USMLE Step 2 CK QBook

This book of MCQs is based on past college questions and covers the complete range of topics which commonly appear in the MRCOG examination. It includes correct answers, teaching notes, a self-marking scheme and two complete practice examinations which provide a good method of self-assessment for candidates. The book also includes a recommended reading list for further study and an MCQ revision index for easy reference to specific topics.

Crash Course Cardiology

This 2003 book is a comprehensive and highly illustrated guide to micromanipulation techniques in assisted conception in a clinical setting.

Learn ECG in a Day

USMLE Platinum Notes Step 1

Reflecting recent changes to the exam, MRCOG Part 1: 400 SBAs has been completely updated to include questions and answers in the SBA format only. With 25% new content, MRCOG Part 1: 400 SBAs offers the most up-to-date and comprehensive set of practice questions for trainees preparing for the MRCOG Part 1 exam. Chapters are mapped to the syllabus to deliver structured revision in all the key topics tested in the exam. Featuring a wealth of practice questions and fully descriptive answers, this book provides the essential revision text to maximise chances of exam success. 400 single best answer questions, reflecting the breadth of topics encountered in the actual exam Answers feature concise descriptions to consolidate knowledge and understanding Extensive evidence-based referencing to relate theory to clinical practice Previous edition published June 2013 (9781907816369)

Revision Notes for the MRCOG

This concise revision text brings together the fundamentals of the basic sciences required for Obstetrics and Gynaecology trainees to pass the MRCOG Part 1 exam. A note-style format and over 100 illustrations make this the ideal revision guide to passing the exam.

100 Cases in Obstetrics and Gynaecology

The new edition of this canonical text on male reproductive medicine will cement the book's market-leading position. Practitioners across many specialties - including urologists, gynecologists, reproductive endocrinologists, medical endocrinologists and many in internal medicine and family practice - will see men with suboptimal fertility and reproductive problems. The book provides an excellent source of timely, well-considered information for those training in this young and rapidly evolving field. While several recent books provide targeted 'cookbooks' for those in a male reproductive laboratory, or quick reference for practising generalists, the modern, comprehensive reference providing both a background for male reproductive medicine as well as clinical practice information based on that foundation has been lacking until now. The book has been extensively revised with a particular focus on modern molecular medicine. Appropriate therapeutic interventions are highlighted throughout.

SBA MCQs for the MRCS

This book includes MCQs in the basic sciences that underpin the study of obstetrics and gynaecology, as is examined in Part 1 of the membership examination. Following the syllabus recommended by the RCOG, the questions are arranged in papers of 60 questions, each question having 5 stems with True/False answer options. Full answers with explanatory text will be provided. Where appropriate the answers will be supplemented by key message boxes and footnotes to direct

further study - in this way the book can be used as a study guide as well as a tool for revision and self-assessment. A unique feature of the book will be the accompanying CD-ROM. Using this the candidate will be able to select at random questions to make up a practice paper which they can sit under 'examination conditions'. When the candidate has completed the mock examination the program will calculate their scores and indicate whether this would represent a 'good pass / pass / borderline pass or fail'. As with the text, full explanations of the answers will be provided.

Infertility in the Male

The revised and updated second edition of a multidisciplinary, evidence-based clinical guide for the care of pregnant women with diabetes The second edition of A Practical Manual of Diabetes in Pregnancy offers a wealth of new evidence, new material, new technologies, and the most current approaches to care. With contributions from a team of international experts, the manual is highly accessible and comprehensive in scope. It covers topics ranging from preconception to postnatal care, details the risks associated with diabetic pregnancy, and the long-term implications for the mother and baby. The text also explores recent controversies and examines thorny political pressures. The manual's treatment recommendations are based on the latest research to ensure pregnant women with diabetes receive the best possible care. The text takes a multi-disciplinary

approach that reflects best practice in the treatment of diabetes in pregnancy. The revised second edition includes: New chapters on the very latest topics of interest Contributions from an international team of noted experts Practical, state-of-the-art text that has been fully revised with the latest in clinical guidance Easy-to-read, accessible format in two-color text design Illustrative case histories, practice points, and summary boxes, future directions, as well as pitfalls and what to avoid boxes Multiple choice questions with answers in each chapter Comprehensive and practical, the text is ideal for use in clinical settings for reference by all members of the multi-disciplinary team who care for pregnant women with diabetes. The manual is also designed for learning and review purposes by trainees in endocrinology, diabetes, and obstetrics.

