Avalanche of Spirits is part personal memoir and part historical account. It tells the true story of Karen Frazier's experiences at the site of the biggest avalanche disaster in the history of the United States. At least 96 people died in that avalanche on March 1, 1910. Nearly 100 years later, friends took Karen Frazier to visit the site of the Wellington disaster. What she experienced there changed her life forever. Karen - and many others - have come to believe that spirits still remain in the town of Wellington. Karen Frazier spent the summer and fall of 2009 visiting Wellington, researching the history of the avalanche and town, and interviewing people who have had unusual experiences there. Avalanche of Spirits: The Ghosts of Wellington is a unique combination of all three. Part historical account, part ghost story and part personal memoir, Karen weaves together the past and the present in a compelling story that will keep you spellbound. Cover photo by Patty Valdez.

Why God Won't Go Away

According to José Stevens and Lena Stevens, business leaders and shamans share many important traits: the abilities to solve problems, to achieve goals, to see the big picture, and to forecast events. What their previous book, Secrets of Shamanism, did for the growth of the individual, The Power Path does for the growth of business managers and entrepreneurs. On the basis of years of study with shamans, the authors share a new way of thinking about the nature of power. By applying shamanic traditions of power to the workplace, readers learn how to improve work relationships, to understand employees' strengths and limitations, and to inspire effective teamwork — techniques aimed ultimately toward increasing business success.

Avalanche of Spirits

Today, 46 years after the UFO abduction of Betty and Barney Hill, more and more people are convinced that UFOs are real and their existence is being covered up by the government. If you have doubts or questions about the Hill case or alien

experiences in general, *Captured!* will give you the answers you're searching for. The 1961 abduction of the Hills stirred worldwide interest, primarily because of the book *The Interrupted Journey*, the subsequent media coverage, and a 1975 TV movie, *The UFO Incident*. The case is mentioned in almost all UFO abduction books. It also became a target for debunkers, who still attack it today. But the complete story of what really happened that day, its effect on the participants, and the findings of investigators has never been told until now. In *Captured!* you'll get an insider's look at the alien abduction, previously unpublished information about the lives of the Hills before and after Barney's death in 1969, their status as celebrities, Betty's experiences as a UFO investigator, and other activities before her death in 2004. Kathleen Marden, Betty Hill's niece, shares details from her discussions with Betty and from the evidence of the UFO abduction. She also looks at the Hills' riveting hypnosis sessions about their time onboard the spacecraft. The transcripts of these sessions provide insight into the character of the aliens, including their curiosity, their democratic discussions, and their desire to avoid inflicting pain. In addition, co-author, physicist, and ufologist Stanton T. Friedman, the original civilian investigator of the Roswell Incident, reviews and refutes the arguments of those who have attacked the Hill case, including the star map Betty Hill saw inside the craft and later recreated.

Phantoms in the Brain

===epub format=== . The legends of Ireland and Scotland tell a fantastic tale of an Egyptian queen and her Greek husband, who were exiled from Egypt to Ireland at some point during the second millennium BC. It is said that it was from this Queen Scotia and King Gaythelos that the modern titles for the Scottish and Gaelic people were derived. But what are we to make of this ancient story – is it based more upon fact or fiction? Historians have, as one might expect, taken the story to be complete fiction; but Ralph Ellis has taken a lateral look at this mythology, and found many links and associations that lead to one inescapable conclusion – that the extraordinary tale of Queen Scotia and King Gaythelos is probably true. Our Mind in a Controlled Quantum Euclidean Space?

