Help your students understand the growing significance of fraud in today's accounting world as the latest edition of this provocative text teaches how to identify, detect, investigate, and prevent financial fraud. Albrecht/Albrecht/Albrecht/Zimbelman's FRAUD EXAMINATION, 3e, International Edition, closely examines the nature of fraud using memorable business examples and captivating actual fraud cases drawn from the first-hand experience of well-recognized fraud investigator and forensic accounting expert W. Steve Albrecht and the entire authorship team. Students examine the many types of fraud, including recent developments such as the unique, rapidly increasing e-business fraud. Students see both how technology is increasingly involved in fraud and how it can be used to detect fraud. This edition even addresses legal options for victims of fraud. Significant new discussion of forensic analysis expands students' understanding of the field, while a fresh, clean design increases readability and student appeal. New learning features and strong end-of-chapter exercises draw attention to the most important information and drive critical thinking. New ACL software, the foremost fraud software on the market, and instant access to Picalo, a specialized fraud analysis software created by Conan Albrecht, are now included with this edition for your convenience. Select chapter assignments in Chapter 6 integrated with the software provide students with important hands-on technology experience. Trust the current, complete coverage found in Albrecht/Albrecht/Albrecht/Zimbelman's FRAUD EXAMINATION, 3e, International Edition, to prepare your students for success in this exciting field of escalating importance.

Accounting:Introduction to Financial Accounting

Introduction to Financial Accounting

This text is intended for a first course in introductory financial accounting. It was updated to reflect current International Financial Reporting Standards (IFRS). For example, it reflects the recent change in IAS38, para. 98, allowing the use of multiple methods in amortizing intangible assets. It focuses on core Introductory Financial Accounting topics that match prerequisite requirements for students advancing to Intermediate Financial Accounting. Excluded are advanced topics that are covered in Intermediate Financial Accounting, such as leases and bond amortization. The text takes a corporate approach (vs. beginning with a sole proprietorship emphasis and then converting to a corporate approach); this consistency throughout the book reduces confusion for the introductory student. The book covers all essential topics: the accounting cycle, merchandising, assigning costs to inventory, cash and receivables, property, plant and equipment, debt financing, equity financing, statement of cash flows, financial statement analysis, and proprietorships and partnerships. Additionally,

this version of the open text is supported by Lyryx Learning, offering at an affordable price editorial services to develop and adapt the content, formative online assessment, course supplements, and daily support to both the students and instructors.