MRCOG Part 1: 400 SBAs

Reflecting recent changes to the exam, MRCOG Part 2: 500 SBAs and EMQs, Second Edition has been completely updated to include questions and answers in the new SBA format. With over 50% new content, MRCOG Part 2: 500 SBAs and EMQs offers the most up-to-date and comprehensive set of practice questions for trainees preparing for the MRCOG Part 2 exam. Chapters are mapped to the syllabus to deliver structured revision in all the key topics tested in the exam. Featuring a wealth of practice questions and fully descriptive answers, this book provides the essential revision text to maximise chances of exam success. Key

Points 500 questions, comprising 250 SBAs and 250 EMQs, reflecting the breadth of topics encountered in the actual exam Questions structured around MRCOG syllabus core modules, ensuring complete coverage for the exam Answers feature concise descriptions to consolidate knowledge and understanding Extensive evidence-based referencing to relate theory to clinical practice Visually-enhanced answers to improve understanding of key concepts

MRCOG Part One

The EMQ element constitutes 60% of the new MRCOG Part 2 examination. Candidates therefore need to be well-versed in approaching this type of question and extensive practice in answering questions is recommended. This new book contains 150 sample EMQs, together with answers that have full detailed explanations and references for further reading – including RCOG resources such as Green Top Guidelines - to enhance knowledge and understanding. The book also contains a section of handy hints and tips on passing the examination to improve candidates' chances of success. EMQs for the MRCOG Part 2 is an invaluable study aid to help pass the EMQ component of the MRCOG Part 2.

A Practical Manual of Diabetes in Pregnancy

MRCOG Short Essay Questions is the essential aid for all trainees studying for the membership examination of the Royal College of Obstetricians and Gynaecologists. This book contains 150 short essay questions, clearly structured to facilitate both learning and practice. Questions are divided primarily into obstetrics and gynaecology and secondly by main topics such as infertility, operative gynaecology and antenatal care. The answers are written in the form of bullet points; a format that not only clearly identifies the key points but also emulates the structure of the model answers given to the examiners by the RCOG. Khaldoun Sharif is a consultant in obstetrics and gynaecology at the Birmingham Women's Hospital, and has a proven track record as an author of MRCOG revision books. His co-author, Parveen Abedin recently passed the examination and has therefore provided invaluable insights that have ensured the content is both appropriate and up-to-date.

MCQs for MRCOG

This book helps doctors to learn the basic sciences for obstetrics and gynaecology and to pass the MRCOG Part 1 exam by extending the reader's knowledge and understanding of the basic medical sciences and their relevance to obstetrics and gynaecology.

MRCOG Part 2: 500 SBAs and EMQs

Praise for the 1st edition: "This book is a must have for any midwife, particularly those working in the community, clinics and in high-risk areas. This book is an extremely useful reference tool." (MIDIRS Midwifery Digest) "The important facts are laid out concisely, primarily focusing on management, using evidence based guidelines for best midwifery practice." (RCGP Journal) Medical Disorders in Pregnancy: A Guide for Midwives, 2nd edition clearly outlines existing and pre-existing conditions which women can experience during pregnancy. This comprehensive and practical handbook identifies issues for pre-conception care, defines the condition, explores possible complications, outlines recommended treatment and emphasizes specific midwifery care. This fully revised and updated edition of Medical Disorders in Pregnancy: A Guide for Midwives builds on the success of the first edition by covering more subjects. It includes physiology, more illustrations and algorithms and its accessible reference-style text enables information to be quickly and easily found. Special Features A practical guide on medical disorders written specifically for midwives Jointly written by medical and midwifery experts in the field Accessible reference style format makes information easy and quick to find Emphasis on inter-professional working