In the early morning hours of March 28, 2011, Charles and Helene Fontaine experienced something that shattered their beliefs about the nature of reality. One evening in 1981, Connie J Cannon was on I-75 with her young son, en route to their new home in Florida, when they suddenly found themselves on a military base, with a man in uniform holding a gun to her head as three Grays stood nearby. In 1979, Diane Fine was on her way from upstate New York to Vermont to see an obstetrics specialist for her high risk pregnancy, and experienced two hours of missing time. When she was finally examined at the clinic, she was told wasn't pregnant. In 1970, pilot Bruce Gernon was chased by something through the Bermuda Triangle and he has been talking about it ever since-to UFO Hunters, the Discovery Channel, National Geographic,

the History Channel, the Sci-Fi channel, and all their foreign counterparts. These individuals have never met. But they share something significant. In 2003, a Roper Organization survey revealed that 33 million Americans may be abductees. Aliens in the Backyard is their story. "Trish and Rob MacGregor have written a sobering, engaging and important book about the mysterious subject of alien abduction. When I read it, I was reminded of how little we know about this incredible, complex and enigmatic subject, and just how much light this insightful book sheds on it. If we are ever going to understand this phenomenon, books such as this are essential. Read it and wonder: what have we missed about our world? Perhaps the most important thing that has ever happened. Aliens in the Back Yard is a treasure." Whitley Strieber

Top Secret/Majic is the result of nuclear physicist and renowned UFO investigator Stanton T. Friedman's twenty-one year search for the truth about the mysterious Operation Majestic 12, President Truman's top-secret UFO investigation team. In this updated edition of his landmark book, he tells the incredible tale of the July, 1947 recovery of a crashed flying saucer near Roswell, New Mexico, and the establishment by President Truman of a truly all-star cast to deal with the saucer and its non-human inhabitants. The first four Directors of Central Intelligence, the first Secretary of Defense, and several outstanding scientists and military leaders were part of the team. Through painstaking research and startling evidence?including documents that have never before been published?Friedman effectively exposes the U.S. government's biggest-kept secret: a fifty-eight year UFO cover-up.

Real Aliens, Space Beings, and Creatures from Other Worlds

Also available in an open-access, full-text edition at <http://oaktrust.library.tamu.edu/handle/1969.1/85764> "What we wish to know, and most desire, remains unknowable and lies beyond our grasp." With these words, James Hollis leads readers to consider the nature of our human need for meaning in life and for connection to a world less limiting than our own. In *The Archetypal Imagination*, Hollis offers a lyrical Jungian appreciation of the archetypal imagination. He argues that without the human mind's ability to form energy-filled images that link us to worlds beyond our rational and emotional capacities, we would have neither culture nor spirituality. Drawing upon the work of poets and philosophers, Hollis shows the importance of depth experience, meaning, and connection to an "other" world. Just as humans have instincts for biological survival and social interaction, we have instincts for spiritual connection as well. Just as our physical and social needs seek satisfaction, so the spiritual instincts of the human animal are expressed in images we form to evoke an emotional or spiritual response, as in our dreams, myths, and religious traditions. The author draws upon the work of the poet Rainer Maria Rilke's *Duino Elegies* to elucidate the archetypal imagination in literary forms. To underscore the importance of incarnating depth experience, he also examines a series of paintings by Nancy Witt. With the power of the archetypal imagination available to all of us, we are invited to summon courage to take on the world anew, to relinquish outmoded identities and defenses, and to risk a radical re-imagining of the larger possibilities of the world and of the self.

The Symbolic Quest

Within you is a greater, wiser self that is not bound by your fears, worries, or perceived limitations. Dr. José Luis Stevens calls this the Inner Shaman—the part of you that connects directly to the true source of the universe. "The shamans of every tradition know that the physical world we can see and touch is a mere shadow of the true spirit world," writes Dr. Stevens. With *Awaken the Inner Shaman*, he presents a direct and practical guide for opening our eyes to the greater wisdom and knowing within—and stepping into the power and responsibility we possess to shape and serve our world. In this rousing and provocative book, he invites readers to discover: What is the Inner Shaman? How an understanding of our deeper spiritual potential shows up in every mystical and scientific tradition. Seeing through the heart—why the heart offers us the most immediate path for accessing the Inner Shaman Illuminating the Inner Shaman through spirituality, quantum physics, medical science, and experiential knowing The Inner Shaman in action—how to stop living from the egoic mind and put your true essence in charge Eight tools to strengthen your connection to the Inner Shaman, and much more Humanity has become enthralled by the Siren's song of technological progress, which has lured us away from the spiritual source that truly sustains us. In *Awaken the Inner Shaman*, Dr. José Stevens challenges us to reclaim our lost power to heal, see truly, and fulfill our purpose in life. As Dr. Stevens writes: "The Inner Shaman, suppressed and ignored for centuries, can be discovered in the most obvious place possible—within your own heart."

