In this classic work, the eminent Catholic philosopher Étienne Gilson deals with one of the most important and perplexing metaphysical problems: the relation between our notion of God and demonstrations of his existence. Gilson examines Greek, Christian, and modern philosophy as well as the thinking that has grown out of our age of science in this fundamental analysis of the problem of God. "[I] commend to another generation of seekers and students this deeply earnest and yet wistfully gentle little essay on the most important (and often, at least nowadays, the most neglected) of all metaphysical--and existential--questions. . . . The historical sweep is breathtaking, the one-liners arresting, and the style, both intellectual and literary, altogether engaging." --Jaroslav Pelikan, from the foreword "We have come to expect from the pen of M. Gilson not only an accurate exposition of the thought of the great philosophers, ancient and modern, but what is of much more importance and of greater interest, a keen and sympathetic insight into the reasons for that thought. The present volume does not fail to fulfill our expectations. It should be read by every Christian thinker." --Ralph O. Dates, America

The story of the four-wheel-drive tractors built by Steiger, International Harvester, Case, and Case IH is told in dramatic fashion in this authoritative guide. Starting with the development of early four-wheel-drive systems at International Harvester, the book traces the evolution and design some of the most powerful and capable tractors of the twentieth century. With fresh detail on the 4300, 4100, Steiger-built IH tractors, and the 2+2 tractors including the Super 70 series, the book offers prototype drawings of several models--including the complete story of the never-before-published Magnum 2+2-- as well as inside stories and backroom drama that is a must for any enthusiast for farm history or tractors. Learn the complete story of Steiger tractors, which were originally designed and built in the barn of John, Douglass, and Maurice Steiger located near Red Lake Falls, Minnesota. Containing interviews with more than 50 of the people who built Steiger from its humble origin to a world leader, the book traces the evolution of the lime green Steigers in engrossing detail. The book also covers the J.I. Case 4WD line in great detail. In addition, the book tells the story of how each of these significant players in the industry combined under one banner and--together--created one of the current industry-leading technologies, the Quadtrac. The modern evolution of the Steigers and the introduction of the STX Series (and more) also receive in-depth coverage. The same team that created the award-winning books Red Tractors 1958-2013 and Red Combines 1915-2015 created this

The first part of the book reviews the effects of processing on the properties of metals with a range of chapters on such phenomena as phase transformations, types of kinetic reaction, transport and interfacial phenomena. Authors discuss how these processes and the resulting properties of metals can be modelled and predicted. Part two discusses the implications of this research for improving steelmaking and steel properties. With its

identification as well as idle, mid-range and high-speed circuit operation, specialty tools, and available parts. In an easy-to-follow step-by-step format, he shows you each critical stage for cleaning sensitive components and installing parts, including idle screws, idle air jets, primary/secondary main jets, accelerator pumps, emulsion tubes, and float bowls. He also includes the techniques for getting all of the details right so you have a smooth-running engine. Holley carburetor owners need a rebuilding guide for understanding, disassembling, selecting parts, and reassembling their carbs, so the carb then delivers exceptional acceleration, quick response, and superior fuel economy. With *Holley Carburetors: How to Rebuild* you can get the carb set up and performing at its best. And, if desired, you can move to advanced levels of tuning and modifying these carbs.
