At a summer tea party in Cambridge, England, a lady states that tea poured into milk tastes differently than that of milk poured into tea. Her notion is shouted down

by the scientific minds of the group. But one guest, by the name Ronald Aylmer Fisher, proposes to scientifically test the lady's hypothesis. There was no better person to conduct such a test. For Fisher had brought to the field of statistics an emphasis on controlling the methods for obtaining data and the importance of interpretation. He knew that how the data was gathered and applied was as important as the data themselves. In *The Lady Tasting Tea*, readers will encounter not only Ronald Fisher's theories (and their repercussions), but the ideas of dozens of men and women whose revolutionary work affects our everyday lives. Writing with verve and wit, author David Salsburg traces the rise and fall of Karl Pearson's theories, explores W. Edwards Deming's statistical methods of quality control (which rebuilt postwar Japan's economy), and relates the story of Stella Cunliff's early work on the capacity of small beer casks at the Guinness brewing factory. *The Lady Tasting Tea* is not a book of dry facts and figures, but the history of great individuals who dared to look at the world in a new way.

"Dan Simmons writes with the salty grace and precision of Patrick O'Brian. But in piling supernatural nightmare upon historical nightmare, layering mystery upon mystery, he has produced a turbocharged vision of popular doom." -Men's Journal
Greeted with excited critical praise, this extraordinary novel-inspired by the true story of two ice ships that disappeared in the Arctic Circle during an 1845 expedition-swells with the heart-stopping suspense and heroic adventure that have won Dan Simmons praise as "a writer who not only makes big promises but keeps them" (Seattle Post-Intelligencer). THE TERROR chills readers to the core. "Brutal, relentless, yet oddly uplifting, THE TERROR is a masterfully chilling work."
-Entertainment Weekly "In the hands of a lesser writer than Dan Simmons, THE TERROR might well have dissolved into a series of frigid days and three-dog nights. But Simmons is too good a writer to ignore the real gold in his story-its beleaguered cast." -Bookpage "Guaranteed to have readers pulling their covers up to their noses, THE TERROR will make for a blood-freezing, bedtime read this winter-and any season thereafter." -Pages

U.S. Arctic waters north of the Bering Strait and west of the Canadian border encompass a vast area that is usually ice covered for much of the year, but is increasingly experiencing longer periods and larger areas of open water due to climate change. Sparsely inhabited with a wide variety of ecosystems found nowhere else, this region is vulnerable to damage from human activities. As oil and gas, shipping, and tourism activities increase, the possibilities of an oil spill also increase. How can we best prepare to respond to such an event in this challenging environment? Responding to Oil Spills in the U.S. Arctic Marine Environment

reviews the current state of the science regarding oil spill response and environmental assessment in the Arctic region north of the Bering Strait, with emphasis on the potential impacts in U.S. waters. This report describes the unique ecosystems and environment of the Arctic and makes recommendations to provide an effective response effort in these challenging conditions. According to *Responding to Oil Spills in the U.S. Arctic Marine Environment*, a full range of proven oil spill response technologies is needed in order to minimize the impacts on people and sensitive ecosystems. This report identifies key oil spill research priorities, critical data and monitoring needs, mitigation strategies, and important operational and logistical issues. The Arctic acts as an integrating, regulating, and mediating component of the physical, atmospheric and cryospheric systems that govern life on Earth. Not only does the Arctic serve as regulator of many of the Earth's large-scale systems and processes, but it is also an area where choices made have substantial impact on life and choices everywhere on planet Earth. This report's recommendations will assist environmentalists, industry, state and local policymakers, and anyone interested in the future of this special region to preserve and protect it from damaging oil spills.

Now including an excerpt from *Lust & Wonder*, a new memoir coming in March 2016. *Running with Scissors* is the true story of a boy whose mother (a poet with

delusions of Anne Sexton) gave him away to be raised by her psychiatrist, a dead-ringer for Santa and a lunatic in the bargain. Suddenly, at age twelve, Augusten Burroughs found himself living in a dilapidated Victorian in perfect squalor. The doctor's bizarre family, a few patients, and a pedophile living in the backyard shed completed the tableau. Here, there were no rules, there was no school. The Christmas tree stayed up until summer, and Valium was eaten like Pez. And when things got dull, there was always the vintage electroshock therapy machine under the stairs. Running with Scissors is at turns foul and harrowing, compelling and maniacally funny. But above all, it chronicles an ordinary boy's survival under the most extraordinary circumstances.

