Unable to conceive, Julia and Gavin Jones head to Hope Infertility Clinic. The couple is put through a series of embarrassing exams, testing the limit of their libidos. After receiving the results, Mr. Jones is outraged at the fault being his. Having once suffered a fate of infertility himself, Dr. Raymond Breeding has dedicated his life to the world of conception. If anyone can cure the couples' ailment, it's him. However, the closer he examines the female patient, the heavier his heart grows. Removing Gavin from the equation, he decides to cure her with an injection of his own. Warning: This 14,000 word story contains graphic language, erotic situations, medical exam, doctor/patient play, medical instruments, breeding, light bondage, oral sex, straight sex, bareback sex, anal sex, voyeurism, domination, submission, humiliation and is a story for adults (18+)

Biological Methylation and Drug Design

Product Description for Book How to Set Up Photography Lighting for a Home Studio This book descriptively details subjects related to a basic photo studio setup in the comfort of your home. It is geared for beginner users wanting to learn more. It contains information about how to use continuous studio lighting, how to use strobe lighting photography, as well as techniques that enable you to control the lighting as you wish. Having a controlled environment makes for beautiful photos, and gives more options for creativity as well. This is valuable for anyone who also simply wants to take better quality family or pet photos. It would make a useful reference guide for

product photography as well. If you sell products on eBay or a similar venue, great looking photos are a must to get your products sold. Proper lighting is a key issue! This book also contains information about home photography studio setups and discusses how you can make adjustments to create the best blend of lighting and colors. In a nutshell, this is everything that a beginning photographer needs to understand how to setup your own photography studio at home.

Catalysts for Nitrogen Fixation

The Roots of Postmodernism

Examining this interchange between poetry and law, Nelson produces a rhetorical analysis of privacy. She provides close readings of the confessional poetry of Anne Sexton, Robert Lowell, and Sylvia Plath, along with an examination of the Supreme Court's shifting definitions of privacy. The invention of the computer, the development of surveillance technology, and even the increasing popularity of open architectural plans are all part of the story.

Suzuki Burgman 250 & 400 '98 to '15

A Fellowship of Men and Women expertly reveals the depth, variability and scope of alcoholism and recovery. Not a self-help book, it concentrates on understanding the complexities and pain of the disease and the struggle for recovery and a healthy life. A Fellowship of Men and Women speaks

poignantly to the ways alcoholism affects lives and relationships, while bringing a new understanding for lives have been bruised by alcoholics. A window into Alcoholics Anonymous, this must-read will keep you engaged until the end. "In A Fellowship of Men and Women, Thomson explores the lives of a group of recovering alcoholics-and some who will never recover. The interlocking stories give the reader a wonderful insiders view" -Kit Reed Catholic Girls, Weird Women, Wired Women, Seven for the Apocalypse.

Dr. Breeding

Preserving New York is the largely unknown inspiring story of the origins of New York City's nationally acclaimed landmarks law. The decades of struggle behind the law, its intellectual origins, the men and women who fought for it, the forces that shaped it, and the buildings lost and saved on the way to its ultimate passage, span from 1913 to 1965. Intended for the interested public as well as students of New York City history, architecture, and preservation itself, over 100 illustrations help reveal a history richer and more complex than the accepted myth that the landmarks law sprang from the wreckage of the great Pennsylvania Station. Images include those by noted historic photographers as well as those from newspaper accounts of the time. Forgotten civic leaders such as Albert S. Bard and lost buildings including the Brokaw Mansions, are unveiled in an extensively researched narrative bringing this essential episode in New York's history to future

generations tasked with protecting the city's landmarks. For the first time, the story of how New York won the right to protect its treasured buildings, neighborhoods and special places is brought together to enjoy, inform, and inspire all who love New York.

