Using clear and concise language this book introduces new users to the use of the TeX system, in particular document preparation using LaTeX. It avoids the pitfalls of having to search through several advanced books on the subject, by collecting together the more frequently required tools and presenting these in a single accessible volume. It also describes the recent developments in multilingual typesetting using TeX that now make it straightforward for users to prepare documents in their own language and alphabet, giving the book a global readership. Topics include: multi-lingual uses of LaTeX; discussion of hardware implementations; use and misuse of particular LaTeX commands; and many others.

Resurrection of the Dead in Early Judaism, 200 Bce-ce 200

Resurrection of the dead represents one of the more enigmatic beliefs of Western religions to many modern readers. In this volume, C. D. Elledge offers an interpretation of some of the earliest literature within Judaism that exhibits a confident hope in resurrection. He not only aids the study of early Jewish literature itself, but expands contemporary knowledge of some of the earliest expressions of a hope that would become increasingly meaningful in later Judaism, Christianity, and Islam. Elledge focuses on resurrection in the latest writings of the Hebrew Bible, the Apocrypha, Pseudepigrapha, Dead Sea Scrolls, as well as the writings of other Hellenistic Jewish authors. He also incorporates later rabbinic writings, early Christian sources, and inscriptions, as they shed additional light upon select features of the evidence in question. This allows for a deeper look into how particular literary works utilized the discourse of resurrection, while also retaining larger comparative insights into what these materials may teach us about the gradual flourishing of resurrection within its early Jewish environment. Individual chapters balance a more categorical/comparative approach to the problems raised by resurrection (definitions, diverse conceptions, historical origins, strategies of legitimation) with a more specific focus on particular pieces of the early Jewish evidence (1 Enoch, Dead Sea Scrolls, Josephus). Resurrection of the Dead in Early Judaism, 200 BCE-CE 200 provides a treatment of resurrection that informs the study of early Jewish theologies, as well as their later reinterpretations within Rabbinic Judaism and Christianity.