SBA Questions for the Part 2 MRCOG

This book provides students with a comprehensive overview of the field of gynaecology. Presented in a question and answer format, the text begins with anatomy, histology and physiology. The following chapters examine different gynaecological disorders and diseases, including tuberculosis, injuries, ectopic pregnancy, benign lesions and pelvic inflammatory disease. The final chapters discuss imaging and instruments. Authored by Michigan University research scholar, Pramod TK, this easy to understand, quick reference guide includes more than 180 images, illustrations, tables and flow charts. Useful mnemonics have been included to assist learning. Key points Comprehensive overview of gynaecology for students Presented in question and answer format Authored by Michigan University research scholar Includes useful mnemonics and more than 180 images, illustrations, tables and flow charts

Speroff's Clinical Gynecologic Endocrinology and Infertility

SBA Questions for the Part 2 MRCOG is a valuable preparation resource aimed at those specialising in obstetrics and gynaecology who are planning to take the Part 2 MRCOG examination. It contains two hundred practice single best answer questions written by MRCOG question writers, with accompanying explanations and references. It also contains an introduction to the new format of the examination and the rationale for the changes. The first section consists of two hundred single best answers allowing the reader to test their knowledge. The

second section lists the correct response accompanied by an explanation and suggestions for further reading. SBA Questions for the Part 2 MRCOG is the only official preparation book produced by the RCOG and is therefore essential reading for candidates sitting this examination in its new format.

Medical Disorders in Pregnancy

Crash Course – your effective every-day study companion PLUS the perfect antidote for exam stress! Save time and be assured you have the essential information you need in one place to excel on your course and achieve exam success. A winning formula now for over 20 years, each series volume has been fine-tuned and fully updated – with an improved full-colour layout tailored to make your life easier. Especially written by senior students or junior doctors – those who understand what is essential for exam success – with all information thoroughly checked and quality assured by expert Faculty Advisers, the result are books which exactly meet your needs and you know you can trust. Each chapter guides you succinctly through the full range of curriculum topics, integrating clinical considerations with the relevant basic science and avoiding unnecessary or confusing detail. A range of text boxes help you get to the hints, tips and key points you need fast! A fully revised self-assessment section matching the latest exam formats is included to check your understanding and aid exam preparation. The accompanying enhanced, downloadable eBook completes this invaluable

learning package. Series volumes have been honed to meet the requirements of today's medical students, although the range of other health students and professionals who need rapid access to the essentials of cardiology will also love the unique approach of Crash Course. Whether you need to get out of a fix or aim for a distinction Crash Course is for you! Provides the exam syllabus in one place - saves valuable revision time Written by senior students and recent graduates - those closest to what is essential for exam success Quality assured by leading Faculty Advisors - ensures complete accuracy of information Features the ever popular 'Hints and Tips' boxes and other useful aide-mémoires - distilled wisdom from those in the know Updated self-assessment section matching the latest exam formats - confirm your understanding and improve exam technique fast

MRCOG Part 1: 550 SBAs and MCQs

As medical knowledge advances we tend to compartmentalise our specialties into smaller units; but, hand in hand with this, there is a growing understanding between the different disciplines within the caring professions. Thus we are able to share our special skills to the benefit of patients. This book is an excellent example of the advantage of interdisciplinary communication and demonstrates a refreshing holistic approach to the problems of incontinence and pelvic pain. Written with physiotherapists in mind, the editors have invited contributions from many distinguished experts in their own field. These have been compiled into a

comprehensive book, which will appeal to many healthcare professionals. I have had great pleasure in reading this book. During the time that I have been involved with 'pelvic dysfunction' there have been many exciting advances. These are all included in a most readable sequence, some presented with a refreshing new twist. In particular, I would like to bring to your attention the section on 'pelvic pain'. Because of our lack of understanding it has been a problem that is too often ignored and here at last are some practical ideas for therapeutic management. There is still much progress to be made in the field of incontinence and pelvic pain and as yet, no editors can be expected to produce a definitive work. However, I would like to recommend this book most strongly. It has a new approach to this topic, which is still a major problem for many people.

Single Best Answers for MRCOG

Written by experienced MRCOG question setters and course convenors, this text contains 500 practice questions with explanations and key references.

