Anti-Bias Education for Young Children and Ourselves

While problems of childhood poverty are most widespread in developing countries, formidable inequalities exist in more prosperous countries. A major aim of the book is to address the question of unequal childhoodsand the ways in which they are.

Parenting Matters

theological and ministerial perspectives on this topic. The book disseminates original research and new developments in this study field, especially as relevant to the African context. In the process it addresses also the global need to hear voices from Africa in this academic field. It wants to convey the importance of considering Africa's children in theologising. The different chapters represent diverse methodologies but the central and common focus is to approach the subject from the viewpoint of Africa's children. The individual authors' varied theological sub-disciplinary dispositions contribute to the unique and distinct character of the book. Almost all chapters are theoretical orientated with less empirical research, although some of the chapters refer to empirical research which the authors have done in the past. Most of the academic literature in the field of Theologies of Childhood is from American or British- European origin. The African context is fairly absent in this discourse, although it is the youngest continent and presents unique and relevant challenges. This book was written by theological scholars from Africa, focussing on Africa's children. It addresses not only theoretical challenges in this field but also provides theological perspectives for ministry with children and for important social change. Written from a variety of theological sub-disciplines, the book is aimed at scholars across theological sub-disciplines, especially those theological scholars interested in the intersections between theology, childhood studies and African cultural or social themes. It addresses themes and provide insights that is also relevant for specialist leaders and professionals in this field. No part of the book was plagiarised from another

The World Book Encyclopedia

Applying values and ethics to social work practice is taught widely across the qualifying degree programme, on both Masters and BA courses. This book is a clear introduction to this subject and will help students develop their understanding by showing social work students how ethics can have positive impacts on the lives of vulnerable people. There are chapters on how social workers can make good ethical and value-based decisions when working with risk, and how the role of the social worker as professional can impact on service users. Above all the book is a timely and clear introduction to the subject, with an emphasis on advocacy and empowerment and how the beginning social worker can start to apply these concepts.

importance of integrating rich content-based, teacher-guided instruction with meaningful child-centered play to nurture children's emerging capabilities and skills. The emphasis is on teachers' active, intentional role in children's play to guide learning. Two sections: four general articles that discuss the topic, followed by six content-area articles on math, literacy, drama, art, STEM, and outdoor learning. Marie wrote the introduction as well as other material. Note: This book will not be part of the Spotlight series; articles will appear as chapters in a book (along the lines of Big Questions, with chapters from different authors but having a cohesive look).

Battle Hymn of the Tiger Mother

With the recent explosion of high-profile court cases and staggering jury awards, America's justice system has moved to the forefront of our nation's consciousness. Yet while the average citizen is bombarded with information about a few sensational cases--such as the multi-million dollar damages awarded a woman who burned herself with McDonald's coffee-- most Americans are unaware of the truly dramatic transformation our courts and judicial system have undergone over the past three decades, and of the need to reform the system to adapt to that transformation. In *Reforming the Civil Justice System*, Larry Kramer has compiled a work that charts these revolutionary changes and offers solutions to the problems they present. Organized into three parts, the book investigates such topics as

settlement incentives and joint tortfeasors, substance and form in the treatment of scientific evidence after *Daubert v. Merrell Dow*, and guiding jurors in valuing pain and suffering damages. *Reforming the Civil Justice System* offers feasible solutions that can realistically be adopted as our civil justice system continues to be refined and improved.

Designed to promote reflection, discussion, and action among the entire learning community, *Educating Everybody's Children* encapsulates what research has revealed about successfully addressing the needs of students from economically, ethnically, culturally, and linguistically diverse groups and identifies a wide range of effective principles and instructional strategies. Although good teaching works well with all students, educators must develop an extensive repertoire of instructional tools to meet the varying needs of students from diverse backgrounds. Those tools and the knowledge base behind them are the foundation

of this expanded and revised second edition of *Educating Everybody's Children*. Each strategy discussed in the book includes classroom examples and a list of the research studies that support it. The most important thing we have learned as a result of the education reform movement is that student achievement stands or falls on the motivation and skills of teachers. We must ensure that all teachers are capable of delivering a standards-based curriculum that describes what students should know and be able to do, and that these standards are delivered by means of a rich and engaging "pedagogy of plenty." By these two acts we can ensure that all schools will be ready and able to educate everybody's children.

