are specifically designed to help individuals prepare for the ABCN written examination. In addition, this book can be used as a teaching tool for graduate students and trainees at various levels. The book is divided into three sections: Section 1: Foundations of Clinical Neuropsychology; Section II: Fundamentals of Assessment; and Section III: Disorders and Conditions. The format is geared toward exam preparation and is much less dense than a typical textbook. Information is provided in a concise, outlined manner, with liberal use of bullets, boxes, illustrations, and tables that allow readers to easily review and integrate information into their already established knowledge base. To augment the study guide, a recommended readings list at the end of each chapter provides references to more comprehensive materials considered important or seminal in each topic area. Additionally, the book contains four 125-question mock exams designed to help readers study and prepare for the written exam. The answers to all questions are explained along with appropriate and supportive references. Features: Detailed charts and summary tables that facilitate conceptual learning Concise coverage of pediatric, adult, and geriatric issues and conditions Emphasis on critical teaching points relevant to current neuropsychological practice Mock exam questions with answers and references at the end of every chapter relevant to the content Four separate 125-question full-length mock exams with answers and references

"It felt unfair that some recruits had more information than others. Some even had past exams that previous recruit classes had gotten by working together and writing down the test questions after they had taken an exam. So to make things fair for everyone, I've decided to write this book to help give every recruit an equal
