Infectious Disease Informatics and Biosurveillance

The Complete Anchoring Handbook

Scotland Yard Detective Joe Sandilands is caught off guard one night in 1933 by a phone call from a distressed boy named Jackie Drummond, who just might be the illegitimate son Joe never knew he had. Jackie is in trouble at his Sussex boarding school, where a teacher has been murdered. When Joe gets himself assigned to the investigation, he learns the boarding school case is more complicated than it appears: A frightening number of boys, all from wealthy families, have gone missing over the school's history, and by some coincidence none of the families have followed up on their sons' whereabouts.

This volume provides a comprehensive and state-of-the-art review on pediatric hematopoietic stem cell transplantation (HSCT). The book covers such topics as graft versus host disease (GVHD), HSC mobilization, stem cell selection, and HSCT-relevant laboratory assays and techniques. The text is specially formatted so that the scientific basis of HSCT and ethical considerations are integrated into the relevant clinical framework. Each chapter also includes diagrams, illustrations, and tables that summarize key points and concepts that can be used as a quick visual reference for the reader. Written by experts in the field, Hematopoietic Stem Cell Transplantation for the Pediatric Hematologist/Oncologist is a valuable resource on pediatric HSCT suited for pediatric hematologists-oncologists, fellows, advanced practitioners, clinical nurses, and other referring physicians.

The Army Lawyer

What started with the sundial has, thus far, been refined to a level of precision based on atomic resonance: Time. Our obsession with time is evident in this continued scaling down to nanosecond resolution and beyond. But this obsession is not without warrant. Precision and time synchronization are critical in many applications, such as air traffic

The World Rushed In

When *The World Rushed In* was first published in 1981, the *Washington Post* predicted, "It seems unlikely that anyone will write a more comprehensive book about the Gold Rush." Twenty years later, no one has emerged to contradict that judgment, and the book has gained recognition as a classic. As the *San Francisco Examiner* noted, "It is not often that a work of history can be said to supplant every book on the same subject that has gone before it." Through the diary and letters of William Swain--augmented by interpolations from more than five hundred other gold seekers and by letters sent to Swain from his wife and brother back home--the complete cycle of the gold rush is recreated: the overland migration of over thirty thousand men, the struggle to "strike it rich" in the mining camps of the Sierra Nevadas, and the return home through the jungles of the Isthmus of Panama. In a new preface, the author reappraises our continuing fascination with the "gold rush experience" as a defining epoch in western--indeed, American--history.

The Complete Book of Anchoring and Mooring

Laney thinks the summer's going to be boring but how wrong she is! From the moment she sees a blood-red moon, things take a turn for the magical. For Laney is a faerie, a member of the Mist Tribe, and things are about to get exciting, and mysterious, and dangerous. Laney and her faerie friends must stop an evil Shadow Faerie finding the magical objects he needs to become all-powerful. Each book deals with the quest for a different object.

Seeing is Understanding. The first VISUAL guide to marine diesel systems on recreational boats. Step-by-step instructions in clear, simple drawings explain how to maintain, winterize and recommission all parts of the system - fuel deck fill - engine - batteries - transmission - stern gland - propeller. Book one of a new series. Canadian author is a sailor and marine mechanic cruising aboard his 36-foot steel-hulled Chevrier sloop. Illustrations: 300+ drawings Pages: 222 pages Published: 2017 Format: softcover Category: Inboards, Gas & Diesel

Process Chemistry in the Pharmaceutical Industry, Volume 2

This book on Infectious Disease Informatics (IDI) and biosurveillance is intended to provide an integrated view of the current state of the art, identify technical and policy challenges and opportunities, and promote cross-disciplinary research that takes advantage of novel methodology and what we have learned from innovative applications. This book also fills a systemic gap in the literature by emphasizing informatics driven perspectives (e.g., information system design, data standards, computational aspects of biosurveillance algorithms, and system evaluation). Finally, this book attempts to reach policy makers and practitioners through the clear and effective communication of recent research findings in the context of case studies in IDI and biosurveillance, providing “hands-on” in-depth opportunities to practitioners to increase their understanding of value, applicability, and limitations of technical solutions. This book collects the state of the art research and modern perspectives of distinguished individuals and research groups on cutting-edge IDI technical and policy research and its application in biosurveillance. The contributed chapters are grouped into three units. Unit I provides an overview of recent biosurveillance research while highlighting the relevant legal and policy structures in the context of IDI and biosurveillance ongoing activities. It also identifies IDI data sources while addressing information collection, sharing, and dissemination issues as well as ethical considerations. Unit II contains survey chapters on the types of surveillance methods used to analyze IDI data in the context of public health and bioterrorism. Specific computational techniques covered include: text mining, time series analysis, multiple data streams methods, ensembles of surveillance methods, spatial analysis and visualization, social network analysis, and agent-based simulation. Unit III examines IT and decision support for public health event response and bio-defense. Practical lessons learned in developing public health and biosurveillance systems, technology adoption, and syndromic surveillance for large events are discussed. The goal of this book is to provide an understandable interdisciplinary IDI and biosurveillance reference either used as a standalone textbook or reference for students, researchers, and practitioners in public health, veterinary medicine, biostatistics, information systems, computer science, and public administration and policy.

