The Rise of a New Hero

The Neutrino Drive engine was the Cidebans' answer to near-light-speed space travel. Cideban scoutships crossed the galaxy with impunity, cataloguing the evolutionary and technological progress of the worlds they discovered. Time dilation kept the scoutship pilots young as hundreds, even thousands of light years slipped behind them. When the Cideban homeworld came under attack by the Kek, a vicious race of bloodthirsty insectoids who had commandeered one of their Neutrino Drive engines, a chain of events was set into motion which led straight to Earth. But humanity was ill-equipped to defend itself against interstellar spacefaring aliens, and not advanced enough to utilize Neutrino Drive engine technology.

Rise of the Federation: Uncertain Logic

Rise of the Federation: A Choice of Futures

During the 1700's, Black Beard's ship, the "Queen Anne's Revenge" ran aground at the entrance to Beaufort inlet and wasn't discovered until hundreds of years later. During an expedition of the sunken ship "The Queen Anne's Revenge," something went terribly wrong, but the effects of that incident would not be felt until years later when a barrel of an unknown substance was tossed overboard during the expedition. The barrel took several years to erode, but when it did that's when all hell broke loose. The substance oozing out of the barrel on the ocean floor brought Black Beard and his men to life as zombies, causing them to become hungry for flesh and surface to the top of the ocean and head inland for flesh.

The Rise of the Omarlo Clan

In *We Are the Weather*, Jonathan Safran Foer explores the central global dilemma of our time in a surprising, deeply

personal, and urgent new way. Some people reject the fact, overwhelmingly supported by scientists, that our planet is warming because of human activity. But do those of us who accept the reality of human-caused climate change truly believe it? If we did, surely we would be roused to act on what we know. Will future generations distinguish between those who didn't believe in the science of global warming and those who said they accepted the science but failed to change their lives in response? The task of saving the planet will involve a great reckoning with ourselves—with our all-too-human reluctance to sacrifice immediate comfort for the sake of the future. We have, he reveals, turned our planet into a farm for growing animal products, and the consequences are catastrophic. Only collective action will save our home and way of life. And it all starts with what we eat—and don't eat—for breakfast.

Dawn of the Planet of the Apes: The Official Movie Novelization

The riveting true story of the women who launched America into space. In the 1940s and 50s, when the newly minted Jet Propulsion Laboratory needed quick-thinking mathematicians to calculate velocities and plot trajectories, they didn't turn to male graduates. Rather, they recruited an elite group of young women who, with only pencil, paper, and mathematical prowess, transformed rocket design, helped bring about the first American satellites, and made the exploration of the solar system possible. For the first time, *Rise of the Rocket Girls* tells the stories of these women -- known as "human computers" -- who broke the boundaries of both gender and science. Based on extensive research and interviews with all the living members of the team, *Rise of the Rocket Girls* offers a unique perspective on the role of women in science: both where we've been, and the far reaches of space to which we're heading. "If *Hidden Figures* has you itching to learn more about the women who worked in the space program, pick up Nathalia Holt's lively, immensely readable history, *Rise of the Rocket Girls*." -- Entertainment Weekly

Hawks of Outremer

A growing nation of genetically evolved apes led by Caesar is threatened by a band of human survivors of the devastating

virus unleashed a decade earlier. They reach a fragile peace, but it proves short-lived, as both sides are brought to the brink of a war that will determine who will emerge as Earth's dominant species.

