A Treatise on the Law of Railroads

## A Tragedy of Democracy

This book scrutinizes the emergence of historians participating as expert witnesses in historical forensic contribution in some of the most important national and international legal ventures of the last century. It aims to advance the debate from discussions on whether historians should testify or not toward nuanced understanding of the history of the practice and making the best out of its performance in the future.

## Water Resources Management - Volume I

Abraham Lincoln was the greatest writer of the Civil War as well as its greatest political leader. His clear, beautiful, and at times uncompromisingly severe language forever shaped the nation's understanding of its most terrible conflict. This volume, along with its companion, Abraham Lincoln: Speeches and Writings 1832-1858, comprises the most comprehensive selection ever published. Over 550 speeches, messages, proclamations, letters, and other writings—including the Inaugural and Gettysburg addresses and the moving condolence letter to Mrs. Bixby—record the words and deeds with which Lincoln defended, preserved, and redefined the Union.

## **New Outlook**

Responding to the controversy surrounding drug use and drug criminalization, Thomas Szasz suggests that the "therapeutic state" has overstepped its bounds in labeling certain drugs as "dangerous" substances and incarcerating drug "addicts" in order to cure them. Szasz shows that such policies scapegoat certain drugs as well as the persons who sell, buy, or use them; and 'misleadingly pathologize the "drug problem" by defining disapproved drug use as "disease" and efforts to change the behavior as "treatment." Readers will find in Szasz's arguments a cogent and committed response to a worldwide debate.

## **Ceremonial Chemistry**

The confinement of some 120,000 Japanese Americans during World War II, often called the Japanese American internment, has been described as the worst official civil rights violation of modern U. S. history. Greg Robinson not only offers a bold new understanding of these events but also studies them within a larger time frame and from a transnational perspective. Drawing on newly discovered material, Robinson provides a backstory of confinement that reveals for the first time the extent of the American government's surveillance of Japanese communities in the years leading up to war and the construction of what officials termed "concentration camps" for enemy aliens. He also considers the aftermath of confinement, including the place of Japanese Americans in postwar civil rights struggles, the long movement by former camp inmates for redress, and the continuing role of the camps as touchstones for nationwide commemoration and debate. Most remarkably, *A Tragedy of Democracy* is the first book to analyze official policy toward West Coast Japanese Americans within a North American context. Robinson studies confinement on the mainland alongside events in wartime Hawaii, where fears of Japanese Americans justified Army dictatorship, suspension of the Constitution, and the imposition of military tribunals. He similarly reads the treatment of Japanese Americans against Canada's confinement of 22,000 citizens and residents of Japanese ancestry from British Columbia. *A Tragedy of Democracy* recounts the expulsion of almost 5,000 Japanese from Mexico's Pacific Coast and the poignant story of the Japanese Latin Americans who were kidnapped from their homes and interned in the United States. Approaching Japanese confinement as a continental and international phenomenon, Robinson offers a truly kaleidoscopic understanding of its genesis and outcomes. The confinement of some

120,000 Japanese Americans during World War II, often called the Japanese American internment, has been described as the worst official civil rights violation of modern U. S. history. Greg Robinson not only offers a bold new understanding of these events but also studies them within a larger time frame and from a transnational perspective. Approaching Japanese confinement as a continental and international phenomenon, Robinson offers a truly kaleidoscopic understanding of its genesis and outcomes.

### **The Millennial Harbinger**

Howard Zehr is the father of Restorative Justice and is known worldwide for his pioneering work in transforming understandings of justice. Here he proposes workable principles and practices for making Restorative Justice possible in this revised and updated edition of his bestselling, seminal book on the movement. (The original edition has sold more than 110,000 copies.) Restorative Justice, with its emphasis on identifying the justice needs of everyone involved in a crime, is a worldwide movement of growing influence that is helping victims and communities heal, while holding criminals accountable for their actions. This is not soft-on-crime, feel-good philosophy, but rather a concrete effort to bring justice and healing to everyone involved in a crime. In *The Little Book of Restorative Justice*, Zehr first explores how restorative justice is different from criminal justice. Then, before letting those appealing observations drift out of reach into theoretical space, Zehr presents Restorative Justice practices. Zehr undertakes a massive and complex subject and puts it in graspable form, without reducing or trivializing it. This resource is also suitable for academic classes and workshops, for conferences and trainings, as well as for the layperson interested in understanding this innovative and influential movement.