Chile peppers are hot--they add culinary fire to dishes from a variety of cuisines

and inspire near-fanatical devotion in vegetable gardeners and collectors. The Complete Chile Pepper Book, by world-renowned chile experts Dave DeWitt and Paul W. Bosland, shares detailed profiles of the one hundred most popular chile varieties and include information on how to grow and cultivate them successfully, along with tips on planning, garden design, growing in containers, dealing with pests and disease, and breeding and hybridizing. Techniques for processing and preserving include canning, pickling, drying, and smoking. Eighty-five mouth-watering recipes show how to use the characteristic heat of chile peppers in beverages, sauces, appetizers, salads, soups, entrees, and desserts. This gorgeously illustrated, must-have reference for pepper-obsessed gardeners and cooks.

Men know all about their need for sexual purity. What they want is a plan that will enable them to attain it. In the midst of a culture that shouts "Sex!" from every corner, men need a friend to talk honestly about how to master lust and achieve control over this crucial area of their lives. Bill Perkins details a proven biblical strategy for sexual integrity. He shows men how to achieve a purity that will flow from their relationship with God and strengthen their self-respect, the sanctity of their marriage, and the security of their families. Perkins unfolds a three-part plan that will lead men to victory. Updated to address current needs and cultural trends, When Good Men Are Tempted includes the latest information on Internet pornography. It also features "Take Action" strategic steps and questions suitable for individual reflection or discussion in small groups.

Immunological and Clinical Aspects of Multiple Sclerosis

Looking back is a luxury for which scientists normally have little time. This XXV Anniversary Symposium, however, gives the opportunity of reminding us that in Belgium, where the risk of developing multiple sclerosis is among the highest in the world, a great man to whom we all pay tribute, I mean Dr Ludo van Bogaert, in 1957, took the initiative in founding the Belgian Research Group for Multiple Sclerosis. It may sound immodest but since that time members of the Belgian Research Group happen to have an honourable record of important contributions to MS research, quite out of proportion to the financial support they received for it. Indeed, when compared to the situation in English speaking countries, funding of MS research has always been neglected in our country in spite of the fact that in 1958, acting on the advice of the Belgian Research Group, the Belgian National MS Society was founded with the specific object of collecting money for research as well as for social care. At that time, the difficulty in raising funds for research was partly due to the fact that solving the problem of MS appeared almost impossible. Scientists could apparently only too slowly improve their ability to prevent and cure the disease. Media were indifferent to MS which was considered to have no news value, and the public remained uninformed.

Joplin Pays It Forward

This volume focuses on the modulation of biological membranes by specific biophysical properties. The readers are introduced to emerging biophysical approaches that mimic specific states (like membrane lipid asymmetry, membrane curvature, lipid flip-flop, lipid phase separation) that are relevant to the functioning of biological membranes. The first chapter describes innovative methods to mimic the prevailing asymmetry in biological membranes by forming asymmetrical membranes made of monolayers with different compositions. One of the chapters illustrates how physical parameters, like curvature and elasticity, can affect and modulate the interactions between lipids and proteins. This volume also describes the sensitivity of certain ion channels to mechanical forces and it presents an analysis of how cell shape is determined by both the cytoskeleton and the lipid domains in the membrane. The last chapter provides evidence that liposomes can be used as a minimal cellular model to reconstitute processes related to the origin of life. Each topic covered in this volume is presented by leading experts in the field who are able to present clear, authoritative and up-to-date reviews. The novelty of the methods proposed and their potential for a deeper molecular description of membrane functioning are particularly relevant experts in the areas of biochemistry, biophysics and cell biology, while also presenting clear and thorough introductions, making the material suitable for students in these fields as well.