Rise of the Planet of the Living Dead TPB

To celebrate the 50th anniversary of the Planet of the Apes franchise: an illustrated life story of Caesar, the brave and extraordinary leader of the apes, as told by Maurice, Caesar's best friend. After the events of War for the Planet of the Apes, Caesar's tribe has finally found a safe refuge from the last remnants of the humans who wish to see them wiped out. It comes at a cost, however, as Caesar dies before he can see the apes thrive and prosper in their new home. Maurice, as a gift to Caesar's son Cornelius for when he grows older, decides to recount and chronicle Caesar's story so that his son can truly know what a unique and brave ape his father was, and inspire Cornelius in turn. Caesar's Story is this chronicle, and tells the story of Caesar from his earliest days under the care of scientist Will Rodman, as well his life with the ape colony in Muir Woods after the outbreak of the Simian Flu, his interactions with Malcolm and Ellie, the dangerous ape Koba, and his ultimate battle with and imprisonment by the vicious and unstable Colonel. The book also chronicles what happens in-between the events of Rise and Dawn of the Planet of the Apes, as well as the events between Dawn of and War for the Planet of the Apes. The book includes Maurice's personal thoughts and reflections of his long time spent alongside Caesar, and contributions from several other key apes that knew Caesar. The result is a truly one-of-a-kind celebration of the new Planet of the Apes trilogy and the franchise as a whole.

Planet of the Apes

Planet of the Apes After the Fall Omnibus

What makes humans different from other animals, what humans are entitled to do to other species, whether time travel is possible, what limits should be placed on science and technology, the morality and practicality of genetic engineering—these are just some of the philosophical problems raised by Planet of the Apes. Planet of the Apes and Philosophy looks at all the deeper issues involved in the Planet of the Apes stories. It covers the entire franchise, from Pierre Boulle's 1963 novel Monkey Planet to the successful 2012 reboot Rise of the Planet of the Apes. The chapters reflect diverse points of view, philosophical, religious, and scientific. The ethical relations of humans with animals are explored in several chapters, with entertaining and incisive observations on animal intelligence, animal rights, and human-animal interaction. Genetic engineering is changing humans, animals, and plants, raising new questions about the morality of such interventions. The scientific recognition that humans and chimps share 99 percent of their genes makes a future in which

non-human animals acquire greater importance a distinct possibility. Planet of the Apes is the most resonant of all scientific apocalypse myths.

The New York Times bestseller: "You gotta read this. It is the most exciting book about Pluto you will ever read in your life." —Jon Stewart When the Rose Center for Earth and Space at the American Museum of Natural History reclassified Pluto as an icy comet, the New York Times proclaimed on page one, "Pluto Not a Planet? Only in New York." Immediately, the public, professionals, and press were choosing sides over Pluto's planethood. Pluto is entrenched in our cultural and emotional view of the cosmos, and Neil deGrasse Tyson, award-winning author and director of the Rose Center, is on a quest to discover why. He stood at the heart of the controversy over Pluto's demotion, and consequently Plutophiles have freely shared their opinions with him, including endless hate mail from third-graders. With his inimitable wit, Tyson delivers a minihistory of planets, describes the oversized characters of the people who study them, and recounts how America's favorite planet was ousted from the cosmic hub.

War for the Planet of the Apes: Revelations

An original novel set in the universe of Star Trek: Enterprise! A new nation has arisen from the ashes of the Romulan War: the United Federation of Planets, an unprecedented union of diverse species cooperating for the good of all. Admiral Jonathan Archer—the former captain of the Earth starship Enterprise, whose efforts made this union possible—envisions a vibrant Federation promoting galactic peace and a multispecies Starfleet dedicated to exploring strange new worlds. Archer's former crewmates, including Captain T'Pol of the U.S.S. Endeavour and Captain Malcolm Reed of the U.S.S. Pioneer, work with him to secure that bright future. Yet others within the Federation see its purpose as chiefly military, a united defense against a dangerous galaxy, while some of its neighbors view that military might with suspicion and fear. And getting the member nations, their space fleets, and even their technologies to work together as a unified whole is an ongoing challenge. When a new threat emerges from a force so alien and hostile that negotiation seems impossible, a

group of unaligned worlds asks Starfleet to come to its defense, and the Federation's leaders seize the opportunity to build their reputation as an interstellar power. But Archer fears the conflict is building toward an unnecessary war, potentially taking the young nation down a path it was never meant to follow. Archer and his allies strive to find a better solution but old foes are working secretly to sabotage their efforts and ensure that the great experiment called the Federation comes to a quick and bloody end. ™, ®, & © 2013 CBS Studios, Inc.