How to Marry a Cowboy

Through her Inside Out Weight Loss program and seminars, along with podcasts downloaded more than 3 million times, Renée Stephens has helped countless people free themselves from emotional eating to achieve the body and life they've always desired. Now, in her first book, she shares the breakthrough lessons of her popular work and develops them into a complete, step-by-step program: Full-Filled: The 6-Week Weight- Loss Plan for Changing Your Relationship with Food—and Your Life—from the Inside Out. With Full-Filled, you will gain freedom from dieting as you use some of the world's most advanced mind and behavior-changing techniques. An intuitive and easy weight-loss program, Full-Filled will open the door to bigger transformations in your life. Not only will you drop excess physical pounds with Renée's expert guidance, you will get to the root of why you eat and you will lose your spiritual weight—by identifying why you eat the way you do and finding better ways to satisfy your true hunger without food. A former food addict, Stephens is a leading weight-loss coach who works with women and men who have spent years trying to free themselves from their weight struggle and to regain control of their lives. Women, Food and God led millions to spiritual

insights; Full-Filled turns those insights into practical steps in an easy-to-follow program that will permanently change how you think about and behave around food. The Full-Filled program will identify and heal your underlying food issues and provide you with the specific tools to create new habits that will make you slim and healthy for a lifetime. This isn't about what foods you should and shouldn't eat (although Renée does share some of her favorite recipes to make weight loss happen faster and easier). Filled with personal success stories and a whole bag of transformative tips and tricks, Full-Filled will set you up for significant weight loss and provide the no-fail techniques for keeping the pounds off permanently.

Country & Blues Harmonica for the Musically Hopeless

The Devil's Claim is a historical fiction set in seventeenth century Herefordshire, England, a time in which the first-born son inherits all. By the day's end, this innocent young man will sell his soul to the devil and be on the road to Hell and damnation. It's December 15, 1644, his fourteenth birthday. It will be a day that William Blinkingsop will never forget. William's father called him into the library to talk about his future. It was to be the worst day of his life—being the third son meant that he wouldn't inherit any of his father's land. Hugo the eldest will inherit, and Thomas the second son will manage the estate. The smug smile on his two brothers' faces as they came out of the library told him that they thought that Mommy's little favorite had been put

into his place. Faced with only the church or the army as a career, William cursed his luck and his two brothers who stood between him and a life of ease. The devil doesn't come to you when you're strong; he comes to you when you're weak or upset. That night, the devil came to William and offered to arrange two accidents for his brothers, so he would become heir. William jumped at the chance. Two accidents later, he was heir to his father's land. However, when you let the devil into your life, he takes over. When William was seventeen, his father was taken ill, and a pillow across the sick man's face meant William inherited his father's money. Life was good for William, and he denied himself nothing. All the pleasures of the flesh were his, and he crushed anyone who stood between him and profit. However, money and power meant nothing to him when three days before his forty-fifth birthday, the devil sent a demon to tell him he was claiming his prize. William, in fear, rushed to the church in the hope the priest might save him. At midnight on the twelfth of December 1689, the fight for his soul with the devil begins. Will it be Heaven or Hell that wins the day?

The U.S. Naval Institute on Vietnam: A Retrospective

Fluid Mechanics, Second Edition deals with fluid mechanics, that is, the theory of the motion of liquids and gases. Topics covered range from ideal fluids and viscous fluids to turbulence, boundary layers, thermal conduction, and diffusion. Surface phenomena, sound, and shock waves are also discussed, along with gas

flow, combustion, superfluids, and relativistic fluid dynamics. This book is comprised of 16 chapters and begins with an overview of the fundamental equations of fluid dynamics, including Euler's equation and Bernoulli's equation. The reader is then introduced to the equations of motion of a viscous fluid; energy dissipation in an incompressible fluid; damping of gravity waves; and the mechanism whereby turbulence occurs. The following chapters explore the laminar boundary layer; thermal conduction in fluids; dynamics of diffusion of a mixture of fluids; and the phenomena that occur near the surface separating two continuous media. The energy and momentum of sound waves; the direction of variation of quantities in a shock wave; one- and two-dimensional gas flow; and the intersection of surfaces of discontinuity are also also considered. This monograph will be of interest to theoretical physicists.