Accidental Sailor Girl

A modern, authoritative anchoring guide for sailors and powerboaters A boat

swinging safely at anchor can mark the relaxing conclusion to a great day of boating or the successful completion of an essential emergency measure, while failure to anchor properly can be frustrating, inconvenient, or downright dangerous. The Complete Anchoring Handbook is your path to mastering this indispensable seamanship skill. Based on original engineering analysis--and with contributions from such international anchoring experts as Alain Fraysse and Chuck Hawley--The Complete Anchoring Handbook emphasizes the proven best gear and methods for anchoring safely in any situation with any boat, sail or power. Here's everything you need to know, from the basics to the most advanced techniques. Poiraud and company describe: The physical forces acting on a boat, its ground tackle, and the sea bottom Why the new generation of roll-stable anchors (including the Spade, Rocna, Manson Supreme, and others) is proving superior to traditional favorites How to select and size anchors and ground-tackle components How to connect those components without introducing weak points in your ground-tackle system

Manufacturing Whiteness

The Complete Book of Anchoring and Mooring addresses anchoring systems, techniques, and permanent moorings for boats from twelve feet to eighty feet in length. It covers monohulls, multihulls, light displacement sailboats, cruisers, sportfishers, passagemakers, and workboats. In short, it is for all recreational and working boats in this size range. Since the last printing of this book a number of revolutionary anchor concepts have appeared on the boating scene. These unique designs have shown exceptional performance when compared by a renowned testing agency with their contemporaries. Changes made to this revised second edition ensure its continued role as the state-of-the-art source book for the boating world.

Dark Tree Shining

In a series of convergent empirical essays, Manufacturing Whiteness explores the striking parallels in the social construction of whiteness and gender in colonial depictions of the colonizer/colonized and in contemporary advertising. The past decade has seen a sincere, if belated, willingness among white male scholars to self-critically examine the oppressive social, cultural, and political implications of their whiteness. Building on Jacques Lacan's powerfully original social-psychoanalytic insights into the role of desire in the fetishistic constitution of the subject-in-language, Manufacturing Whiteness offers a sophisticated, yet accessible theoretical method for deconstructing ad-content which enables the reader to trace whiteness, "otherness," and other worldliness to the very constitution of latemodern/postmodern western identity.

Current successes in omics research have accelerated the production of high quality foods. Various mutation methodologies have been developed to achieve this progress, showing the importance of mutagenesis for food security. 'Mutagenesis: exploring novel genes and pathways' describes the latest achievements in induced mutagenesis, with a particular focus on the development of crops. The book details experimental studies on functions of particular genes of interest, the mechanisms involved in physiological processes, and occurring chemical reactions. Also, the creation of new mutants and lines by use of genomic data banks is discussed. The book will be of mutual interest to end-users in modern breeding programs as well as to scientific research.

Accidental Sailor Girl is a story about a young girl named Kourtney and her journey from starting out with only her car and a surfboard to sailing across the Atlantic on a Gaff Rigged Cutter with a Square Sail named Norna. The story moves from her hardships of living on the beach to buying her first sailboat, a 27 foot Hunter she named "Happy." Her attitude toward learning how to sail and how to fix up her boat led her to meet Pete Grundvig, a local carpenter and shipwright, the owner of Norna. Their relationship with surfing, sailing, and music, moved them to the tune of a two year Atlantic Circumnavigation. Kourtney soon realizes she is not the same person she was when she left home two years before.

Marine Diesel Basics 1

In the Handbook of Injury and Violence Prevention, over fifty experts present the current landscape of intervention methods - from risk reduction to rethinking social norms - as they address some of the most prevalent forms of accidental and violent injury. - Overview chapters examine the social and economic scope of unintentional and violent injury today - Extensive literature review of specific intervention programs to prevent violence and injury - Special chapters on childhood injuries, alcohol-related accidents, and disasters - "Interventions in the Field" section offers solid guidelines for implementing and improving existing programs - Critical analysis of issues involved in delivering programs to wider audiences - Helpful appendices list relevant agencies and professional resources This dual focus on intervention and application makes the Handbook a bedrock text for professionals involved in delivering or managing prevention programs. Its what-works-now approach gives it particular utility in the graduate classroom, and researchers will benefit from the critical attention paid to knowledge gaps in the field. It is a major resource for any reader committed to reducing the number of incidents just waiting to happen.

Metal Corrosion in Boats

A world of dark powers and magic awaits in this dazzlingly-imagined, quest-driven epic from the author of *The Rescue Princesses*. From the moment Laney sees a blood-red moon, her life is changed forever. For Laney learns that she's a faerie, a member of the Mist Tribe, and she discovers this truth at a time of extreme danger. The faerie tribes are under threat from a dark power that wants to reign supreme. Laney will need all her new-found skills to hold the faerie world together