Assisted Reproduction Techniques

This book is a practical guide to obstetrics and gynaecology for trainees preparing for the MRCOG Part 2 examination. Beginning with a brief overview of general

principles, the rest of the book is clearly set into two sections – Obstetrics, and Gynaecology. Each of these sections is further divided to discuss the diagnosis and management of numerous disorders within each sub-specialty. The book has been written in accordance with the current MRCOG Part 2 curriculum and includes the very latest RCOG Green-top guidelines and NICE guidelines. Additionally, this comprehensive textbook features the latest statistics on maternal and perinatal mortality in the UK, published by MBRRACE-UK in December 2016. Key Points Practical guide to obstetrics and gynaecology for MRCOG Part 2 candidates Written in accordance with current MRCOG Part 2 curriculum Includes latest RCOG Green-top guidelines and NICE guidelines Features latest statistics on maternal and perinatal mortality from MBRRACE-UK

An Evidence-based Clinical Textbook in Obstetrics & Gynecology for MRCOG-2

One of the world's most widely read gynecology texts for nearly 50 years, Speroff's Clinical Gynecologic Endocrinology and Infertility provides a complete explanation of the female endocrine system and offers practical guidance for evaluation and treatment of common disorders. In this fully revised ninth edition, the editorial and author team from Yale School of Medicine have assumed the reins of Dr. Speroff's landmark work, retaining the clear, concise writing style and

illustrations that clarify and explain complex concepts. This classic text remains indispensable for students, residents, and clinicians working in reproductive endocrinology and infertility, bringing readers up to date with recent advances that have occurred in this fast-changing field.

Best Aid to Gynecology

USMLE Platinum Notes Step 1 and USMLE Platinum Notes Step 2 CK are the latest editions of these preparatory guides for the United States Medical Licensing Examination. Each book is entirely updated to equip students with the conceptual and clinical knowledge they need to score a 99 percentile in their exams. These guides include USMLE type questions based on the latest exam format, clinical correlations and case scenarios, with revision questions at the end of every topic. Enhanced by nearly 100 images and illustrations.

Part 2 MRCOG: 500 EMQs and SBAs

This excellent review guide contains 500 questions and answers organized by the 12 topics covered on Part 1 of the MRCOG examination. Also provides advice on how to approach the exam, and an appendix featuring Detailed Instructions for the Multiple Choice Question Papers issued by the RCOG. Written by a distinguished

team of authors.

MRCOG Part 1 Success Manual

A fully updated and illustrated handbook providing comprehensive coverage of all curriculum areas covered by the MRCOG Part 1 examination.

Practical Gastrointestinal Endoscopy

This book comprises MCQs that are designed to test the candidate's theoretical and practical knowledge of obstetrics and gynaecology as recommended in the syllabus for the MRCOG Part 2 examination. Upwards of 250 single and multiple stem questions will be included giving over 800 questions in all. Full answers with explanatory text will be provided. Where appropriate the answers will be supplemented by key message boxes and footnotes to direct further study - in this way the book can be used as a study guide as well as a tool for revision and self-assessment. A unique feature of the book will be the accompanying CD ROM. Using this the candidate will be able to select at random questions to make up a practice paper which they can sit under 'examination conditions'. When the candidate has completed the mock examination the program will calculate their scores and indicate whether this would represent a 'good pass / pass / borderline pass or fail'.

As with the text, full explanations of the answers will be provided.

MCQs for MRCOG Part 1

Reflecting the new exam format, MRCOG PART 1: 550 SBAs AND MCQs offers the most up-to-date and comprehensive coverage of practice questions, for trainees preparing for the MRCOG Part 1 exam. Presented in a clear layout, chapters are mapped to the syllabus to deliver structured revision in all the key topics. Featuring a wealth of practice questions and fully descriptive answers, this book provides the essential revision text to maximise chances of exam success. 550 questions, reflecting the breadth of topics encountered in the actual exam Answers feature concise descriptions to consolidate knowledge and understanding Extensive evidence-based referencing to relate theory to clinical practice Includes two complete mock papers to practice and improve exam technique Visually-enhanced answers to improve understanding of key concepts

Gynaecology: Evidence-Based Algorithms

The only book to deal specifically with constipation for specialists has been updated to include all the new advances since the first edition (1995). These advances include biofeedback, surgery for constipation, sacral nerve stimulation,

the use of laparoscopy for rectal prolapse, treatment and our understanding of some of the psychological problems of these patients. Innovations also include Professor Norman Williams' Malone Procedure and the newer pharmacologic treatments such as nitric oxide and botulinum toxin injections.