Book 4 of Cowboys & Brides From New York Times and USA Today-bestselling author Carolyn Brown comes a contemporary Western romance filled to the brim with sexy cowboys, gutsy heroines, and genuine down-home Texas twang. Texas rancher Mason Harper's daughters want a new mama in the worst

way, and when a beautiful woman in a tattered wedding gown appears on their doorstep, the two little girls adopt her-no ifs, ands, or buts about it. Mason isn't sure about taking in a complete stranger, but Lord knows he needs a nanny, and Annie Rose Boudreau stirs his heart in long-forgotten ways Annie Rose is desperate, and when a tall, sexy cowboy offers her a place to stay, she can't refuse. After all, it's just for a little while. As she settles in deeper, her heart tells her both Mason and her role as makeshift mama suit her just fine. But will Mason feel the same way once her nightmare past catches up with her? Fans of Linda Lael Miller and Diana Palmer will thrill to this moving story of a lonely cowboy and his two little girls finding the family of their dreams. Cowboys & Brides Series: Billion Dollar Cowboy (Book 1) The Cowboy's Christmas Baby (Book 2) The Cowboy's Mail Order Bride (Book 3) How to Marry a Cowboy (Book 4) Praise for Bestselling Contemporary Western Romances by Carolyn Brown: "Sizzling Brown imbues her lively story with lots of heart."-Publishers Weekly "Hilarious a great, entertaining read."-Fresh Fiction "Writing so expressive I could almost hear the country drawl."-Night Owl Reviewer Top Pick, 4 stars

Which Rights Should be Universal?

I've imagined this in my head so many times. I've always thought about what I would say; what I would do, and how it would all turn out to be. And every time I would remove some detail . . . She's a flight attendant—young, bright and living her dream. He's a heartbroken singer on his way to becoming big. She's

an ardent fan of his. He can't imagine why and yet seems to find comfort in her words. It's the first time they are together and in their hearts both are wishing, hoping and praying that the night would never end. That the time they are spending together lasts and lasts In the world of love, there is always someone perfectly right for you.

A Fellowship of Men and Women

A biography and study of Rudolph Koch, a master of lettering and the design of typefaces. Illustrated with nearly 300 examples of Koch's work, this text looks beyond the - often eulogistic and uncritical -contemporary accounts of his output, to examine his work and complex character in detail.

Parallel Computer Vision

In this book, Talbott shows how to defend basic individual rights from a universal moral point of view that is neither imperialistic nor relativistic."--Jacket.

Father Martin D'Arcy

Handbook of Low Carbon Concrete

The truth that parents learn as much from their children as their children learn from them is poignantly captured in this book by father and son.

Medieval Music, Magical Minds

The U.S. Naval Institute Wheel Books provide valuable information, pragmatic advice, and cogent analysis on topics important to all naval professionals. Drawn from the U.S. Naval Institute's vast archives, the series combines articles from the Institute's flagship publication *Proceedings*, selections from the oral history collection, and Naval Institute Press books to create unique guides on a wide array of fundamental professional subjects.

Livestock Health and Production

Since well before his epic 1974 walk between the Twin Towers of the World Trade Center, Philippe Petit had become an artist who answered first and foremost to the demands of his craft - not only on the high wire, but also as a magician, street juggler, visual artist, builder and writer. A born rebel, he is self taught, cultivating the attitudes, resources and techniques to tackle even seemingly impossible feats. His outlaw sensibility spawned a unique approach to the creative process, an approach he shares with the reader, revealing unconventional ways of creating art.

Genius and Eminence

Biological nitrogen fixation provides more than 50% of the total annual input of the essential element nitrogen to world agriculture. Thus, it is of immense agronomic importance and critical to food supplies, particularly in developing countries. This book, with chapters authored by internationally renowned experts, provides a comprehensive and detailed

account of the fascinating history of the process - including the surprising discoveries of molybdenum-independent nitrogenases and superoxide-dependent nitrogenase; a review of Man's attempts to emulate the biological process - most successfully with the commercially dominant Haber-Bosch process; and the current state of the understanding art with respect to the enzymes - called nitrogenases - responsible for biological nitrogen fixation. The initial chapters use a historical approach to the biological and industrial processes, followed by an overview of assay methodologies. The next set of chapters focuses on the classical enzyme, the molybdenum nitrogenase, and details its biosynthesis, structure, composition, and mechanism of action as well as detailing both how variants of its two component proteins are constructed by recombinant DNA technology and how computational techniques are being applied. The sophisticated chemical modelling of the metal-containing clusters in the enzyme is reviewed next, followed by a description of the two molybdenum-independent nitrogenases - first, the vanadium-containing enzyme and then the iron-only nitrogenase - together with some thoughts as to why they exist! Then follows an up-to-date treatment of the clearly "non-classical" properties of the superoxide-dependent nitrogenase, which more closely resembles molybdenum-containing hydroxylases and related enzymes, like nitrate reductase, than the other nitrogenases. Each chapter contains an extensive list of references. This book is the self-contained first volume of a comprehensive seven-volume series. No other available work provides the up-to-date and in-depth coverage of this series and

this volume. This book is intended to serve as an indispensable reference work for all scientists working in this area, including agriculture and the closely related metals-in-biology area; to assist students to enter this challenging area of research; and to provide science administrators easy access to vital relevant information.

