This Brief brings together empirical accounts that contribute to the investigation of the cultural phenomena of deep personal experiences. It examines everyday life experiences and its influence on the development of successful social interactions. Issues of silence, the subjective feelings of opportunities, and culturally canalized feelings of "being here" or "being influenced by others" are all deep personal experiences that are rooted within the framework of cultural psychology. By bringing together the discourses of Dialogical Self Theory (DST) and Cultural Psychology of Semiotic Mediation for a new generation of researchers who address issues of this phenomenon, chapters aim to link

phenomena-saturated empirical accounts with general theoretical innovations. In addition, the Brief studies socially relevant issues from the lenses of Cultural Psychology. Topics featured in this Brief include: Globalization and its effect on identity and personal experiences. The subjective nature of opportunities. Migrating identities across generations. Serious illness and its influence on communication. Deep Experiencing will be of interest to researchers, professors, and graduate students in the fields of psychology, cognitive psychology, medicine, anthropology, social work, and aesthetics.

Monsieur de Camors

Unique among U.S. maritime cargo operations, the Aleutian trade is and has always been carried on by small break-bulk cargo vessels, through severe weather, and a grueling schedule; not an industry for the weak, timid, or foolhardy. Contained in these pages is a history of the Aleutian trade, from the sailing vessels of the 19th century that transported salted cod, to the mailboats that for decades provided the region's only scheduled communication with the outside world, to the make-do, rough-and-tumble, seafood-driven fleet expansion of the 1980s, to the small but capable fleet of today. It is a history of small ships and the people who owned and operated them, set in a severe and unforgiving environment, and framed by an evolving marine resource-based economy.

A Front Page Affair

The Story of the Book of Mormon

This is a collection of new essays on Peter Tremayne's Sister Fidelma novels, which feature Sister Fidelma's

attempts to solve a wide range of crimes, often murders that occur under especially mysterious conditions. The novels, set mainly in 7th century Ireland, also include a great deal of history, which is not surprising given that the author is actually Peter Berresford Ellis, a noted Celtic historian. Some of the essays analyze aspects of the novels, focusing especially on the protagonist and her partner in detection and, ultimately, husband, Brother Eadulf. Other essays place Fidelma and the novels within the tradition of detective fiction. Still others explore the historical, intellectual, spiritual and geographical contexts for her labors. Also included are accounts of the author's career, the International Sister Fidelma Society, and the biennial Sister Fidelma conferences held in Cashel, Ireland.

Bering Sea Strong

Cod is one of the most widely consumed fish in the world. For many years, the Atlantic cod industry took center stage, but partly thanks to climate change and overfishing, it is more and more likely that the cod on your kitchen table or in your fast food fish fillets came from Alaska's Pacific Cod Fishery. Alaska Codfish Chronicle is the first comprehensive history of this fishery. It looks at the early decades of the fishery's

history, a period marked by hardship and danger, as well as the dominance of foreign fishermen. And the modern era, beginning in 1976 when the United States claimed an exclusive economic zone around the Alaska coasts, “Americanizing” the fishery and replacing the foreign fleets that had been ravaging the resources in the Gulf of Alaska and the Bering Sea. Today, the Pacific cod fishery is, in terms of poundage, the second largest fishery in Alaska, and considered among the best-managed fisheries in the world. This history is extremely well documented, does not spare details, and is accessible to general readers. It incorporates nearly a hundred photographs and illustrations and is sprinkled with numerous observations from fishing industry journals and reports, even incorporating poems and recipes, making this an especially thorough and unique account of one of Alaska’s most iconic and important industries.

This book presents expert opinions on a variety of key topics related to the management of breast cancer, with a focus on the implications of recent advances and research findings for clinical practice. It also explores the controversy regarding mammography screening and reviews the contribution of new imaging modalities. Considerable attention is paid to developments in surgical procedures, including the potential for the safe and effective use of sentinel lymph node dissection alone—even in patients with positive nodes—and to the advantages and contraindications of new radiotherapy techniques. Genetic aspects are discussed in detail, including an assessment of the role of genetic testing and the potential impact of genetic signatures on breast cancer management. New systemic strategies, such as anti-HER2 therapy, endocrine agents, and agents to reverse endocrine resistance, are considered, and

sea for ninety days as the lone female trying to tuck in tight alongside twenty-five rough-and-tumble commercial fishermen in Alaska, Laura Hartema offers a rare glimpse into the intertwining worlds of a fisheries observer and the crew she works beside. She graphically illustrates the challenges of daily life and relationships in a way few have seen before. Her story provides an unprecedented portrait of the bizarre and entertaining human dynamics aboard an at-sea catcher-processor vessel, where men battle dangerous working conditions, loneliness, and boredom while rivaling for the attention of the only woman. Between trough and crest, Laura ponders the trauma and tragedies of her Midwest childhood as her capabilities and resilience are regularly tested. She is often left deciding when to “blow it off” and when to “blow a gasket.” In the end, the tumultuous Bering Sea is where she finds the strength to overcome the wounds of her past, embrace life’s uncertainty, and steam ahead into the uncharted waters of her future. Bering Sea Strong demonstrates one woman’s determination to overcome obstacles in pursuit of a satisfying career and a better life.

Murphy explains the I Ching hexagram system, revealing its roots in human psychology and the principle of constant change. Demystifying obscure terms and symbols, the author leads the way to consulting the I Ching for clarity and guidance in times of confusion and crisis. By combining basic mathematical formulas with spiritual awareness, readers will realize the miracle-working potential of their own mind and connect with the I Ching's truths. As a result, they'll gain vital insights into questions about career, family, romance, financial security, and life goals. And they'll discover the wonder of genuine peace of mind. SECRETS OF THE I CHING, does not claim to predict the future. But it does provide the tools to mark any future with the promise of greater personal and spiritual fulfillment.