MRCOG II Short Essay Questions

The success of Assisted Reproductive Technology is critically dependent upon the use of well optimized protocols, based upon sound scientific reasoning, empirical observations and evidence of clinical efficacy. Recently, the treatment of infertility has experienced a revolution, with the routine adoption of increasingly specialized molecular biological techniques and advanced methods for the manipulation of gametes and embryos. This textbook – inspired by the postgraduate degree program at the University of Oxford – guides students through the multidisciplinary syllabus essential to ART laboratory practice, from basic culture techniques and micromanipulation to laboratory management and quality assurance, and from endocrinology to molecular biology and research methods. Written for all levels of IVF practitioners, reproductive biologists and technologists involved in human reproductive science, it can be used as a reference manual for all IVF labs and as a textbook by undergraduates, advanced students, scientists and professionals involved in gamete, embryo or stem cell biology.

Basic sciences for obstetrics and gynaecology

Gastrointestinal endoscopy is now mainstream and the focus is now changing from developing new techniques to enhancing the efficiency and quality of fundamental techniques. There are three elements to this agenda: initial training, continuous quality improvement and patient empowerment. For the first time, the book is accompanied by two CD-ROMs -featuring video and animation of how to perform the techniques. The first CD-ROM covers the upper GI tract and consists of two sections: (1) the background to instruments and how to get set up, and (2) how to perform diagnostic techniques. The second CD-ROM covers diagnostic and therapeutic procedures in colonoscopy. Cotton and Williams' book has evolved with each new edition to reflect developments in the field of endoscopy over the last 20 years. This fifth edition draws on the vast experience of the authors and heralds current changes in both endoscopy and publishing. The emerging 'back to basics' attitude of endoscopy opinion formers with regard to the teaching of endoscopy has resulted in a more focused table of contents specifically targeted at newcomers to this specialty.

Textbook of Clinical Embryology

This book is a comprehensive collection of questions in the “single best answer

(SBA)" format for the MRCOG2 theory exam. This new format has been introduced in the exam paper from March 2015 and most candidates are still getting used to the change. This book will provide them ample opportunity to familiarize themselves with the concept and then practice answering the questions based on almost all subjects included in the MRCOG 2 theory syllabus. Preparing for the MRCOG2 exam is a daunting task for all Obstetrics and Gynecology doctors. The college constantly reforms the exam structure in an effort to optimize the evaluation process. The endeavor of the authors is to equip the candidates with a vision of the holistic nature of the exam so that they master the art of answering SBA questions.

SBA and EMQs for MRCOG II

WHO Guidelines for the Management of Postpartum Haemorrhage and Retained Placenta

A 24-year-old woman is referred from the emergency department with sudden onset of left iliac fossa pain and you are the medic on duty 100 Cases in Obstetrics and Gynaecology presents 100 commonly seen obstetric and gynaecological scenarios. The patient's history, examination and initial investigations are

presented along with questions on the diagnosis and management of each case. The answer includes a detailed discussion on each topic, providing an essential revision aid as well as a practical guide for junior clinicians. Making clinical decisions is one of the most challenging and difficult parts of training to become a doctor. These cases will teach medics and medical students to recognize important obstetric and gynaecological conditions and help them develop their diagnostic and management skills.

MRCOG: Part 1 Mcqs

This title is directed primarily towards health care professionals outside of the United States. It contains the latest information on exam regulations, systems and techniques as well as 452 MCQs with full detailed explanatory answers and 180 practice MCQs with answers, each contain 5 MCQ items. This book provides everything a candidate needs to pass Part 1 MRCOG - it is the ultimate survival guide.

EMQs for the MRCOG Part 2

This book presents a comprehensive and instructive management plan for physicians who care for CKD patients. Basic aspects of CKD, clinical assessment,

evaluation and management of risk factors, cardiovascular disease in the context of CKD, assessment and management of CKD complications, special circumstances in CKD patients, and the path to renal replacement therapy are all thoroughly covered. Diagnostic and therapeutic approaches are presented according to the latest staging system for CKD, with patient care being discussed separately for each disease stage. The proposed management plan is both “best available evidence based” and “practice based”. The book also recognizes the needs of busy clinicians by including helpful boxes summarizing the evidence on diagnostic and therapeutic issues and practice pearls based on guidelines. The authors are recognized experts from across the world, ensuring global coverage of the problem, and most have participated in writing guidelines on CKD.

