studies

This handbook is the first resource to provide a scientific analysis of the nature of compliance. It examines the subject from such crucial and varied perspectives as ethics, behavioral science, risk management, accounting, and European and international law. Much more than a critical approach to the existing practice of supervision, it provides a wealth of information, guidance, and valuable insights for the day-to-day work of compliance officers. With chapters contributed by lecturers of VU University Amsterdam's flourishing post-doctoral Executive Master Program in Compliance and Integrity Management – which fosters alternatives such as greater trust in self-regulation and market discipline – the book explores such aspects of compliance and integrity management as the following: • monitoring risk compliance and integrity; • stakeholder and reputation management; • conflicts of interest; • anti-bribery; • export controls; • extraterritorial jurisdiction of U.S. legislation; • fraud; • duty of care; • market abuse; • privacy; and • competition. The analysis throughout is supported by a comprehensive study of the literature concerning the *raison d'être* of supervision and regulation. Meeting the need for an in-depth analysis of the expanding field of compliance and integrity

management, this book is a milestone in a field that is rapidly growing in importance across a wide spectrum of business and professional activity. It will prove an essential practical resource for company or institutional officers worldwide in setting up a compliance function in their organization. Well known as a consultant in compliance-related matters, Sylvie C. Bleker-van Eyk is currently Senior Director at PricewaterhouseCoopers Forensic Services, Chair of the Supervisory Committee on Monitoring Anti-Money Laundering Policy at WODC, the Research and Documentation Centre of the Netherlands Ministry of Security and Justice, and Professor and Program Director of Postgraduate Education in Compliance and Integrity Management at VU University Amsterdam. Raf A. M. Houben is Head of Compliance and Security at HDI Global SE-The Netherlands in Rotterdam, and program coordinator and lecturer at the same Postgraduate Education in Amsterdam.

Critical Management Studies (CMS) has emerged as a movement that questions the authority and relevance of mainstream thinking and practice. Critical of established social practices and institutional arrangements, it challenges prevailing systems of domination and promotes the development of alternatives to them. CMS draws upon diverse critical traditions. Of particular importance for its initial articulation was the thinking of members of the Frankfurt School of Critical Theory.

From these foundations, CMS has grown into a pluralistic and inclusive movement incorporating a diverse range of perspectives - ranging from labour process theory to radical feminism. In recent times, a set of ideas broadly labelled 'poststructuralist' have been developed to complement and challenge the insights of Critical Theory, giving new impetus for scholars seeking to challenge the status quo and articulate a more inclusive and humane future for management practice. The Oxford Handbook of Critical Management Studies provides an overview of theoretical approaches, key topics, issues, and subject specialisms in management studies, as well as a set of reflections on the progress and prospects of CMS. Contributors are all specialists in the respective fields and share a concern to interrogate and challenge received wisdom about management theory and practice. Given the rapid growth of the CMS movement, its ever increasing theoretical and geographical diversity and its outreach into the public sphere, The Oxford Handbook of Critical Management Studies is a timely publication. In addition to UK contributors, where CMS has developed most rapidly, there is strong representation from North American contributors as well as from areas where CMS has taken hold more recently, such as Australasia.

PPC's Guide to Managing an Accounting Practice

The perspective of this book is to present "ethics" as a conversation about how we decide what is good or bad, right or wrong. It is a collection of conversations employed by educators to assist accounting students in developing their understanding of accounting's ethical aspects and to help them develop into critical thinkers who consider the ethical complexities of the function of accounting in human society. Because we are social beings, ethics is a central human concern, since it involves determining the ethicality of human actions and their effect on other individuals, as well as determining the collective societal acceptance or rejection of an action. Thus, the book's primary goal is to call attention to the intersectionality of accounting and ethics and to encourage students and researchers to consider the ethical implications of accounting decisions. The book contains a diversity of perspectives within which discussions of accountants' and accounting's ethical responsibilities may occur. The contributing authors were deliberately chosen for their diverse perspectives on whence moral guidance for accounting may come. Each chapter stands on its own and represents the thinking of its authors. The book is not a primer on correct behavior for accountants but a place where educators may spur the conversation along.