## **A Popular and Practical Introduction to Law Studies**

## **Simple Justice**

Simple Justice is the definitive history of the landmark case Brown v. Board of Education and the epic struggle for racial equality in this country. Combining intensive research with original interviews with surviving participants, Richard Kluger provides the fullest possible view of the human and legal drama in the years before 1954, the cumulative assaults on the white power structure that defended segregation, and the step-by-step establishment of a team of inspired black lawyers that could successfully challenge the law. Now, on the fiftieth anniversary of the unanimous Supreme Court decision that ended legal segregation, Kluger has updated his work with a new final chapter covering events and issues that have arisen since the book was first published, including developments in civil rights and recent cases involving affirmative action, which rose directly out of Brown v. Board of Education. From the Trade Paperback edition.

In *Addicted to Incarceration*, author Travis Pratt uses an evidence-based approach to explore the consequences of what he terms America's "addiction to incarceration," highlighting the scope of the problem, the nature of the political discussions surrounding criminal justice policy in general and corrections policy in particular, and the social cost of incarceration. Pratt demonstrates that the United States' addiction to incarceration has been fueled by American citizens' opinions about crime and punishment, the effectiveness of incarceration as a means of social control, and perhaps most important, by policies legitimized by faulty information (e.g., fear of crime is objectively linked to victimization, petty offenders mature into violent predators, and persistent offending can be accurately predicted over the life course). Analyzing crime policies as they relate to crime rates and U.S. society's ability to both lower the crime rate and address the role of incarceration in preventing future crime, the book shows students how ineffective our rush to incarcerate has been in the last decade, as well as offering recommendations and insights into the future of this problem. Features Real world examples that put a human face on the issues open each chapter Race, ethnicity, and gender issues underlie all discussions and address key aspects of incarceration rates and crime trends The social costs of incarceration are explored, including the heightened inmate risk of personal victimization, incarceration's effect as a barrier to successful offender reintegration into society, and its role in exacerbating existing racial inequalities The final chapter contains conclusions and recommendations for future policy makers Written in an informal and accessible style, *Addicted to Incarceration* is appropriate for criminal justice policy or corrections courses at the undergraduate level and can also be used as a supplementary text in introductory criminal justice, criminology, and critical issues in criminal justice courses.

This is the first in a five volume series that will collect much of trade unionist and Socialist Party founding father Eugene V. Debs' work for the first time in a single place. The collection makes readily accessible approximately 150 documents, only a few of which were ever subsequently republished, by one of the seminal figures in the labor movement of his era.

Illuminating 19th Century labor history, particularly the complex and shifting situation in the transportation industry, this volume provides a basis for deeper understanding of Debs and his role later during the glory days of the Socialist Party of America.

Water Resources Management is a component of Encyclopedia of Water Sciences, Engineering and Technology Resources in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty one Encyclopedias. This 2-volume set contains several chapters, each of size 5000-30000 words, with perspectives, applications and extensive illustrations. It carries state-of-the-art knowledge in the fields of Water Resources Management and presents an integrated water resources management, water and sustainable development, water scarcity, and the more technical aspects of water resources planning. Important issues related to international rivers, the economics of water, and the legal and institutional aspects of water are addressed. And new approaches to water conservation, non-waterborne sanitation, and economic valuation are presented. These two volumes are aimed at the following five major target audiences: University and College Students Educators, Professional Practitioners, Research Personnel and Policy Analysts, Managers, and Decision Makers, NGOs and GOs.