In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

An internationally bestselling comic novel in which a man—with the help of a bunny—suddenly realizes what’s important in life “Escapism at its best . . . Just pure fun.” —NPR.org “Which of us has not had that wonderfully seditious idea: to play hooky for a while from life as we know it?” With these words from his foreword, Pico Iyer puts his finger on the exhilaratingly anarchic appeal of *The Year of the Hare*, a novel in the bestselling tradition of *Watership Down*, *Jonathan Livingston Seagull*, and *Life of Pi*. While out on assignment, a journalist hits a hare with his car. This small incident becomes life-changing: he decides to quit his job, leave his wife, sell his possessions, and spend a year wandering the wilds of Finland—with the bunny as his boon companion. What ensues is a series of comic misadventures, as everywhere they go—whether chased up a tree by dogs, or to a formal state dinner, or in pursuit of a bear across the Finnish border with Russia—they leave mayhem (and laughter!) in their wake.

An investigation into the nature of violence, terror, and trauma through conversations with a notorious war criminal and hero to white nationalists *Between*

October 2014 and November 2016, global terrorism expert Jessica Stern held a series of conversations in a prison cell in The Hague with Radovan Karadzic, a Bosnian Serb former politician who had been indicted for genocide and other war crimes during the Bosnian War and who became an inspiration for white nationalists. Though Stern was used to interviewing terrorists in the field in an effort to understand their hidden motives, the conversations she had with Karadzic would profoundly alter her understanding of the mechanics of fear, the motivations of violence, and the psychology of those who perpetrate mass atrocities at a state level and who—like the terrorists she had previously studied—target noncombatants, in violation of ethical norms and international law. How do leaders persuade ordinary people to kill their neighbors? What is the “ecosystem” that creates and nurtures genocidal leaders? Could anything about their personal histories, personalities, or exposure to historical trauma shed light on the formation of a war criminal’s identity in opposition to a targeted Other? In *My War Criminal*, Jessica Stern brings to bear her incisive analysis and her own deeply considered reactions to her interactions with Karadzic, a brilliant and often shockingly charming psychiatrist and poet who spent twelve years in hiding, disguising himself as an energy healer, while also offering a deeply insightful and sometimes chilling account of the complex and even seductive powers of a magnetic leader—and what can happen when you spend many, many hours with that person.

"And God said, Let us make man in our image, after our likeness; and let them have dominion over the fish of the sea, and over the fowl of the air, and over the cattle, and over all the earth, and over every creeping thing that creepeth upon the earth." --Genesis 1:24-26 In this crucial passage from the Old Testament, God grants mankind power over animals. But with this privilege comes the grave

responsibility to respect life, to treat animals with simple dignity and compassion. Somewhere along the way, something has gone wrong. In Dominion, we witness the annual convention of Safari Club International, an organization whose wealthier members will pay up to \$20,000 to hunt an elephant, a lion or another animal, either abroad or in American "safari ranches," where the animals are fenced in pens. We attend the annual International Whaling Commission conference, where the skewed politics of the whaling industry come to light, and the focus is on developing more lethal, but not more merciful, methods of harvesting "living marine resources." And we visit a gargantuan American "factory farm," where animals are treated as mere product and raised in conditions of mass confinement, bred for passivity and bulk, inseminated and fed with machines, kept in tightly confined stalls for the entirety of their lives, and slaughtered in a way that maximizes profits and minimizes decency. Throughout Dominion, Scully counters the hypocritical arguments that attempt to excuse animal abuse: from those who argue that the Bible's message permits mankind to use animals as it pleases, to the hunter's argument that through hunting animal populations are controlled, to the popular and "scientifically proven" notions that animals cannot feel pain, experience no emotions, and are not conscious of their own lives. The result is eye opening, painful and infuriating, insightful and rewarding. Dominion is a plea for human benevolence and mercy, a scathing attack on those who would dismiss animal activists as mere sentimentalists, and a demand for reform from the government down to the individual. Matthew Scully has created a groundbreaking

work, a book of lasting power and importance for all of us.

Victor Mancini, a medical-school dropout, is an antihero for our deranged times. Needing to pay elder care for his mother, Victor has devised an ingenious scam: he pretends to choke on pieces of food while dining in upscale restaurants. He then allows himself to be “saved” by fellow patrons who, feeling responsible for Victor’s life, go on to send checks to support him. When he’s not pulling this stunt, Victor cruises sexual addiction recovery workshops for action, visits his addled mom, and spends his days working at a colonial theme park. His creator, Chuck Palahniuk, is the visionary we need and the satirist we deserve.