What was the purpose of all the megalithic architecture that was created all around the world during the Stone-Age? Ralf has developed a theory that each of these structures represents a map of the world, a map that may have been designed to pinpoint the location of the mythical Hall of Records. There is no difficulty in seeing these maps, at Stonehenge and Giza, one just needs a little lateral thinking. In fact, a six-year old is more likely to spot them than an adult. Ralph also demonstrates how important the metrology of Giza was to the ancients. In fact we still use these units today, for the Great Pyramid measures 1760 cubits around the base and the Imperial Mile measures 1760 yards. Thus America in particular is still using Egyptian metrology. The Megalithic Map series Latest version v5.4 Stonehenge, Avebury, Silbury, Henge, Great Pyramid, Giza, Meidum, Pyramid, Precession.

The Archetypal Imagination

Fiction. INVINCIBLE SUMMERS explores the agony of family. The story begins with the death of Claudia Goodwin's father, and then plunges into the murkier emotional trouble that follows for years. Through the 1960s and 70s, the world around Claudia moves on. But her loss walks along with her. Gaines deftly manages that loss and the way it floats through time—not shrinking but morphing, not fading but fusing to all of Claudia's experiences. As the chapters progress through two tumultuous decades, they show how parents fumble their own children, how siblings abandon one another, and how people become itinerant and self-destructive. This is no simplistic tale of self-discovery, nor is it a dirge. It is, in Claudia's own words, a restless search for nowhere fueled by moments of whimsy, humor, and hope. I am glad to have read Gaines's fine debut novel and look forward to her next.

King Jesus, from Kam (Egypt) to Camelot

Neuroscientist V.S. Ramachandran is internationally renowned for uncovering answers to the deep and quirky questions of human nature that few scientists have dared to address. His bold insights about the brain are matched only by the stunning simplicity of his experiments -- using such low-tech tools as cotton swabs, glasses of water and dime-store mirrors. In

Phantoms in the Brain, Dr. Ramachandran recounts how his work with patients who have bizarre neurological disorders has shed new light on the deep architecture of the brain, and what these findings tell us about who we are, how we construct our body image, why we laugh or become depressed, why we may believe in God, how we make decisions, deceive ourselves and dream, perhaps even why we're so clever at philosophy, music and art. Some of his most notable cases: A woman paralyzed on the left side of her body who believes she is lifting a tray of drinks with both hands offers a unique opportunity to test Freud's theory of denial. A man who insists he is talking with God challenges us to ask: Could we be "wired" for religious experience? A woman who hallucinates cartoon characters illustrates how, in a sense, we are all hallucinating, all the time. Dr. Ramachandran's inspired medical detective work pushes the boundaries of medicine's last great frontier -- the human mind -- yielding new and provocative insights into the "big questions" about consciousness and the self.

Real Zombies, the Living Dead, and Creatures of the Apocalypse

A chilling chronicle of the often ignored history of vampirism as it has surfaced repeatedly in news articles, historical accounts, and first person interviews, this shocking account of occultist rituals and the inhuman forces that influence them shines a light on the horrifying truth. Revealing that real vampires are not immortal, do not have fangs or sleep in coffins, and have no fear of sunlight or crucifixes, the examination dispels many myths but also confirms the truth behind several traits of real vampires, such as the insatiable thirst for blood and the dream of an eternal soul. Complete with 30 spine-tingling tales of the hideous wraiths and creatures that lurk in shadow, this fascinating collection includes the stories of the Mexican prostitute who mesmerized an entire village, convincing them she was an Incan goddess who required human sacrifice for her magic; the three teenagers who left a trail across the South as they conducted blood-drinking rituals with animals; and the mysterious Lady in Black who draws psychic energy from men who dare approach her as she wanders through city streets and parks.

