This book is for all people who are forced to use UNIX. It is a humorous book--pure entertainment--that maintains that UNIX is a computer virus with a user interface. It features letters from the thousands posted on the Internet's "UNIX-Haters" mailing list. It is not a computer handbook, tutorial, or reference. It is a self-help book that will let readers know they are not alone.

Clapperton Mavhunga's collection of essays about science, technology, and innovation (STI) from an African perspective opens with the idea, "Things do not (always) mean the same from everywhere; when we insist that only 'our' meaning is the meaning, we silence other people's meanings." Mavhunga and his contributors argue that our contemporary definitions of STI are those of countries and cultures that have acquired their dominance of others through global empires, and as a counter to that, Mavhunga seeks to put the concepts of STI into question, exploring what the technological, scientific, and innovative might mean from Africa in lieu of outside introductions or influences. We strongly feel that this book is suited to the Knowledge Unlatched program because of the difficulty of reaching markets and readers in Africa with print books. We feel unlatching would go a long way toward helping Mavhunga reach an important audience for this work that we have been previously unable to reach.

The Systems Modeling Language (SysML) extends UML with powerful systems engineering capabilities for modeling a wider spectrum of systems and capturing all aspects of a system's design. SysML Distilled is the first clear, concise guide for everyone who wants to start creating effective SysML models. (Drawing on his pioneering experience at Lockheed Martin and NASA, Lenny Delligatti illuminates SysML's core components and provides practical advice to help you create good models and good designs. Delligatti begins with an easy-to-understand overview of Model-Based Systems Engineering (MBSE) and an explanation of how SysML enables effective system specification, analysis, design, optimization, verification, and validation. Next, he shows how to use all nine types of SysML diagrams, even if you have no previous experience with modeling languages. A case study running through the text demonstrates the use of SysML in modeling a complex, real-world sociotechnical system. Modeled after Martin Fowler's classic UML Distilled, Delligatti's indispensable guide quickly teaches you what you need to know to get

Drawing on two waves of interviews with undocumented young adults, Enriquez investigates how immigration status creeps into the most personal aspects of everyday life, intersecting with gender to constrain family formation. The imprint of illegality remains, even upon obtaining DACA or permanent residency. Interweaving the perspectives of US citizen romantic partners and children, Enriquez illustrates the multigenerational punishment that limits the upward mobility of Latino families. *Of Love and Papers* sparks an intimate understanding of contemporary US immigration policies and their enduring consequences for immigrant families.

laboratory in 1936. While visiting the Radiation Laboratory in Berkeley, California in 1938, he learned that he had been dismissed from his Palermo post by Mussolini's Fascist regime. Ernest O. Lawrence hired him to work on the cyclotron at Berkeley with Luis Alvarez, Edwin McMillan, and Glenn Seaborg. Segrè was one of the first to join Oppenheimer at Los Alamos, where he became a group leader on the Manhattan Project. In 1959, he won the Nobel Prize in physics for the discovery of the antiproton. He was a professor of physics at UC Berkeley from 1946 until 1972. "[A] readable, absorbing, interesting autobiography A valuable contribution by a person who witnessed the development of much of modern nuclear physics. Segrè's description of the historic neutron experiments performed in Rome during the mid-1930s by Enrico Fermi's group, of which Segrè was a member, is of inestimable worth." — Glenn T. Seaborg, *Physics Today* "A Mind Always in Motion is Emilio Segrè's account — published four years after his death in 1989 — of his personal life and his life in physics It is absorbing, moving in places and frequently revealing. Segrè noted in his preface, 'I have not sought to display manners and tact I never had, and I have tried to treat myself no better than any one else.' He ably succeeded in these purposes." — Daniel J. Kevles, *Nature* "For general readers with an interest in the history of nuclear physics, Segrè is among the most personable witnesses." — *Publishers Weekly*

policies from 1983 to 1993, she shows the crucial role of the household in survival strategies among low-income Egyptians. Hoodfar, an Iranian Muslim by birth, presents research that undermines many of the stereotypes associated with traditional Muslim women. Their apparent conservatism, she says, is based on rational calculation of the costs and benefits of working within formal and informal labor markets to secure household power. She posits that increasing adherence to Islam and taking up the veil on the part of women has been partially motivated by women's desire to protect and promote their interests both within and beyond households.

seven, Firoozeh Dumas and her family moved from Iran to Southern California, arriving with no firsthand knowledge of this country beyond her father's glowing memories of his graduate school years here. More family soon followed, and the clan has been here ever since. *Funny in Farsi* chronicles the American journey of Dumas's wonderfully engaging family: her engineer father, a sweetly quixotic dreamer who first sought riches on Bowling for Dollars and in Las Vegas, and later lost his job during the Iranian revolution; her elegant mother, who never fully mastered English (nor cared to); her uncle, who combated the effects of American fast food with an army of miraculous American weight-loss gadgets; and Firoozeh herself, who as a girl changed her name to Julie, and who encountered a second wave of culture shock when she met and married a Frenchman, becoming part of a one-couple melting pot. In a series of deftly drawn scenes, we watch the family grapple with American English (hot dogs and hush puppies?—a complete mystery), American traditions (Thanksgiving turkey?—an even greater mystery, since it tastes like nothing), and American culture (Firoozeh's parents laugh uproariously at Bob Hope on television, although they don't get the jokes even when she translates them into Farsi). Above all, this is an unforgettable story of identity, discovery, and the power of family love. It is a book that will leave us all laughing—without an accent. Praise for *Funny in Farsi* “Heartfelt and hilarious—in any language.”—*Glamour* “A joyful success.”—*Newsday* “What's charming beyond the humor of this memoir is that it remains affectionate even in the weakest, most tenuous moments for the culture. crime, and collapsing infrastructure. Abandoned in the Heartland takes us into the lives of East St. Louis's predominantly African American residents to find out what has happened since industry abandoned the city, and jobs, quality schools, and city services disappeared, leaving people isolated and imperiled. Jennifer Hamer introduces men who search for meaning and opportunity in dead-end jobs, women who often take on caretaking responsibilities until well into old age, and parents who have the impossible task of protecting their children in this dangerous, and literally toxic, environment. Illustrated with historical and contemporary photographs showing how the city has changed over time, this book, full of stories of courage and fortitude, offers a powerful vision of the transformed circumstances of life in one American suburb.