How we raise young children is one of today's most highly personalized and sharply politicized issues, in part because each of us can claim some level of "expertise." can we use our burgeoning knowledge to assure the well-being of all young children, for their own sake as well as for the sake of our nation? Drawing from new findings, this book presents important conclusions about nature-versus-nurture, the impact of being born into a working family, the effect of politics on programs for children, the costs and benefits of intervention, and other issues. The committee issues a series of challenges to decision makers regarding the quality of child care, issues of racial and ethnic diversity, the integration of children's cognitive and emotional development, and more. Authoritative yet accessible, *From Neurons to Neighborhoods* presents the evidence about "brain wiring" and how kids learn to speak, think, and regulate their behavior. It examines the effect of the climate-family, child care, community-within which the child grows.

SpongeBob SquarePants and Philosophy introduces fans of SpongeBob SquarePants to some of the great thinkers and questions in philosophy. The essays can be shared by young and old alike, kindling new interest in philosophy and life's big questions. What keeps SpongeBob "reeling in" major audiences on a daily basis is that underneath the lighthearted and whimsical exterior are the seeds of philosophical discussions about identity and the self, our obligations toward others, benefits and tensions of the individual in community, principles of the marketplace and environmental ethics, and questions of just how exactly Jack Kahuna Laguna

can build a fire at the bottom of the ocean. (Okay, so perhaps we don't have an answer for that last one, but maybe if you look into that fire long enough the answer will be revealed.) The book begins with a section exploration of the major characters of the series. For instance, chapter 1 uses the philosophies of Aristotle to demonstrate why SpongeBob, more than any other character in the series, is defined by a life of well-being and flourishing. Chapter two provides an assessment of SpongeBob's best friend, Patrick Star.

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well.

Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships

with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Language Assessment in the Early Years

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the

earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. A lot of people wonder how Chinese parents raise such stereotypically successful kids. They wonder what Chinese parents do to produce so many math whizzes and music prodigies, what it's like inside the family, and whether they could do it too. Well, I can tell them, because I've done it. Amy Chua's daughters, Sophia and Louisa (Lulu) were polite, interesting and helpful, they had perfect school marks and exceptional musical abilities. The Chinese-parenting model certainly seemed to produce results. But what happens when you do not tolerate disobedience and are confronted by a screaming child who would sooner freeze outside in the cold than be forced to play the piano? *Battle Hymn of the Tiger Mother* is a story about

a mother, two daughters, and two dogs. It was supposed to be a story of how Chinese parents are better at raising kids than Western ones. But instead, it's about a bitter clash of cultures, a fleeting taste of glory, and how you can be humbled by a thirteen-year-old. Witty, entertaining and provocative, this is a unique and important book that will transform your perspective of parenting forever.

Values and Ethics in Social Work Practice

In *Teaching with Poverty in Mind: What Being Poor Does to Kids' Brains and What Schools Can Do About It*, veteran educator and brain expert Eric Jensen takes an unflinching look at how poverty hurts children, families, and communities across the United States and demonstrates how schools can improve the academic achievement and life readiness of economically disadvantaged students. Jensen argues that although chronic exposure to poverty can result in detrimental changes to the brain, the brain's very ability to adapt from experience means that poor children can also experience emotional, social, and academic success. A brain that is susceptible to adverse environmental effects is equally susceptible to the positive effects of rich, balanced learning environments and caring relationships that build students' resilience, self-esteem, and character. Drawing from research, experience, and real school success stories, *Teaching with Poverty in Mind* reveals

at the macro level (within schools and districts) and at the micro level (inside a student's brain); * Effective strategies from those who have succeeded and ways to replicate those best practices at your own school; and * How to engage the resources necessary to make change happen.