Sweet Starfire

My mind was spinning at this point. Here I was - someone who grew up not believing in ghosts, a veteran journalist used to questioning everything - apparently having a conversation with a captain who fought at Gettysburg more than 150 years ago. Was it really possible? Was this some gigantic, wildly ingenious incredible hoax, or was this conversation somehow real? And what was it that brought me - a once dyed-in-the-wool paranormal doubter - to this haunted bridge in search of ghosts? - Don Allison After years of experiences that he could not rationally explain -- experiences that many people encounter, and do shrug off or rationalize - award winning newspaper editor and columnist Don Allison decided to search for answers. Experiences that Don and his grandson experienced in Gettysburg in the spring of 2015 finally convinced Don to present this serious look at the paranormal.. This is what noted paranormal investigator and historian Mark Nesbitt, author of the "Ghosts of Gettysburg" series of books, has to say about "I Met a Ghost at Gettysburg": "A great read. Very entertaining I think you've created an "Everyman's" explanation of paranormal experiences. Most people ignore or rationalize away true paranormal events. Your book covers the many types of paranormal events AS paranormal events, and explains how you came (reluctantly, in some cases) to those conclusions." Ghosts busted: Beyond the Fear Testimony throughout recorded history proves beyond a reasonable doubt that ghosts, or energy giving us the impression of ghosts, do indeed exist. People of impeccable reputations, with no reason to lie, have sworn to paranormal encounters. For whatever reason - perhaps fear, perhaps superstition - many people refuse to even consider the possibility of ghosts. In fact, they will go on the attack against those who do share their experiences. Veteran award-winning daily newspaper editor Don Allison used to be among those devout skeptics, even going so far as to doubt his own grandmother's claims of experiences in a haunted house. But after encountering the unexplained many times, he reluctantly concluded he indeed had experienced the paranormal. Eventually, after what he described as a mind-blowing paranormal encounter at Gettysburg, Pa., he could contain his curiosity no longer. He decided to write about his experiences, and to go a step further - to share the science behind what he had encountered. The result is the latest volume from Faded Banner Publications, "I Met a Ghost at Gettysburg: A Journalist's Journey into the Paranormal." Allison said fear of people's reactions to a book on

this topic made him think long and hard before tackling this project. "Once I decided to proceed with this book," he explains, "I realized I could hold nothing back. I am treating the paranormal as I would any other topic. I am sharing my own experiences and what I have learned from research. I am passing on what other people have told me about the subject and in some cases their own perceptions of what I have experienced." The National Aeronautics and Space Administration—NASA—was established on July 29, 1958. Ever since that day, NASA has been at the forefront of efforts to explore outerspace, resulting in the Apollo missions to the moon, the Skylab space-station, and today's space shuttle. But behind the open face of NASA, there is a much more mysterious world. NASA has been linked to a wealth of high-level cover-ups, including: Claims that the Apollo moon landings of 1969 to 1972 were faked as part of an effort to demonstrate military and technological superiority over the former Soviet Union. NASA's role in hiding the truth about the controversial face on Mars—which many believe to be a carved structure, created in the remote past by long-extinct, indigenous Martians. Top Secret/Majic

Contrary to orthodox perceptions, King Jesus and Queen Mary Magdalene were the richest couple in Syrio-Judaea. The Romans wanted to impose taxes on Jesus and Mary, which provoked the Jewish War. King Jesus fought and lost that war, so he was crucified, reprieved and sent into exile in Roman England. There, King Jesus became known as Atur-tii (the Egyptian) or 'King Arthur and the twelve disciples of the Last Supper Table'. This identification of Jesus as a wealthy, royal, warrior-hero of first century Judaea may sound bizarre, but that is what the texts say. All research and quotations are from original sources, including the New Testament, Tanakh, Talmud, Josephus, Origen, Eusebius, Irenaeus, Herodian, Suetonius, Tacitus, Clement and many others besides. Those feet, in ancient times, did indeed walk upon England's mountains green! Sequel to "Jesus, Last of the Pharaohs," and "Cleopatra to Christ." Grand finale of the series. Smoke in Mirrors