Micromanipulation in Assisted Conception

Passing the MRCOG Part 2 exam is essential to complete further training in O&G, both in the UK and for many doctors across the world. There are two annual sittings in the UK, plus the candidates sitting in Bangladesh, Egypt, Hong Kong, India, Iraq, Jordan, Malaysia, Pakistan, Saudi Arabia, Sudan, UAE, West Indies and China. It is a notoriously difficult exam, with a pass rate of c. 20%. From March 2015 there will be a change to one of the two written papers for MRCOG Part 2. Single best answer questions (SBAs) a new format – worth 40% of the total Part 2 mark. This book consists of 200 questions in the new SBA exam format, and will

present a question followed by a detailed answer and feedback.

Basic Sciences for Obstetrics and Gynaecology: Core Material for MRCOG

Assisted reproduction techniques have led to the birth of 4 million babies worldwide. Assisted reproduction techniques (ART), in particular in-vitro fertilization and intra-cytoplasmic sperm injection, are the most advanced forms of infertility treatment. They involve numerous counseling, medical, surgical and laboratory-based steps. At each step various problems and complications could be encountered that challenge even the most experienced ART practitioners. Moreover, patients with complex medical disorders may require ART, presenting further challenges. Assisted Reproduction Techniques will stimulate resourceful thinking in the ART practitioner when faced with these challenges. It outlines various management options, the reasoning behind them, and the evidence on which they are based to enable the practitioner to choose the most suitable solution for the needs of each patient. Written by 122 internationally renowned experts, Assisted Reproduction Techniques follows the patient's journey throughout the whole ART process, with chapters on: Counseling and preparation Ovarian stimulation Oocyte retrieval Embryo transfer The luteal phase The ART laboratory The male patient The ART pregnancy Each of the 100 concise chapters includes

clinical cases, background, evidence-based practical management options, preventive measures and key-point summaries of the important details. Assisted Reproduction Techniques gives a wide-ranging practical guide to all those wishing to support couples who cannot conceive naturally.

Therapeutic Management of Incontinence and Pelvic Pain

Provides evidence-based guidelines in schematic flowcharts, representing a step-by-step method of solving clinical problems in gynaecology.

Constipation

Diagnosis of PPH -- Management of atonic PPH -- Management of retained placenta -- Choice of fluid for replacement or resuscitation -- Health systems and organizational interventions -- PPH care pathways -- Research implications -- Plans for local adaptation of the recommendations -- Plans for supporting implementation of these recommendations -- GRADE tables.

Management of Chronic Kidney Disease

MRCOG PART 2: 550 MCQs, EMQs and SAQs offers the most up-to-date and

comprehensive coverage of practice questions for trainees preparing for the MRCOG Part 2 written exam. Presented in a clear layout, chapters are mapped to the syllabus to deliver structured revision in all the key topics. Featuring a wealth of practice questions and fully descriptive answers, this book provides the essential revision tool to maximise chances of exam success. 550 questions, comprising 250 MCQs, 250 EMQs and 50 SAQs, reflecting the breadth of topics encountered in the actual exam. Answers feature concise rationales to consolidate knowledge and understanding. Extensive evidence-based referencing to relate theory to clinical practice.

MRCOG Part 1 MCQ Revision Book

Specifically designed to help candidates revise for the MRCS exam, this book features 350 Single Best Answer multiple choice questions, covering the whole syllabus. Containing everything candidates need to pass the MRCS Part A SBA section of the exam, it focuses intensively on the application of basic sciences (applied surgical anatomy, physiology, and pathology) to the management of surgical patients. The high level of detail included within the questions and their explanations allows effective self-assessment of knowledge and quick identification of key areas requiring further attention. Varying approaches to Single Best Answer multiple choice questions are used, giving effective exam practice and guidance through revision and exam technique. This includes clinical case questions,

'positively-worded' questions, requiring selection of the most appropriate of relatively correct answers; 'two-step' or 'double-jump' questions, requiring several cognitive steps to arrive at the correct answer; as well as 'factual recall' questions, prompting basic recall of facts.

MRCOG Part 2: 550 MCQs, EMQs and SAQs