Pursuing Privacy in Cold War America

Daring and defiant there's no stopping diver Hawk Ridley as he takes the plunge into a briny world of untold riches and danger. The Caribbean is a fortune hunter's dream, salted with the gold of galleons long ago claimed by the deep. Now Hawk's headed for the Windward Passage of Haiti to stake his claim. But a rival team has also picked up the scent, and they're willing to turn the sea red with blood to get to the gold first. Fighting off ruthless competitors is nothing new to Hawk but fighting off a beautiful woman is a different story. Is she an innocent stowaway or a seductive saboteur? Between the cool millions lying on the bottom of the ocean, and the boiling-hot race to grab it, Hawk's about to find the answer and make a discovery *Twenty Fathoms Down* that will blow you out of the water. "Primo Pulp Fiction." —Booklist

Building Bamboo Fences

MEDIEVAL MUSIC, MAGICAL MINDS It has only been since the Age of Reason that human beings consider music to be strictly an aesthetic experience. Up until that time, however, music was both intended and

designed to have a specific effect upon the mind and emotions of the listener. Religious chant was designed to raise consciousness. Dance music was meant to celebrate fertility, both human and that of the Earth, and to bring earthly joy and ecstasy to those both dancing and listening. This groundbreaking book fulfills two purposes. The first is to introduce interested musicians to the increasingly-popular field of medieval music. The second is to trace the history of all music, as well as its effect upon the level of awareness of the listeners. Internationally-noted soprano Mary Devlin, a great lover of medieval music expounds upon both her studies and her experience with that genre to try to recreate the thoughts and feelings of the people in the Middle Ages who once composed, performed, and lived that music.

Easy Mathematics Step-by-Step

Animals like cattle, pigs, chickens, goats, etc. that are raised for the purpose of producing labor and commodities like meat, milk, eggs, fur, leather, etc. are known as livestock. The maintenance, breeding and slaughter of livestock is studied under animal husbandry. Livestock health maintenance is one of the most essential aspects of livestock management. This includes the diagnosis, prevention and cure of diseases like scrapie, foot-and-mouth disease, swine fever, etc. affecting livestock. It also develops management strategies for internal and external parasites. Intensive animal farming is a modern farming technique in which animals are raised in high-

density feedlots, broiler houses, etc. This book provides comprehensive insights into the field of livestock health and production. The topics covered herein deal with the core aspects of this discipline. Researchers and students in this field will be assisted by this book.

Marking Time (Treading Water Series, Book 2)

"Atoms First seems to be the flavor of the year in chemistry textbooks, but many of them seem to be little more than rearrangement of the chapters. It takes a master like McQuarrie to go back to the drawing board and create a logical development from smallest to largest that makes sense to students."---Hal Harris, University of Missouri-St. Louis

"McQuarrie's book is extremely well written, the order of topics is logical, and it does a great job with both introductory material and more advanced concepts. Students of all skill levels will be able to learn from this book."---Mark Kearley, Florida State University

This new fourth edition of General Chemistry takes an atoms-first approach from beginning to end. In the tradition of McQuarrie's many previous works, it promises to be another ground-breaking text. This superb new book combines the clear writing and wonderful problems that have made McQuarrie famous among chemistry professors and students worldwide. Presented in an elegant design with all-new illustrations, it is available in a soft-cover edition to offer professors a fresh choice at an outstanding value. Student supplements include an online series

of descriptive chemistry Interchapters, a Student Solutions Manual, and an optional state-of-the-art Online Homework program. For adopting professors, an Instructor's Manual and a CD of the art are also available.

