Whether in football or in the law, Illinois Supreme Court Justice Robert Thomas has always had the "best view from the bench." Bob Thomas got his start in football at the University of Notre Dame, kicking for the famed "Fighting Irish" in the early 1970s. Claimed off waivers by the Chicago Bears in 1975, Thomas helped to take the franchise from their darkest days to their brightest. Yet, on the cusp of the team's greatest moment, he was struck with a shocking blow that challenged his fortitude. In this dramatic retelling of Bob Thomas's fascinating life, renowned sports writer Doug Feldmann shows how neither football nor the law was part of Thomas's dreams while growing up the son of Italian immigrants in Rochester, New York, in the 1960s. Chasing excellence on both the gridiron and in the courtroom, however, would require resilience in ways he could not have imagined. As *A View from Two Benches* shows us, Bob Thomas reached the top of two separate and distinct

professions, guided by a bedrock of faith that has impacted his decisions and actions as both a football player and a judge, helping him navigate the peaks and valleys of life. As Doug Feldmann reveals, Bob Thomas has always stayed true to the values he learned in his earliest days. Doug Feldmann's rich biography of an accomplished kicker and a proud justice of the law shows us that determination and resilience go a long way to a successful and impactful life.

LEGO City: Build This City!

This Selected Issues paper discusses the impact of workforce aging on productivity in the euro area. The euro area population has aged considerably over the past few decades, and the process is expected to accelerate in the years ahead. At the same time, labor productivity growth in the euro area has been sluggish, posing risks to long-term growth prospects. It is estimated that workforce aging could significantly retard total factor productivity (TFP) growth over the medium to long term. Given current demographic projections from the Organisation for Economic Co-operation and Development, the aging of the workforce in the euro area could lower TFP growth by about 0.2 percentage points each year between 2014 and 2035. Appropriate policies can, however, mitigate the adverse effects of aging.

This book has been developed from its earlier and far less formal presentment as the proceedings of a symposium entitled The Biochemistry of S-Adenosylmethionine as a Basis for Drug Design that was held at the Solstrand Fjord Hotel in Bergen, Norway on June 30-July 4, 1985. The purpose of the symposium was to bring together scientists from various disciplines (biochemistry, pharmacology, virology, immunology, chemistry, medicine, and so on) to discuss the recent advances that have been made in our understanding of the biological roles of S adenosylmethionine (AdoMet) and to discuss the feasibility of utilizing AdoMet-dependent enzymes as targets for drug design. Thus the information provided herein will be of value not only to basic scientists involved in elucidating the role of AdoMet in biology, but also to medicinal chemists who are using this basic knowledge in the process of drug design. The volume should also be of interest to pharmacologists and clinicians involved in biological evaluation of potential therapeutic agents arising from the efforts of the biochemists and medicinal chemists. Each plenary speaker at the symposium was requested to submit a chapter reviewing recent contributions of their discipline to our base of knowledge about the biological role of AdoMet. Topics covered in this volume include protein and phospholipid methylations (Section A), nucleic acid methyl ations (Section B), the regulation of AdoMet, S-adenosylhomocysteine, and methylthioadenosine metabolism (Section C), clinical aspects of AdoMet (Section D), and the design, synthesis, and biological evaluation of trans methylation inhibitors (Section E).