Environment, Trade and Society in Southeast Asia

The conceptualization and formulation of skin care products intended for topical use is a multifaceted and evolving area of science. Formulators must account for myriad skin types, emerging opportunities for product development as well as a very temperamental retail market. Originally published as "Apply Topically" in 2013 (now out of print), this reissued detailed and comprehensive handbook offers a practical approach to the formulation chemist's day-to-day endeavors by: Addressing the innumerable challenges facing the chemist both in design and at the bench, such as formulating with/for specific properties; formulation, processing and production techniques; sensory and elegance; stability and preservation; color cosmetics; sunscreens; Offering valuable guidance to troubleshooting issues regarding ingredient selection and interaction, regulatory concerns that must be addressed early in development, and the extrapolation of preservative systems, fragrances, stability and texture aids; Exploring the advantages and limitations of raw materials; Addressing scale-up and pilot production process and concerns; Testing and Measurements Methods. The 22 chapters written by industry experts such as Roger L. McMullen, Paul Thau, Hemi Nae, Ada Polla, Howard Epstein, Joseph Albanese, Mark Chandler, Steve Herman, Gary Kelm, Patricia Aikens, and Sam Shefer, along with many others, give the reader and user the ultimate handbook on topical product development.

Not My Blood

In the past half century, deadly disease outbreaks caused by novel viruses of animal origin - Nipah virus in Malaysia, Hendra virus in Australia, Hantavirus in the United States, Ebola virus in Africa, along with HIV (human immunodeficiency virus), several influenza subtypes, and the SARS (sudden acute respiratory syndrome) and MERS (Middle East respiratory syndrome) coronaviruses - have

underscored the urgency of understanding factors influencing viral disease emergence and spread. Emerging Viral Diseases is the summary of a public workshop hosted in March 2014 to examine factors driving the appearance, establishment, and spread of emerging, re-emerging and novel viral diseases; the global health and economic impacts of recently emerging and novel viral diseases in humans; and the scientific and policy approaches to improving domestic and international capacity to detect and respond to global outbreaks of infectious disease. This report is a record of the presentations and discussion of the event.

Neurofibromatosis Type 1

As pharmaceutical companies strive to develop safer medicines at a lower cost, they must keep pace with the rapid growth of technology and research methodologies. Defying the misconception of process chemistry as mere scale-up work, Process Chemistry in the Pharmaceutical Industry, Vol. 2: Challenges in an Ever Changing Climate explores novel applications of synthetic, physical, and analytical chemistry in drug discovery and development. It offers an accurate depiction of the most up-to-date process research and development methods applied to synthesis, clinical trials, and commercializing drug candidates. The second installment in this progressive series, this volume reviews the latest breakthroughs to advance process chemistry, including asymmetric synthesis, crystallization, morphology, enzymatic intervention, green chemistry, macromolecules (monoclonal antibodies, biological molecules, polymers), enantioselectivity, organometallic chemistry, process analytical tools, chemical engineering controls, regulatory compliance, and outsourcing/globalization. It explores new approaches to synthetic processes, examines the latest safety methods and experiment design, and suggests realistic solutions to problems encountered in manufacturing and process development. Significant topics include atom economy, ease of synthesis, instrumentation, automatization, quality control, cost considerations, green practices, and future trends. Jointly edited by the founder/president of Delphian Pharmaceuticals and the director of Chemical R&D at Pfizer, this book brings together contributions by reputed scientists, technologists, engineers, and professors from leading academic institutions, such as the Imperial College, UK, the University of Tokyo, ETH, Switzerland, the International University at Birmen, Germany, and the University of Connecticut, USA, and from principal pharmaceutical companies that include Merck, Bristol Myers Squibb, Pfizer, Novartis, Eli Lilly, AstraZeneca and DSM.

Neurofibromatosis type 1 (NF1), caused by mutational inactivation of the NF1 tumour suppressor gene, is one of the most common dominantly inherited human disorders, affecting 1 in 3000 individuals worldwide. This book presents in concise fashion, but as comprehensively as possible, our current state of knowledge on the molecular genetics, molecular biology and cellular biology of this tumour predisposition syndrome. Written by internationally recognized experts in the field, the 44 chapters that constitute this edited volume provide the reader with a broad overview of the clinical features of the disease, the structure and expression of the NF1 gene, its germ line and somatic mutational spectra and genotype-phenotype relationships, the structure and function of its protein product (neurofibromin), NF1 modifying loci, the molecular pathology of NF1-associated tumours, animal models of the disease, psycho-social aspects and future prospects for therapeutic treatment.

The Complete Chile Pepper Book

Diesel engine is acknowledged for its superior efficiency and possesses a wide field of applications. It is also known as CI engine. Diesel engines also however, are the prime source of emissions such as NOX and particulate matter (PM). In order to reduce the emissions to an absolute minimum, this book explain as to how these toxins can be regulated. It is no hidden secret that the world is witnessing an oil crisis. But with other alternative sources such as biogas, natural gas and coke based substances; diesel is not the only way forward. The unique characteristics and properties such as combustion and emission of the aforementioned alternatives are explained extensively in this book. The book also goes on to explain how one can look for early signs of wear and tear and malfunctioning components of a diesel engine and its parts.