It is a little-known fact that the exodus of the Hyksos pharaohs from Egypt to Jerusalem is an incredibly similar event to the exodus of the Israelites from Egypt to Jerusalem. Classical historians and theologians will not entertain any connection between the two, because this infers that the Israelite leaders were actually pharaohs of Egypt. However, Ralph Ellis has taken this obvious comparison and demonstrated the royal Egyptian ancestry of the Judaic patriarchs and also of Jesus. Ralph has also uncovered evidence for the New Testament Saul (St Paul) in the historical record, a discovery that brings with it several new accounts of the life of Jesus. Saul, the inventor of Christianity, was actually Josephus Flavius, a well-known historian. Jesus was the governor of Tiberias and owned a castle there; and he may have died during the siege of Jerusalem in about AD70, rather than AD 33 - crucified along with two of his compatriots. Followed by "Tempest & Exodus" and "Eden to Egypt". Latest version v5.6 Hyksos, Shepherd Kings, Jacob, Sea People, Jesus, Saul, Jerusalem, Egyptian False Prophet, historical Jesus.

Aliens in the Backyard

Why have we humans always longed to connect with something larger than ourselves? Why does consciousness inevitably involve us in a spiritual quest? Why, in short, won't God go away? Theologians, philosophers, and psychologists have debated this question through the ages, arriving at a range of contradictory and ultimately unprovable answers. But in this brilliant, groundbreaking new book, researchers Andrew Newberg and Eugene d'Aquili offer an explanation that is at once profoundly simple and scientifically precise: the religious impulse is rooted in the biology of the brain. Newberg and d'Aquili base this revolutionary conclusion on a long-term investigation of brain function and behavior as well as studies they conducted using high-tech imaging techniques to examine the brains of meditating Buddhists and Franciscan nuns at prayer. What they discovered was that intensely focused spiritual contemplation triggers an alteration in the activity of the brain that leads us to perceive transcendent religious experiences as solid and tangibly real. In other words, the sensation that Buddhists call "oneness with the universe" and the Franciscans attribute to the palpable presence of God is not a delusion or a manifestation of wishful thinking but rather a chain of neurological events that can be objectively observed, recorded, and actually photographed. The inescapable conclusion is that God is hard-wired into the human brain. In *Why God Won't Go Away*, Newberg and d'Aquili document their pioneering explorations in the field of neurotheology, an emerging discipline dedicated to understanding the complex relationship between spirituality and the brain. Along the way,

they delve into such essential questions as whether humans are biologically compelled to make myths; what is the evolutionary connection between religious ecstasy and sexual orgasm; what do Near Death Experiences reveal about the nature of spiritual phenomena; and how does ritual create its own neurological environment. As their journey unfolds, Newberg and d'Aquili realize that a single, overarching question lies at the heart of their pursuit: Is religion merely a product of biology or has the human brain been mysteriously endowed with the unique capacity to reach and know God? Blending cutting-edge science with illuminating insights into the nature of consciousness and spirituality, *Why God Won't Go Away* bridges faith and reason, mysticism and empirical data. The neurological basis of how the brain identifies the "real" is nothing short of miraculous. This fascinating, eye-opening book dares to explore both the miracle and the biology of our enduring relationship with God. From the Hardcover edition.

An analytical psychologist discusses the role of Jung's concepts and teachings in furthering an understanding of the human condition and soul

Real Vampires, Night Stalkers and Creatures from the Darkside

This book explores the use and development of man's symbolizing capacities-those qualities that make him distinctly human. Dr. Whitmont describes the symbolic approach to a dream, which takes into account a symptom's meaning in reference to an unfolding wholeness of personality. He then presents the view that the instinctual urge for meaning is served by the symbolizing capacities, and that this urge has been repressed in our time. In the field of psychology, this symbolic approach is most fully exemplified by the theories of C. G. Jung. The author's contribution includes many differentiations and speculations, especially concerning the problems of relatedness.