Creativity

Intermediate Comprehension Passages

How does a suburban pizza joint end up profiled on national magazine covers and network TV news? (Hint: The secret is not in the sauce.) When Nick Sarillo decided to open a family-friendly pizza restaurant in the suburbs of Chicago, people thought he was nuts. Having worked as a carpenter for much of his adult life, he lacked any formal experience in restaurants or in managing a small business. Everyone told him no one else would ever care about his place the way he did. They warned he'd have to work 20-hour-days and monitor every employee just to stay in business. But Sarillo saw things differently, and set out to run his business in a radically different way. Today Nick's Pizza & Pub is one of the top ten busiest independent pizza restaurants in the country, with two locations that gross about six times the revenue of the typical pizza restaurant. And in an industry where most employees leave within less than a year, Nick's annual turnover rate is less than 20 percent. How did he do it? The secret lies in Nick's purpose-driven culture, in which every employee—from the waiters to the chefs to the

managers—is equipped with the tools necessary to do their jobs while also advancing the company’s overall mission. The result is higher sales, a dedicated team, and a big little business that is beloved by the entire community. In *A Slice of the Pie* Sarillo tells the story of how he built his extraordinary culture and shows how anyone can follow his methods. For instance, Nick’s managers engage the staff by tracking and rewarding unusual metrics, such as how many guests request a particular server or the average check amount of each carryout host. Likewise, team members of all ages and levels of experience are encouraged to express themselves, acquire new skills, and suggest ideas to help the business grow. *A Slice of the Pie* will help transform even the smallest, simplest, and most ordinary business into a successful, high-performance organization.

The Devil's Claim

Information Services Today

This volume presents the basic issues and up-to-date research findings in the area of genius, giftedness and creative behaviour. It gives an appreciation of the potential that exists among talented children and adults and how this can be transformed into highly significant and personally satisfying achievements. It also shows that such achievement involves great personal effort but can be facilitated by human relationships, institutional interventions, and historical conditions which present parents, educators and

society with opportunities for maximizing the development of genius, giftedness, and creativity.

Rudolf Koch

Wingfield College and Its Patrons

This book is an essential overview of what it means to be a library and information professional. Hirsh provides a broad overview of the transformation of libraries as information organizations, why these organizations are more important today than ever before, and the various career opportunities available for information professionals.

Makers of American Machinist's Tools

This book includes designs of traditional Japanese bamboo fences, as well as diagrams illustrating the basic techniques of creating a fence including splitting, bending, joining and tying bamboo. Paired with step-by-step instructions, these designs will prove the perfect starting point for those who aspire to become a professional garden designer.

When Only Love Remains

The Treading Water Series, Book 2 "Marking Time" continues the story begun in "Treading Water" as Clare Harrington begins a new life. She's considered a miracle, but everything that's happened since she recovered from a three-year coma has been

something less than miraculous. Now left to grapple with the aftermath of a selfless decision, she is home from the hospital and trying to figure out what the next chapter in her miraculous recovery has in store for her. Meanwhile, her eighteen-year-old daughter Kate, a talented singer and songwriter, sets out to pursue her musical dreams in Nashville. Her parents have agreed to allow Kate to spend a year there, but they couldn't have anticipated Kate falling in love with a much older man. Her newly divorced parents are forced back together to confront their wayward daughter. Spanning from Newport, Rhode Island, to Nashville, Tennessee, to Stowe, Vermont, ""Marking Time"" is the story of new beginnings and new loves. Of ""Treading Water,"" reviewers said: ""Treading Water is a definite must read! Treading Water creates an emotional firestorm within the reader. It shines the light on the good and the bad in life and proves that one moment can change everything and it's never too late to find love. Marie Force grabbed my heart and squeezed every ounce of emotion out of it but most importantly her monumental story left me blissful. Treading Water may be fiction but it gives me hope; hope in everyday people and happily ever after. I cannot wait for the next book in this trilogy, Marking Time."" -Joyfully Reviewed, a ""Recommended Read"" for November! ""This isn't your typical romance where you're positive you're going to get the happy ending you were hoping for at the beginning. It will rip your heart out at times and having you weeping for joy at others. A stunning story about learning to love again and learning when to let go to those you love."" -Night Owl Reviews, Reviewer Top Pick The Treading Water Series Book 1: Treading Water Book 2: Marking Time

