The Politicisation of Migration

In *The Divided Dominion*, Ethan A. Schmidt examines the social struggle that created Bacon's Rebellion, focusing on the role of class antagonism in fostering violence toward native people in seventeenth-century Virginia. This provocative volume places a dispute among Virginians over the permissibility of eradicating Native Americans for land at the forefront in understanding this pivotal event. Myriad internal and external factors drove Virginians to interpret their disputes with one another increasingly along class lines. The decades-long tripartite struggle among elite whites, non-elite whites, and Native Americans resulted in the development of mutually beneficial economic and political relationships between elites and Native Americans. When these relationships culminated in the granting of rights—equal to those of non-elite white colonists—to Native Americans, the elites crossed a line and non-elite anger boiled over. A call for the annihilation of all Indians in Virginia united different non-elite white factions and molded them in widespread social rebellion. *The Divided Dominion* places Indian policy at the heart of Bacon's Rebellion, revealing the complex mix of social, cultural, and racial forces that collided in Virginia in 1676. This new analysis will interest students and scholars of colonial and Native American history.

The Fitness Instructor's Handbook

Why are migration policies sometimes heavily contested and high on the political agenda? And why do they, at other moments and in other countries, hardly lead to much public debate? The entrance and settlement of migrants in Western Europe has prompted various political reactions. In some countries anti-immigration parties have gained substantial public support while in others migration policies have been hardly controversial. The Politicisation of Migration examines the differences between seven Western European countries by developing a conceptual framework to empirically explain patterns of politicisation and de-politicisation. The analyses show that over the past decade immigration has been increasingly defined in socio-cultural terms and that it has been receiving less political attention since the economic crisis started in 2007. This book also looks at the role of mainstream parties and political actors in the process of politicisation, and demonstrates how the role of 'challengers' is more limited than often assumed. Contributing to literatures on migration, party politics and agenda-setting, the book will be of interest to students and scholars in the fields of politics and migration studies.
