The definitive biography of George VI, the hero of The King's Speech George VI reigned through taxing times. Acceding to the throne upon his brother's abdication, he was immediately confronted with the turmoil in European politics leading up to the Second World War, then the War itself, followed by a period of austerity, social transformation and loss of Empire. George was unprepared for kingship, suffering from a stammer which could make public occasions very painful for him. Moreover he had grown up in the shadow of his brother, a man who had been idolized as no royal prince has been, before or since. However, as Sarah

Bradford shows in this sympathetic biography, although George was not born to be king, he died a great one. 'A triumph Sarah Bradford looks set to inherit Lady Longford's mantle as royal biographer supreme' Mail on Sunday 'Lucid, convincing and admirably fair George VI has been fortunate in his biographer' Philip Ziegler 'Vivid, thorough and enjoyable' Independent Sarah Bradford is a historian and biographer. Her books include Cesare Borgia (1976), Disraeli (1982), winner of the New York Times Book of the Year, Princess Grace (1984), Sacherevell Sitwell (1993), Elizabeth: A Biography of Her Majesty the Queen (1996), America's Queen: The Life of Jacqueline Kennedy Onassis (2000), Lucrezia Borgia (2005) and Diana (2007). She lives in London and is married to the 8th Viscount Bangor. She is currently working on a full scale biography of Queen Victoria.

Phospholipid technology and applications is an essential reference for technologists developing food and cosmetics products, scientists researching phospholipids in biological and food systems, technologists in fats and oils refining, and scientists developing drugs and drug delivery systems and carriers. The major

source of phospholipids is the lecithin recovered during degumming of vegetable oils, particularly soybean oil. This crude material finds uses in its own right but can be purified through a series of processes which eventually lead to individual phospholipid classes such as phosphatidylcholines. It is widely accepted that oil and water do not mix but there are several areas in science and technology where these two distinct phases must coexist in stable emulsions. This is achieved by admixture of amphiphilic molecules of which the phospholipids are important natural examples. Today, phospholipids find many uses in the food industry and in other industries which exploit the amphiphilic nature of these compounds. Further, there are now important procedures by which their amphiphilicity can be optimized for different uses. The early chapters in this book are devoted to the more common glycerol-based phospholipids and cover their structure, source, composition, modification by chemical and enzymatic methods, their physical, chemical, and nutritional properties, and their major uses. The final chapter is devoted to another kind of phospholipid, the sphingolipids, in which there is a growing interest.

[Siren Publishing: The Stormy Glenn ManLove Collection: Erotic Alternative Paranormal Romance, vampires, M/M, HEA] Attending the company Christmas party should have been a joyous occasion, but for Etienne LeRuelle it was just one more time when men vied for his attention because he was pretty when they had no intention of keeping him. When the head of Vaile Industries Security makes his intentions known, Etienne has to decide whether the man is serious or not, because he isn't sure he could survive the heartache if Louis just wants a one-night stand. Louis Redgrave knew Etienne was his rajaaka the moment he laid eyes on the beautiful man. Fighting off a room full of drunken vampires to get to Etienne is child's play compared to trying to convince the man he wants to keep him forever. If they can survive the misunderstandings between them and the never ending attacks by rogue vampires, they just might have a chance at a life they both only dreamed of. ** A Siren Erotic Romance Stormy Glenn is a Siren-exclusive author.

About a Vampire

After years of working to change schools from within-testifying before Congress and addressing audiences around the world about how to make schools better places for children-John Holt founded Growing Without Schooling magazine in 1977 to support self-directed education and learning outside of school. Each issue is a lively exchange among readers and Holt, packed with useful advice, resource

recommendations, and all sorts of legal, pedagogical, and parenting ideas from people who pioneered what we now call homeschooling. John Holt (1983-1985) is the author of *How Children Learn* and *How Children Fail*, which together have sold over a million and a half copies, and eight other books about children and learning. His work has been translated into more than 40 languages. Once a leading figure in school reform, John Holt became increasingly interested in how children learn outside of school. The magazine he founded, *Growing Without Schooling* (GWS), reflects his philosophy, which he called unschooling. GWS was published from 1977 to 2001 and is the first magazine devoted to homeschooling and self-directed education.

Sexus

Henry Miller's monumental venture in self-revelation was begun with his Tropic of Cancer and Tropic of Capricorn, which on their American publication were hailed as "miraculous," "superb," "ribald," "brilliant," and "shamelessly shocking." Sexus is the first volume of a series called The Rosy Crucifixion, in which Miller completes his major life work. It was written in the United States during World War II, and first

published in Paris in 1949. Of this remarkable project, Lawrence Durrell has said: "The completion of his seven-volume autobiography, if it fulfills the promise of what he has already given us, will put his name amongst the three or four great figures of the age."

Viet Nam has had rapid economic growth in recent years, but this growth has been energy-dependent, even as the energy system has become more carbon intensive. This study uses a bottom-up model to evaluate 63 measures to reduce greenhouse gas emissions from household electricity, industry, power generation, and transport. It finds potential for emissions reduction by 53% in 2050, and that much of this reduction can occur at low or negative financial costs. Moreover, these measures are found to ultimately lead to faster and more inclusive economy-wide growth. Policy measures are identified to help realize the modeled potential.