Twenty Fathoms Down

This book has been developed from its earlier and far less formal presentment as the proceedings of a symposium entitled The Biochemistry of S-Adenosylmethionine as a Basis for Drug Design that was held at the Solstrand Fjord Hotel in Bergen, Norway on June 30-July 4, 1985. The purpose of the symposium was to bring together scientists from various disciplines (biochemistry, pharmacology, virology, immunology, chemistry, medicine, and so on) to discuss the recent advances that have been made in our understanding of the biological roles of S adenosylmethionine (AdoMet) and to discuss the feasibility of utilizing AdoMet-dependent enzymes as targets for drug design. Thus the information provided

herein will be of value not only to basic scientists involved in elucidating the role of AdoMet in biology, but also to medicinal chemists who are using this basic knowledge in the process of drug design. The volume should also be of interest to pharmacologists and clinicians involved in biological evaluation of potential therapeutic agents arising from the efforts of the biochemists and medicinal chemists. Each plenary speaker at the symposium was requested to submit a chapter reviewing recent contributions of their discipline to our base of knowledge about the biological role of AdoMet. Topics covered in this volume include protein and phospholipid methylations (Section A), nucleic acid methyl ations (Section B), the regulation of AdoMet, S-adenosylhomocysteine, and methylthioadenosine metabolism (Section C), clinical aspects of AdoMet (Section D), and the design, synthesis, and biological evaluation of trans methylation inhibitors (Section E).

Information Needs and Users

The 650th anniversary of the foundation of Wingfield College was the occasion for a special two-day symposium marking the culmination of a three-year UEA-funded research project into the college and castle. The building projects of the late medieval aristocracy focused on their homes and the monasteries, churches or chantry foundations under their patronage where their family were buried and commemorated. This commemoration allowed a visual celebration of their achievements, status and lineage, the scale and prestige of which reflected on

the fortunes of the family as a whole. Wingfield is explored in the context of both the actual building of the castle, chantry chapel and the college, and that of the symbolic function of these as a demonstration of aristocratic status. The contributions to this book examine many topics which have hitherto been neglected, such as the archaeology of the castle, which had never been excavated, the complex history of the college's architecture, and the detailed study of the monuments in the church. The latest techniques are used to reconstruct the college and castle, with a DVD to demonstrate these. And the context of the family and its fortunes are explored in chapters on the place of the de la Poles in fifteenth century history, as soldiers, administrators and potential claimants to the throne.

How to Set Up Photography Lighting for a Home Studio

“Wheel books” were once found in the uniform pockets of virtually all junior officers and many senior petty officers. Each small notebook was unique to the Sailor carrying it, but all had in common a collection of data and wisdom that the individual deemed useful in the effective execution of his or her duties. Often used as a substitute for experience among neophytes and as a portable library of reference information for more experienced personnel, those weathered pages contained everything from the time of the next tide, to leadership hints from a respected chief petty officer, to the color coding of the phone-and-distance line used in underway replenishments. In that same tradition, the Naval Institute has created and aptly named the Wheel Book series, portable libraries culled from USNI’s vast array of information that has accumulated for more than a century. Articles from the Institute’s flagship publication Proceedings are combined with selections from USNI’s oral history program and from Naval Institute Press books to create unique guides on a wide array of relevant professional subjects. Just as the “wheel books” of yesterday served the fleet well, the Naval Institute Wheel Books of today provide supplemental

information, pragmatic advice, and cogent analysis on topics important to modern naval professionals. The pinnacle of leadership in a military organization is command. Article 0801 of Navy Regulations defines both the authority and the responsibility of command as “absolute.” This Naval Institute Wheel Book provides practical guidance and food for thought that actual and would-be commanders can use to carry out that absolute authority while being absolutely responsible. Included in this specially-selected collection is the sage advice of those who have commanded as well as the expectations of those who are commanded. Aspirants as well as practitioners will do well to exploit this selected survey of what Fleet Admiral Chester Nimitz described as the “one purpose” for entering the Navy.

Fluid Mechanics

Handbook of Low Carbon Concrete brings together the latest breakthroughs in the design, production, and application of low carbon concrete. In this handbook, the editors and contributors have paid extra attention to the emissions generated by coarse aggregates, emissions due to fine aggregates, and emissions due to cement, fly ash, GGBFS, and admixtures. In addition, the book provides expert coverage on emissions due to concrete batching, transport and placement, and emissions generated by typical commercially produced concretes. Includes the tools and methods for reducing the emissions of greenhouse gases Explores technologies, such as carbon capture, storage, and substitute cements

Provides essential data that helps determine the unique factors involved in designing large, new green cement plants
